AGAINST FATE
Glenn Tinder

Professor Tinder sees fate as the anti-personal, unexpected consequences of actions which shape our lives: "it is all that threatens and befalls us." In this regard, it is ironical — it seems to come upon us from without, but we ourselves are the masters of our own fates. To be "against fate," provides a liberation from that assault, and a way to reaffirm personal dignity. Only then can we accomplish our own destiny, which Tinder perceives as the counter-concept of fate. By discovering and living a destiny that is human we will achieve personal and collective dignity: "the true political art." \$16.95 cloth

**STRATEGIES OF POLITICAL
EMANCIPATION**
Christian Bay

In *Strategies of Political Emancipation*, Christian Bay, also author of a classic book on freedom, *Structures of Freedom*, seeks to establish a connection between freedom and need: if people are to be free, their basic, natural needs must be filled. Thus Bay argues for a politics of emancipation which would support and encourage the solidarity of human communities in the fulfillment of their basic needs. Bay contests the classical liberal arguments from Mill and Bentham, through Hayek and Berlin, down to Rawls.

INDEPENDENT JOURNAL OF PHILOSOPHY REVUE INDÉPENDANTE DE PHILOSOPHIE

Editorial Statement: *The Independent Journal of Philosophy* provides an international forum for the exploration of responsible, articulate alternatives to the positivist-analytical, Marxist, and narrowly academicist trends that characterize much of present-day philosophy. Although not aligned with any particular school or movement, it takes its general philosophical bearings by the Platonic-Aristotelian conceptions of 'reason,' 'wisdom,' and 'intuitable form,' and the classical-humanistic moral and political tradition. Although opposed to the nihilism latent in the historicism, relativism, and irrationalism stemming from aspects of modern philosophy, it is interested in dialogue with especially the idealist, phenomenological, and existentialist traditions. It welcomes broadly relevant, problem-oriented contributions (including essays, replies, book reviews, translations, dialogues, aphorisms, and philosophical analyses of works of literature and art) in all major areas of philosophy, and particularly in areas announced as special themes for future issues. While most of its material is written in English, it also publishes work in French and German.
