# Start breathing easier.

**END-TIDAL CO<sub>2</sub> DETECTION,  
ANYWHERE, ANYTIME.**

*EASY CAP*<sup>™</sup> end-tidal CO<sub>2</sub> detector is the disposable, easy-to-use device that can be used to:

- Verify proper endotracheal tube placement
- Monitor ETCO<sub>2</sub> levels during CPR
- Detect return of spontaneous circulation during CPR
- Transport your intubated patient safely in the field and hospital

No batteries, no cables, no connectors. Just intubate, attach *EASY CAP* and begin to monitor ranges of end-tidal CO<sub>2</sub> for up to two hours. It's the easiest way to improve safety.

***EASY CAP* IS A NEW  
STANDARD OF CARE.  
ALMOST ANYWHERE.**

The *EASY CAP* detector is ideally designed for crash carts, anesthesia intubation kits, ambulances, the ED and the ICU. Anywhere emergency intubation may be required.

*EASY CAP* is from *NELLCOR*, which means a lot of added benefits. Like our on-site Clinical Education Consultants, comprehensive technical assistance and the industry's most in-depth inservice training.

So ask your *NELLCOR* representative about the new *EASY CAP* detector or call 1-800-*NELLCOR*.

The patient's name is fictitious but, the data shown above is from an actual case depicting the dramatic results of early simultaneous 12-lead acquisition, analysis and immediate treatment.

# RECORD DIAGNOSE TREAT

## 12SL™ ECG Analysis Program, Simultaneous Acquisition and Analysis

In the field, in the emergency room, or throughout the hospital, Marquette's simultaneous 12-lead ECG capability enables all members of the team to respond more quickly and efficiently.

Whether you use a Marquette Responder™ 1500 defibrillator or one of Marquette's extensive family of electrocardiographs or ECG systems, you have exactly the same advanced ECG acquisition and analysis capabilities at your fingertips.

First responders can acquire, within seconds, a simultaneous 12-lead ECG on the Marquette Responder 1500 with 12SL ECG analysis program right at the patient's side, then transmit that exact report directly to the emergency

room by cellular phone. There, the emergency room physician can overread the ECG and make therapeutic plans while the patient is still on the way to the hospital. Following intervention,

The Series 1500 is the first defibrillator to combine pacing, simultaneous 12-lead ECG analysis and digital full disclosure ECG data storage in one rugged portable unit.

the patient's ECG, acquired and analyzed in precisely the same way, provides quick and direct assessment of the effectiveness of therapy.

Marquette's 12SL ECG analysis program is widely recognized as the most accurate and thoroughly documented commercially available ECG analysis program.

For more information contact your local Marquette representative or call 1-800-917-6000, ext. 4213.

## Join THE **WORLD ASSOCIATION** FOR **DISASTER AND EMERGENCY MEDICINE**

(founded in 1976 as *The Club of Mainz*)

ASSOCIATION MONDIALE POUR LA MÉDECINE DE CATASTROPHE ET D'URGENCE

The management science of mass emergencies and disasters is evolving very rapidly. As a member of WADEM, you'll quickly see that we are in the exhilarating position of pioneers—ground-floor witnesses and participants in a profound change that signals hope in today's troubled world.

Our members are involved—and informed. Our international meetings provide an excellent means for both scientific advancement and social interaction. And the fellow-members you will meet are active participants in prehospital and emergency care, from a variety of different medical specialities, worldwide.

WADEM Membership includes:

- An annual subscription to *Prehospital and Disaster Medicine* (US\$32 of the membership fee is applied to an annual subscription.)
- A membership certificate
- A biannual newsletter
- A directory listing all members
- International recognition at the World Congresses and other WADEM meetings
- Preferred rates on registration at the Congress
- Special Federated Society Membership advantages

For more information, please call Pam Miao (US) at 619/431-6975 or fax at 619/431-8135.

### THE **WORLD ASSOCIATION** FOR **DISASTER AND EMERGENCY MEDICINE** MEMBERSHIP APPLICATION

To join the World Association for Disaster and Emergency Medicine, please complete this application form and send it with your curriculum vitae and either a check or your credit card authorization for US \$100 (US currency only) for annual dues to:

# INTRODUCING THE MTV-100 Manually Triggered Ventilator

Intelligent Ventilation At Your Fingertips; Designed With These Smart Features:

- 
- It's all in the "Smart Button". Advanced pneumatic design provides unprecedented pressure and flow safety limits.
  - To safely manage pressure conditions, a secondary pressure relief valve is set at 70 cmH<sub>2</sub>O.
  - A 360° swivel oxygen attachment eliminates the problem of line twisting and tangling.
  - Anti-Asphyxiation Ports allow patients to breathe freely in the event of source gas failure.
  - Conveniently attaches to all standard 15 mm ID/ 22 mm OD Endotracheal Tubes and Masks.
  - Inside, simple componentry allows the MTV-100/Manually Triggered Ventilator to be cleaned easily using standard sterilization processes. You can even run fluid through the device without harm.
  - Uses the same parts found on other LSP products to help minimize inventory costs.

\* Shown Actual Size

**To order, or to find out more information about the advanced pneumatic MTV-100/Manually Triggered Ventilator, call us at 1-800-225-4577 for the name and phone number of your nearest authorized LSP Distributor.**
