

PROCEEDINGS  
OF  
THE ROYAL SOCIETY  
OF  
EDINBURGH.

VOL. V.

NOVEMBER 1862 TO APRIL 1866.

EDINBURGH:  
PRINTED BY NEILL AND COMPANY.  
MCCCCLXVI.

## CONTENTS.

---

Opening Address, Session 1862-63. By Principal Forbes,	PAGE 2
On the Representative Relationships of the Fixed and Free Tunicata, regarded as two sub-classes of equivalent value; with some general remarks on their Morphology. By John Denis Macdonald, R.N., F.R.S., Surgeon, H.M.S. "Icarus." Communicated by Professor Maclagan,	46
On the great Refractor at Elchies, and its powers in Sidereal Observation. By Professor C. Piazzì Smyth, Astronomer-Royal for Scotland,	47
Biographical Account of Professor Louis Albert Necker, of Geneva, Honorary Member of the Royal Society of Edinburgh. By David James Forbes, D.C.L., F.R.S., V.P.R.S. Ed., Principal of the United College of St Salvador and St Leonard, in the University of St Andrews,	53
On the Structure and Optical Phenomenon of Decomposed Glass. By Principal Sir David Brewster,	76
Notes on the Anatomy of the Genus <i>Firola</i> . By John Denis Macdonald, R.N., F.R.S., Surgeon of H.M.S. "Icarus." Communicated by Professor Maclagan,	76
On the Zoological Characters of the living <i>Clio caudata</i> , as compared with those of <i>Clio borealis</i> given in Systematic Works. By John Denis Macdonald, R.N., F.R.S., Surgeon of H.M.S. "Icarus." Communicated by Professor Maclagan,	76
Notes on the Geology of Lüneburg, in the kingdom of Hanover. By the Rev. Robert Boog Watson,	79
On the Occurrence of Stratified Beds in the Boulder Clay of Scotland, and on the Light which they throw upon the History of that Deposit. By Archibald Geikie, Esq., F.G.S.,	84
On the Influence of Weather upon Disease and Mortality. By R. E. Scoresby-Jackson, M.D., F.R.S.E., F.R.C.P., Lecturer on Materia Medica and Therapeutics at Surgeons' Hall, Edinburgh,	86
History of Popular Literature, and its Influence on Society. By William Chambers, Esq. of Glenormiston,	88
Sketch of the Recent Progress of Sanskrit Literature. By John Muir, D.C.L., LL.D.,	90

On a Pre-Brachial Stage in the Development of <i>Comatula</i> , and its importance in relation to certain Aberrant Forms of Extinct Crinoids. By Professor Allman, . . . . .	91
Letter from Sir D. Brewster relative to the specimens of Topaz with Pressure Cavities presented by him to the Museum of the Society, . . . . .	95
On the Polarisation of Rough Surfaces, and of Substances that reflect White or Coloured Light from their Interior. By Sir David Brewster, K.H., F.R.S., . . . . .	96
On a Clay Deposit with Fossil Arctic Shells, recently observed in the Basin of the Forth. By the Rev. Thomas Brown, F.R.S.E., . . . . .	96
On the Remarkable Occurrence of Graphite in Siberia. By Thomas C. Archer, Esq., . . . . .	97
On the Polarisation of the Atmosphere. By Sir David Brewster, K.H., F.R.S., . . . . .	100
Concluding Note on the Star Observations at Elchies. By Professor C. Piazzzi Smyth, . . . . .	100
On a new Fossil <i>Ophiuridan</i> , from Post-pliocene strata of the Valley of the Forth. By Professor Allman, . . . . .	101
Accompanying Note to Portions of Lead from the Roof of the Lower Storey of Nelson's Monument, injured by Lightning on the evening of 4th February 1863. By Professor C. Piazzzi Smyth, . . . . .	105
Note on the Anatomical Type in the Funis Umbilicalis and Placenta. By Professor Simpson, . . . . .	112
On Earth-Currents during Magnetic Calms, and their Connection with Magnetic Changes. By Balfour Stewart, Esq., M.A., F.R.S. Communicated by Professor Tait, . . . . .	112
Note on a Pictish Inscription in the Churchyard of St Vigean. By Professor Simpson, . . . . .	113
On some Kinematical and Dynamical Theorems. By Professor W. Thomson, . . . . .	113
Note on a Quaternion Transformation. By Professor Tait, . . . . .	115
On the Conservation of Energy. By Professor Tait, . . . . .	121
On Fagnani's Theorem. By H. F. Talbot, LL.D., . . . . .	126
On the Theory of Parallel Lines. By H. F. Talbot, LL.D., . . . . .	126
Address to His Royal Highness the Prince of Wales, . . . . .	126
Opening Address, Session 1863-64. By Professor Innes, one of the Vice-Presidents, . . . . .	130
On the Morphological Relationships of the Molluscoida and Cœlenterata and of their leading members, <i>inter se</i> . By John Denis Macdonald, R.N., F.R.S., Surgeon of H.M.S. "Icarus." Communicated by Professor MacLagan, . . . . .	155
On the External Anatomy of a new Mediterranean Pteropod. By John Denis Macdonald, R.N. Communicated by Professor MacLagan, . . . . .	155
On the Limits of our Knowledge respecting the Theory of Parallels. By Professor Kelland, . . . . .	155
On the great Drift-Beds with Shells in the South-west of Arran. By the Rev. Robert Boog Watson, B.A., F.R.S.E., Hon. Mem. Naturw. Ver. Lüneburg, . . . . .	157

On the Agrarian Law of Lycurgus, and one of Mr Grote's Canons of Historical Criticism. By Professor Blackie, . . .	158
On the Occurrence of Amœbiform Protoplasm and the Emission of Pseudopodia in the Hydroida. By Professor Allman, . . .	158
Description of the Lithoscope, an instrument for distinguishing Precious Stones and other Bodies. By Sir David Brewster, K.H.,	160
On the Temperature of certain Hot Springs in the Pyrenees. By R. E. Scoresby-Jackson, M.D., F.R.C.P., . . .	160
On Human Crania allied in Anatomical Characters to the Engis and Neanderthal Skulls. By Wm. Turner, M.B., Senior Demonstrator of Anatomy in the University of Edinburgh, . . .	161
Notice of a Simple Method of Approximating to the Roots of any Algebraic Equation. By Edward Sang, Esq., . . .	162
Notice of the State of the Open-Air Vegetation in the Edinburgh Botanic Garden during December 1863. By J. H. Balfour, A.M., M.D., F.R.S., F.L.S., . . .	166
On the Influence of the Refracting Force of Calcareous Spar on the Polarisation, the Intensity, and the Colour of the Light which it Reflects. By Sir David Brewster, K.H., F.R.S., . . .	175
On the Most Volatile Constituents of American Petroleum. By Edmund Ronalds, Ph.D., . . .	176
On the Action of Terchloride of Phosphorus on Aniline. By Magnus M. Tait, F.C.S., . . .	177
On Fermat's Theorem. By Professor Tait, . . .	181
Notice of a curious Binocular Telescope. By Professor Archer, . . .	181
On the Gods of the Rigveda. By John Muir, D.C.L., LL.D., . . .	183
On the Diffraction Bands produced by Double Striated Surfaces. By Sir David Brewster, K.H., F.R.S., . . .	184
An Essay on the Theory of Commensurables. By Edward Sang, Esq.,	184
On Superposition, No. II. By Professor Kelland, . . .	190
On Centrobaric Bodies. By Professor W. Thomson, . . .	190
On the Anatomy and Physiology of the Mitral, Tricuspid, and Semilunar Valves in Mammals, Birds, Reptiles, and Fishes. By James B. Pettigrew, M.D., Edinburgh, Assistant in the Museum of the Royal College of Surgeons of England. Communicated by Wm. Turner, M.B., . . .	193
On some points in the Metrology of the Great Pyramid. By Professor C. Piazzzi Smyth, Astronomer-Royal for Scotland, . . .	198
The Decimal Problem Solved. By James Alexander, Esq. Communicated by E. Sang, Esq., . . .	199
On the Elevation of the Earth's Surface Temperature produced by Underground Heat. By Professor W. Thomson, F.R.S., F.R.S.E., . . .	200
On the Celtic Languages in their Relation to each other, and to the Teutonic Dialects. By W. F. Skene, Esq., . . .	202
On the Protection of Vegetation from Destructive Cold every night. By Professor W. Thomson, . . .	203
On Vital Agency, with reference to the Correlation of Forces. By William Seller, M.D., F.R.S.E., Fellow of the Royal College of Physicians of Edinburgh, . . .	209

On Sun Spots, and their connection with Planetary Configurations. By Balfour Stewart, Esq. Communicated by Professor Tait, . . . . .	213
Biographical Sketch of Adam Ferguson, LL.D., F.R.S.E., Professor of Moral Philosophy in the University of Edinburgh. By John Small, Esq., M.A., Librarian to the University of Edinburgh. Communicated by Professor Fraser, . . . . .	214
Unpublished Letter of the late Professor Dugald Stewart. Transmitted by John Small, M.A., Librarian to the University. Communicated by the Rev. Dr Stevenson, . . . . .	215
The Law of Aëriform Volumes extended to Dense Bodies. By J. G. Macvicar, A.M., D.D. Communicated by Professor Lyon Playfair, . . . . .	220
On the Freezing of the Egg of the Common Fowl. By John Davy, M.D., F.R.SS. Lond. and Edin., . . . . .	224
On the Variations of the Fertility and Fecundity of Women according to Age. By Dr J. Matthews Duncan, . . . . .	225
On the Chemical and Physical Principles in connection with the Specific Gravity of Liquid and Solid Substances. By Otto Richter, Ph.D. Communicated by Professor Maclagan, . . . . .	226
On the Theory of Isomeric Compounds. By Dr A. Crum Brown, . . . . .	230
On the Rhombohedral System in Crystallography. By Alfred R. Catton, B.A., Scholar of St John's College, Cambridge, and Fellow of the Cambridge Philosophical Society. Communicated by Professor Tait, . . . . .	232
Preliminary Note on the Connection between the Form and Optical Properties of Crystals. By Alfred R. Catton, B.A., F.C.P.S., Scholar of St John's College, Cambridge, . . . . .	242
A Contribution to the History of the Oxides of Manganese. By W. Dittmar, Esq., . . . . .	255
Notice of Glacial Clay, with Arctic Shells, near Errol, on the Tay. By the Rev. Thomas Brown, F.R.S.E., . . . . .	257
Notes on the Boulder-Clay at Greenock and Port-Glasgow. By the Rev. R. Boog Watson, B.A., F.R.S.E., Hon. Mem. Nat. Ver. Lüneburg, . . . . .	258
Opening Address, Session 1864-65. By His Grace the Duke of Argyll, . . . . .	264
Address, as President. By Sir David Brewster, K.H., F.R.S., . . . . .	321
On Variability in Human Structure, with illustrations from the Flexor Muscles of the Fingers and Toes. By William Turner, M.B. (Lond.), Demonstrator of Anatomy in the University, Edin., . . . . .	327
On the Principle of Onomatopoeia in Language. By Professor Blackie, . . . . .	327
Note on the Phlogistic Theory. By Alexander Crum Brown, M.D., &c. . . . .	328
A Map of Taranaki, New Zealand, executed by a Maori, exhibited, and remarks on it by Dr Lauder Lindsay were communicated by Mr A. Keith Johnston, . . . . .	335
Note on the Various Investigations of the Law of Frequency of Error. By Professor Tait, . . . . .	335

Notice respecting Mr Reilly's Topographical Survey of the Chain of Mont Blanc. By Principal Forbes, . . . . .	335
On the Solution of Perigal's Problem concerning the contact of Epicycloidal Curves. By E. Sang, Esq. . . . .	338
Exhibition of Three Skulls of the Gorilla, received from M. Du Chaillu, with Observations relative to their Anatomical Features. By Dr Burt and Mr W. Turner, . . . . .	341
Notice of a Remarkable Piece of Fossil Amber. By Sir David Brewster, K.H., F.R.S. . . . .	350
On the Cause and Cure of Cataract. By Sir David Brewster, K.H., F.R.S.S. Lond. and Edin., . . . . .	350
On the Hill Forts, Terraces, and other remains of the Early Races in the South of Scotland. By W. Chambers, Esq. of Glenor- miston, . . . . .	351
On the Molecular Constitution of Organic Compounds, No. I. By Alfred R. Catton, B.A., Fellow of St John's College, Cambridge, Assistant to the Professor of Natural Philosophy, . . . . .	353
Account of the Progress of the Geological Survey in Scotland, illustrated by Maps and Sections. By Archibald Geikie, Esq. . . . .	355
On a New Bituminous Substance, imported under the name of Coal, from Brazil. By T. C. Archer, Esq., . . . . .	364
Experimental Inquiry into the Laws of Conduction of Heat in Bars. Part II.—On the Conductivity of Wrought Iron, de- duced from the Experiments of 1851. By Principal Forbes, . . . . .	369
On the Chemical Composition of the Waters of the Beaulieu, Inver- ness, and Moray Firths. By Dr Stevenson Macadam, . . . . .	370
On Hemiosis, or Half Vision. By Sir David Brewster, K.H., F.R.S., . . . . .	373
On the Tertiary Coals of New Zealand. By W. Lauder Lindsay, M.D., F.L.S., Honorary Fellow of the Philosophical Institute of Canterbury, New Zealand, . . . . .	374
On the World as a Dynamical and Immaterial World. By Robert S. Wyld, Esq., F.R.S.E., . . . . .	381
On the <i>Nudibranchiate Mollusca</i> of St Andrews; <i>Edwardsia</i> ; and the Polyps of <i>Alcyonium digitatum</i> . By W. C. M'Intosh, M.D., F.L.S. Communicated by Professor Allman. (Accom- panied by various Drawings), . . . . .	387
Miscellaneous Observations on the Blood. By John Davy, M.D., F.R.S.S. Lond. and Edin. &c., . . . . .	395
On the Pronunciation of Greek. By Professor Blackie, . . . . .	398
Note on Action. By Professor Tait, . . . . .	404
On the Application of Hamilton's Characteristic Function to Special Cases of Constraint. By Professor Tait, . . . . .	407
On Transversals. By the Rev. Hugh Martin, Free Greyfriars, . . . . .	408
On the Motion of a Heavy Body along the circumference of a Circle. By Edward Sang, . . . . .	408
On the Action of Hydriodic Acid on Mandelic Acid. By Alex. Crum Brown, M.D., D.Sc., . . . . .	409
On the Nature of Antozone. By Alfred R. Catton, B.A., F.R.S.E., Fellow of St John's College, Cambridge, and Assistant to the	

Professor of Natural Philosophy in the University of Edinburgh,	413
On the Food of the Royal Engineers stationed at Chatham. By Dr Lyon Playfair,	421
Notice of a large Calcareous Stalagmite brought from the Island of Bermuda in the year 1819, and now in the College of Edinburgh. By David Milne Home, Esq. of Wedderburn,	423
Meteorological Observations on Storms of Wind in October, November, and December of 1863. By Alexander Buchan, M.A., Secretary to the Scottish Meteorological Society,	428
On the Use of Graphic Representations of Chemical Formula. By Dr A. Crum Brown,	429
On Confocal Conics. By H. Fox Talbot, Esq.,	432
On the Celtic Topography of Scotland. By W. F. Skene, Esq.,	432
On the Bands produced by the Superposition of Paragenic Spectra formed by the Grooved Surfaces of Glass and Steel. Part II. By Sir David Brewster, K.H., F.R.S.,	434
Remarks on the Flora of Otago, New Zealand. By W. Lauder Lindsay, M.D., F.L.S., Hon. Member of the Philosophical Institute of Canterbury, New Zealand,	434
On the Composition of some Old Wines. By Douglas Maclagan, M.D., Curator Roy. Soc. Edin.,	437
Preliminary Note on the Colouring Matter of <i>Peziza aeruginosa</i> . By Dr A. Crum Brown,	439
On the Motion of Interpenetrating Media. By Alfred R. Catton, B.A., Assistant to the Professor of Natural Philosophy in the University of Edinburgh,	441
Some Observations on the Cuticle in relation to Evaporation. By John Davy, M.D., F.R.SS. Lond. and Edin.,	443
On Water, Hydrogen, Oxygen, and Ozone. By John Macvicar, D.D. Communicated by Dr E. Ronalds,	444
Note on the Behaviour of Iron Filings, strewn on a vibrating plate, and exposed to the action of a magnetic pole. By Professor Tait,	444
On some Congenital Deformities of the Human Skull. By Wm. Turner, M.B., F.R.S.E.,	444
On Saturated Vapours. By W. J. Macquorn Rankine, C.E., LL.D., F.R.SS. Lond. and Edin., &c.,	449
On the Ganglia and Nerves of the Heart, and their connection with the Cerebro-Spinal and Sympathetic Systems in Mammalia. By James Bell Pettigrew, M.D., Edinburgh, Assistant in the Museum of the Royal College of Surgeons of England,	452
Opening Address, Session 1865-66. By Sir David Brewster, President,	458
Address on the Forces concerned in the Laying and Lifting of Deep-Sea Cables. By Professor William Thomson,	495
On the Dynamical Theory of Heat. Part VII. By Professor William Thomson,	510
The "Doctrine of Uniformity" in Geology briefly refuted. By Professor William Thomson,	512

Note on the Atomicity of Sulphur. By Dr Alexander Crum Brown, . . . . .	513
Note on a paper by Balfour Stewart, Esq., in the Transactions of the Royal Society of Edinburgh, by I. Todhunter, Esq., M.A., St John's College, Cambridge. Communicated by Professor Tait, . . . . .	517
Additional Observations on the Polarisation of the Atmosphere made at St Andrews in 1841, 1842, 1843, 1844, and 1845. By Sir David Brewster, K.H., D.C.L., F.R.S., &c., . . . . .	520
Notices of some Ancient Sculptures on the Walls of Caves in Fife. By Professor J. Y. Simpson, . . . . .	521
Observations on New Lichens and Fungi from Otago, New Zealand. By Dr Lauder Lindsay, . . . . .	527
Orthogonal Isothermal Surfaces. By Professor Tait, . . . . .	528
Notes for a Comparison of the Glaciation of the West of Scotland with that of Arctic Norway. By Archibald Geikle, Esq., F.R.S., . . . . .	530
On the Third Co-ordinate Branch of the Higher Calculus. By Edward Sang, Esq., . . . . .	556
On the Laws of the Fertility of Women. By J. Matthews Duncan, M.D., . . . . .	559
On the Classification of Chemical Substances by Means of Generic Radicals. By Dr Alexander Crum Brown, . . . . .	561
Note on the Compression of Air in an Air-bubble under Water. By Professor Tait, . . . . .	563
On some Geometrical Constructions connected with the Elliptic Motion of Unresisted Projectiles. By Professor Tait, . . . . .	565
On the Fairy Stones found in the Elwand Water, near Melrose. By Sir David Brewster, K.H., F.R.S., . . . . .	567
Report on the Hourly Observations made at Leith Fort in 1826 and 1827, by Direction of the Society. By Sir David Brewster, K.H., D.C.L., F.R.S., &c., . . . . .	573
On a New Property of the Retina. By Sir David Brewster, K.H., D.C.L., F.R.S., &c., . . . . .	573
On some Laws of the Sterility of Women. By J. Matthews Duncan, M.D., . . . . .	574
On certain Points in the Morphology of Cleft Palate. By John Smith, M.D., F.R.C.S.E. Communicated by William Turner, M.B., . . . . .	575
Notes more especially on the Bridging Convolution in the Brain of the Chimpanzee. By Wm. Turner, M.B., F.R.S.E., . . . . .	578
On the Theory of the Refraction and Dispersion of Light. Part I. By Alfred R. Catton, M.A., F.R.S.E., Fellow of St John's College, Cambridge, Assistant to the Professor of Natural Philosophy in the University of Edinburgh, . . . . .	587
On the General Equation of Motion of a Heterogeneous Compressible System of Particles slightly Disturbed from their Position of Equilibrium. By A. R. Catton, M.A., . . . . .	590
On some Capillary Phenomena. By Professor Tait, . . . . .	593
On Functions with Recurring Derivatives. By Edward Sang, Esq., . . . . .	594
The World as Governed by Law, Teleologically considered. By R. S. Wyld, Esq., . . . . .	596

Description of <i>Pygopterus Greenockii</i> (Agassiz); with Notes on the Structural Relations of the genera <i>Pygopterus</i> , <i>Amblypterus</i> , and <i>Eurynotus</i> . By Ramsay H. Traquair, M.D., Demonstrator of Anatomy in the University of Edinburgh. Communicated by W. Turner, M.B., . . . . .	597
Observations on the Marine Zoology of North Uist, Outer Hebrides, —(Cœlenterata, Mollusca, Echinodermata, Gephyrea, and Pisces). By W. C. M'Intosh, M.D., F.L.S. Communicated by Professor Allman, . . . . .	600
On the Natural History of Lewis. By Professor Duns, D.D., F.R.S.E., . . . . .	615
On M. Mége Mouriés' Process of Preparing Wheat Flour. By Professor Wilson, . . . . .	626
Observations on Meat (Butchers'-meat), in relation to the Changes to which it is liable under different Circumstances. By John Davy, M.D., F.R.SS. Lond. and Edin., &c., . . . . .	628
The Buried Forests and Peat-Mosses of Scotland. By James Geikie, Esq. Communicated by Archibald Geikie, Esq., . . . . .	635
Account of Recent Measures at the Great Pyramid, and the Deductions flowing therefrom. By Professor Piazzi Smyth, . . . . .	640
Some Observations on Incubation. By John Davy, M.D., F.R.SS. Lond. and Edin., . . . . .	642
On the Absorption of Substances from Solutions by Carbonaceous Matters, and the growth thereby of Coal-Seams. By William Skey, Esq., Analyst to the Geological Survey of New Zealand. Communicated by James Hector, M.D., F.R.S.E., Director of the Geological Survey of New Zealand, . . . . .	643
Description of <i>Calamosichthys</i> , a new Genus of Ganoid Fish, from Old Calabar, Western Africa, forming an addition to the Family <i>Polypterini</i> . By John Alexander Smith, M.D., F.R.C.P.E., and R. H. Traquair, M.D., Demonstrator of Anatomy in the University of Edinburgh, . . . . .	654
