A major forum focusing on decision research...

JOURNAL OF BEHAVIORAL DECISION MAKING

EDITOR

GEORGE WRIGHT
Strathclyde Graduate
Business School,
University of
Strathclyde,
UK

ASSOCIATE EDITOR

J. FRANK YATES
University of Michigan,
USA

The Journal of Behavioral Decision Making is a multidisciplinary journal with a broad base of content and style. The objective of the Journal is to present and stimulate behavioral research on decision making and to provide a forum for the evaluation of complementary, contrasting and conflicting perspectives. These perspectives include: psychology, management science, sociology, political science and behavioral economics.

Papers published in the Journal encompass, but are not limited to, the following areas:

- ▶ Individual decision making
- ▶ Management science and decision aids
- ▶ Interpersonal and small group decision making
- ▶ Organizational decision making
- ▶ Strategic decision making
- ▶ Social and political structuring of decision making
- ▶ Behavioral economics
- ▶ Expert systems
- ▶ Consumer decision making
- ▶ Behavioral accounting
- ▶ Medical and clinical decision making

Contents of Volume 10

VOLUME 10 NUMBER 1 MARCH 1995

Editorial: Knowledge representation and reasoning: The view from cognitive psychology JOHN FOX and PAUL KRAUSE	1
Cognitive expertise research and knowledge engineering FERGUS BOLGER	3
Bias in human judgement under uncertainty? PETER AYTON and EVA PASCOE	21
A review of human linguistic probability processing: General principles and empirical evidence THOMAS S. WALLSTEN and DAVID V. BUDESCU	43
Grey Pages	
Models and Techniques for the Reuse of Designs: ECA/94 Workshop, Amsterdam, August 8 1994 P. M. WOGNUM	63
Comparison of implemented ontologies NICOLAAS J. I. MARS	67
Validation of knowledge-based systems: Current trends and issues ALUN D. PREECE	69
Reasoning about structured objects: Knowledge representation meets databases FRANZ BAADER, MARTIN BUCHEIT, MANFRED A. JEUSFELD and WERNER NUTT	73
Integration of Machine Learning and knowledge Acquisition CLAIRE NÉDELLEC	77
Information processing and the management of uncertainty SIMON PARSONS and ALESSANDRO SAFFIOTTI	83
The Legal Applications of Logic Programming Workshop at the ICLP 94 Conference DANIELA TISCORNIA	89
Report on the Workshop: Applications of Logic Programming in Software Engineering P. CIANCARINI and LEON STERLING	97
Book reviews	101
From the journals. . . .	115

VOLUME 10 NUMBER 2 JUNE 1995

Intelligent agents: theory and practice MICHAEL WOOLDRIDGE and NICHOLAS R. JENNINGS	115
Logic engineering in medicine PETER LUCAS	153
Application oriented qualitative reasoning LOUISE TRAVÉ-MASSUYÈS and ROBERT MILNE	181
Grey Pages	
Workshop on Integration of Declarative Paradigms JUAN JOSÉ MORENO-NAVARRO	205
Logic Programming and Education ROSA MARIA BOTTINO, PAOLA FORCHERI and MARIA TERESA MOLFINO	209
Book reviews	213
From the journals. . . .	223

VOLUME 10 NUMBER 3 SEPTEMBER 1995

CBT II-Case-based computer-aided instruction survey of principles, applications and issues TARIQ KHAN and YAU JIM YIP	235
Evaluation of workbenches which support the Common KADS JOHN K. C. KINGSTON, JIM G. DOHENY and IAN M. FILPY	269
Grey Pages	
Issues on building software for hardware agents HENRY HEXMOOR and DAVID KORTENKAMP	301
Book reviews	305
From the journals. . . .	307

VOLUME 10 NUMBER 4 DECEMBER 1995

Guest Editors: Frank van Harmelen and Jan Treur, Free University of Amsterdam	
Verification and validation of knowledge-based systems with formal specifications PEDRO MESEGUER and ALUN D. PREECE	331
Formal methods on knowledge engineering FRANK VAN HERMELEN and DIETER FENSEL	345
Formal specification languages in knowledge and software engineering DIETER FENSEL	361
Grey Pages	
Workshop Report Constraint languages/systems and their use in problem modelling ROLAND H. C. YAP	405
Book reviews	411
From the journals. . . .	415

INDEX TO VOLUME 10

- Ayton, Peter and Pascoe, Eva.** Bias in human judgement under uncertainty, 21–41
- Baader, Franz, Bucheit, Martin, Jeusfeld, Manfred A. and Nutt, Werner.** Reasoning about structured objects: Knowledge representation meets databases, 73–76
- Bolger, Fergus.** Cognitive expertise research and knowledge engineering, 3–19
- Bottino, Rosa Maria, Forcheri, Paola and Molfino, Maria Teresa.** Logic Programming and Education, 209–211
- Bucheit, Martin.** *See* Baader, Bucheit, Jeusfeld and Nutt
- Budesu, David V.** *See* Wallsten and Budescu
- Ciancarini P and Sterling, Leon.** Repost on the Workshop: Applications of Logic Programming in Software Engineering, 97–100
- Doheny, Jim G.** *See* Kingston, Doheny and Filby
- Fensel, Dieter.** *See* Harmelen and Fensel
- Fensel, Dieter.** Formal specification languages in knowledge and software engineering, 361–404
- Filby, Ian M.** *See* Kingston, Doheny and Filby
- Forcheri, Paola.** *See* Bottino, Forcheri and Molfino
- Harmelen, Frank van and Fensel, Dieter.** Formal methods in knowledge engineering, 345–360
- Hexmoor, Henry and Kortenkamp, David.** Issues on building software for hardware agents, 301
- Jennings, Nicholas R.** *See* Wooldridge and Jennings
- Jeusfeld, Manfred A.** *See* Baader, Bucheit, Jeusfeld and Nutt
- Jim Yip, Yau.** *See* Khan and Jim Yip
- Khan, Tariq and Jim Yip, Yau.** CBT II – Case-based computer-aided instruction: survey of principles, applications and issues, 235
- Kingston, John K. C., Doheny, Jim G and Filby, Ian M.** Evaluation of workbenches which support the CommonKADS methodology, 269
- Kortenkamp, David.** *See* Hexmoor and Kortenkamp
- Lucas, Peter.** Logic engineering in medicine, 153–179
- Mars, Nicholas J. I.** Comparison of implemented ontologies, 67–68
- Meseguer, Pedro and Preece, Alun D.** Verification and validation of knowledge-based systems with formal specifications, 331–343
- Milne, Robert.** *See* Travé-Massuyes and Milne
- Molfino, Maria Teresa.** *See* Bottino, Forcheri and Molfino
- Moreno-Navarro, Juan José.** Workshop on Integration of Declarative Paradigms, 205–208
- Nédellec, Claire.** Integration of Machine Learning and Knowledge Acquisition, 77–81
- Nutt, Werner.** *See* Baader, Bucheit, Jeusfeld and Nutt
- Parsons, Simon and Saffiotti, Alessandro.** Information processing and the management of uncertainty, 83–88
- Pascoe, Eva.** *See* Ayton and Pascoe
- Preece, Alun D.** Validation of knowledge-based systems: Current trends and issues, 69–71
- Preece, Alun D.** *See* Meseguer and Preece
- Saffiotti, Alessandro.** *See* Parsons and Saffiotti

Sterling, Leon. *See* Ciancarini and Sterling

Tiscornia, Daniela. The Legal Applications of Logic Programming Workshop at the ICLP 94 Conference, 89–96

Travé-Massuyes, Louis and Milne, Robert. Application orientated qualitative reasoning, 181–204

Wallsten, Thomas S. and Budescu, David V. A review of human linguistic processing: General principles and empirical evidence, 43–61

Wognum, P. M. Models and Techniques for the Reuse of Designs: ECA/94 Workshop, Amsterdam, August 8 1994, 63–66

Wooldridge, Michael and Jennings, Nicholas R. Intelligent agents: theory and practice, 115–152

Yap, Roland H. C. Workshop Report. Constraint languages/systems and their use in problem modelling, 405–410

INDEX OF BOOKS REVIEWED IN VOLUME 10

The name of the reviewer is given in parentheses

- Advanced methods in neural computing* (Philip Wasserman), 104–105
- Artificial Intelligence techniques in Prolog* (Yoav Shoham and Morgan Kaufmann), 412
- Artificial intelligence through search* (Chris Thornton), 106–108
- A safety licenseable computing architecture* (W. A. Halang), 305–306
- Collected works of A. M. Turing: Volume 1: Pure mathematics* (J. L. Britton), 213
- Collected works of A. M. Turing: Volume 2: Mechanical intelligence* (J. L. Britton), 213
- Collected works of A. M. Turing: Volume 3: Morphogenesis* (J. L. Britton), 213
- Cooperation in industrial multi-agent systems* (Nick Jennings), 215
- Constraint-based reasoning* (E. C. Freuder and A. K. Mackworth), 216–217
- Current trends in AI planning: EWSP-93–2nd European Workshop on Planning* (C. Backstrom and E. Sandwell), 110–111
- Executable modal and temporal logics* (M. Fisher and R. Owens), 411
- First steps in model logic* (Sally Popkorn), 220
- Formal specification of complex reasoning systems* (Jan Treur and Thomas Wetter), 112–113
- Genetic algorithms for machine learning* (John J. Grenfenstette), 113–114
- Integrating rules and connectionism for robust commonsense reasoning* (Ron Sun), 214–215
- Logic programming: operational semantics and proof theory* (J. H. Andrews), 111–112
- Methods and tools for applied artificial intelligence* (D. Popovic and V. P. Bhatkar), 218–219
- Model theory* (Wilfred Hodges), 105–106
- Neural networks and fuzzy systems; A dynamical systems approach to machine intelligence* (Bart Kosko), 219–220
- Recent advances in qualitative physics* (Boi Faltings), 108–109
- The art of Prolog – second edition* (Leon Sterling and Ehud Shapiro), 411
- The Godel programming language* (Patricai Hill), 102–104
- Foundations of fuzzy systems* (Rudolf Kruse), 101–102
- Fuzzy logic for the management of uncertainty* (Lotfi Zadeh and Janusc Kacprzyk), 101

Real-time Computer Vision

Edited by C. M. BROWN and D. TERZOPOULOS

Researchers are increasingly turning their attention to developing algorithms for real-time computer vision, needed for the control of automated systems. This is the first book devoted to the subject, and includes articles by some of the leading researchers in the world. It will interest students, researchers and engineers involved in the design and programming of visually guided systems.

£30.00 net HB 0 521 47278 4 232 pp.

Publications of the Newton Institute 2

Language and Learning for Robots

C. CRANGLE and P. SUPPES

Develops the notion of an intractable robot – one which derives its intelligence in part from interaction with humans. Since verbal interaction with a robot requires a natural language semantics, the authors propose a natural-model semantics which they then apply to the interpretation of robot commands.

CSLI Publications

People and Computers VIII

Proceedings of HCI '93

Edited by J. L. ALTY, D. DIAPER and S. GUEST

Covers a broad range of HCI topics, including user interface design, user modelling, tools, hypertext, CSCW, and programming. Research and commercial perspectives are considered, making the book essential for all researchers, designers and manufacturers who need to keep abreast of developments.

£40.00 net PB 0 521 46633 4 512 pp.

British Computer Society Conference Series 7

People and Computers IX

Proceedings of the HCI '94 Conference

Edited by G. COCKTON, S. DRAPER and G. WEIR

Covers a broad range of HCI related topics, including interactive systems development, user interface design, user modelling, tools, hypertext and CSCW. An essential purchase for all researchers, designers and manufacturers.

£35.00 net PB 0 521 48557 6 448 pp.

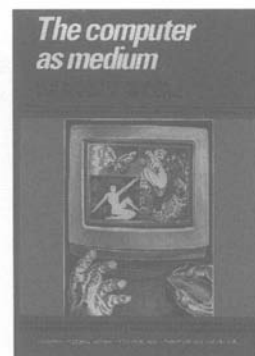

The Computer as Medium

Edited by P. B. ANDERSEN, B. HOLMQVIST and J. F. JENSEN

The Computer as Medium brings insights from art, literature and theatre to bear on computers. The broad and rich coverage of this book will appeal to scholars in cognitive science, computer science, linguistics, semiotics, media studies and mass-communications and cultural studies, and education.

£40.00 net HB 0 521 41995 6 544 pp.

Learning in Doing: Social, Cognitive and Computational Perspectives

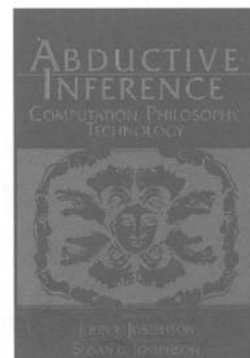

Abductive Inference

Computation, Philosophy, Technology

Edited by J. R. JOSEPHSON and S. G. JOSEPHSON

This volume makes significant progress in analysing abduction as an information-processing phenomenon, and in describing how AI systems can be built for abductive tasks such as diagnosis.

£30.00 net HB 0 521 43461 0 304 pp.

Now in paperback

Formal Methods in Artificial Intelligence

A. M. RAMSAY

Covers the background of classical logic, including the major meta-theorems, and the state of the art in theorem proving including Bibel's connection method. Also covered are the advanced adaptations of classical logic now being used in AI - temporal and modal logics, reason maintenance and intensional logic.

£ 15.00 net PB 0 521 42421 6 296 pp.

Notes for Contributors

Contributions for publication should be addressed to Professor John Fox, Editor, The Knowledge Engineering Review, Imperial Cancer Research Fund, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX, England; Dr Peter Jackson, North American Editor, Department of Electrical and Computer Engineering, Clarkson University, Potsdam, NY 13699-5720, USA; or may be submitted through a member of the Editorial Board (address inside front cover). Submission implies that the manuscript has not been published previously nor currently submitted for publication elsewhere.

All contributions, whether articles, correspondence or reviews, must be sent in triplicate and typed on one side of the paper, with wide margins and double-line spacing throughout. Any minor corrections should be made neatly in the typescript, leaving the margins clear. The author is invited to nominate up to five possible referees, who will not necessarily be used.

Articles must be accompanied by a brief, informative rather than indicative, abstract. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings, 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102.

Tables should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

Illustrations should be drafted for reproduction as full page (148 mm) width. Originals should normally be drawn at twice final area and must be sent in a flat package; larger drawings may delay publication. Lettering should be of a size so that when reduced the smallest lower-case letters will not be less than about 1 mm. Avoid gross disparities in lettering size on a drawing. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Illustrations in the text, both line drawings and photographs for halftone reproductions, will be referred to as figures (Fig. 2, 2a, etc.). Folding plates will not be accepted. Figures composed of photographs should be glossy prints presented at publication scale. Figure captions must be typed with double-line spacing on sheets separate from the running text.

The accuracy of references is the responsibility of authors. References must be double-spaced and spelt out in full, e.g.

Gale, W A, ed 1986. *Artificial Intelligence and statistics*, Reading, Massachusetts: Addison-Wesley

Pearl, J 1984. *Heuristics. Intelligent search strategies for problem solving*, Reading, Massachusetts: Addison-Wesley

Tie-Cheng Wang and Bledsoe, W W, 1987. "Hierarchical deduction" *Journal of Automated Reasoning* 3 (1) pp 1-34.

Pau, L F, 1986. "Survey of expert systems for fault detection, test generation and maintenance" *Expert Systems*, 3 (2) pp 100-111.

Twenty Five offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges if ordered when the proofs are returned.
