Publisher: Katy Christomanou

Special sales and supplements:

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Katy Christomanou at the Cambridge address for further details. E-mail: kchristomanou@cambridge.org

Subscription information:

British Journal of Nutrition is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2010 comprise Volume 103, the twelve issues starting July 2010 comprise Volume 104.

Annual subscription rates:

Volumes 103/104 (24 issues):
Internet/print package £954/\$1860/€1528
Internet only: £803/\$1566/€1283
Print only: £909/\$1772/€1477

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Directions to Contributors are available from the Society at the address below or can be found on the Society's website at <http://www.nutritionociety.org> (an abbreviated Notes for Authors can be found inside the back cover).

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

British Journal of Nutrition is covered in Current Contents®/Agriculture, Biology & Environmental Sciences, SciSearch®, Research Alert®, Current Contents®/Life Sciences, Index Medicus® (MEDLINE®), AGRICOLA®, CAB Abstracts™, Global Health, BIOSIS® Database, EMBASE/Excerpta Medica and Elsevier BIOBASE/Current Awareness in Biological Sciences, CINAHL, and Chemical Abstracts Service.

(Contents continued from back cover)

A controlled study of consumption of β -glucan-enriched soups for 2 months by type 2 diabetic free-living subjects. <i>C. Cugnet-Anceau, J.-A. Nazare, M. Biorklund, E. Le Coquil, A. Sassolas, M. Sothier, J. Holm, M. Landin-Olsson, G. Önning, M. Laville & P. Moulin</i>	422–428
<i>Dietary Surveys and Nutritional Epidemiology</i>	
Dietary flavonoid intake and colorectal cancer: a case–control study. <i>J. A. M. Kyle, L. Sharp, J. Little, G. G. Duthie & G. McNeill</i>	429–436
Folate status of Ghanaian populations in London and Accra. <i>M. Owusu, J. Thomas, E. Wiredu & M. Pufulete</i>	437–444
Maternal folic acid supplement use in early pregnancy and child behavioural problems: The Generation R Study. <i>S. J. Roza, T. van Batenburg-Eddes, E. A. P. Steegers, V. W. V. Jaddoe, J. P. Mackenbach, A. Hofman, F. C. Verhulst & H. Tiemeier</i>	445–452
Consumption of coffee, green tea, oolong tea, black tea, chocolate snacks and the caffeine content in relation to risk of diabetes in Japanese men and women. <i>S. Oba, C. Nagata, K. Nakamura, K. Fujii, T. Kawachi, N. Takatsuka & H. Shimizu</i>	453–459
<i>Behaviour, Appetite and Obesity</i>	
Acute effects of intravenous and rectal acetate on glucagon-like peptide-1, peptide YY, ghrelin, adiponectin and tumour necrosis factor- α . <i>K. R. Freeland & T. M. S. Wolever</i>	460–466

Directions to Contributors - Concise Version

(Revised August 2007)

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition-society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition-society.org>). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

- Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhabarbarum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
- Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
- Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
- Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4). If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjnproduction@cambridge.org

Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). **Authors should submit to the following address: <http://bjn.msubmit.net/>** If any difficulties are encountered please contact the Publications Office (details above) immediately.

Contents

Invited Commentary

- Wanted: specific nutritional biomarkers for food consumption for the study of its protective role in health.
C. Andres-Lacueva & R. Zamora-Ros 307–308

Short Communication

- Vasodilating dipeptide Trp-His can prevent atherosclerosis in apo E-deficient mice.
T. Matsui, M. Sato, M. Tanaka, Y. Yamada, S. Watanabe, Y. Fujimoto, K. Imaizumi & K. Matsumoto 309–313
- Antioxidant-enriched enteral nutrition and immuno-inflammatory response after major gastrointestinal tract surgery.
M. F. M. van Stijn, P. G. Boelens, M. C. Richir, G. C. Ligthart-Melis, J. W. R. Twisk, J. Diks, A. P. J. Houdijk & P. A. M. van Leeuwen 314–318
- Dietary patterns of school-age children in Scotland: association with socio-economic indicators, physical activity and obesity.
L. C. A. Craig, G. McNeill, J. I. Macdiarmid, L. F. Masson & B. A. Holmes 319–334
- Quantitative differences in intestinal *Faecalibacterium prausnitzii* in obese Indian children.
R. Balamurugan, G. George, J. Kabeerdoss, J. Hepsiba, A. M. S. Chandragunasekaran & B. S. Ramakrishna 335–338
- Plasma alkylresorcinol metabolites as potential biomarkers of whole-grain wheat and rye cereal fibre intakes in women.
M. Aubertin-Leheudre, A. Koskela, A. Samaletdin & H. Adlercreutz 339–343

Molecular Nutrition

- Zinc and DHA have opposing effects on the expression levels of histones H3 and H4 in human neuronal cells.
C. Suphioglu, N. Sadli, D. Coonan, L. Kumar, D. De Mel, J. Lesheim, A. J. Sinclair & L. Ackland 344–351
- Genotype × nutrient association of common polymorphisms in obesity-related genes with food preferences and time structure of energy intake.
J. Bienertová-Vašků, P. Bienert, M. Forejt, J. Tomandl, Z. Brázdová & A. Vašků 352–359
- Fermented wheat aleurone inhibits growth and induces apoptosis in human HT29 colon adenocarcinoma cells.
A. Borowicki, K. Stein, D. Scharlau, K. Scheu, G. Brenner-Weiss, U. Obst, J. Hollmann, M. Lindhauer, N. Wachter & M. Gleis 360–369
- Role of zinc along with ascorbic acid and folic acid during long-term *in vitro* albumin glycation.
R. S. Tupe & V. V. Agte 370–377

Metabolism and Metabolic Studies

- Chronic intake of a high-cholesterol diet resulted in hepatic steatosis, focal nodular hyperplasia and fibrosis in non-obese mice.
M. Sumiyoshi, M. Sakanaka & Y. Kimura 378–385

Nutritional Endocrinology

- The relationship between birth weight and insulin resistance in childhood.
J. O. Lemos, P. H. C. Rondó, J. A. Pereira, R. G. Oliveira, M. B. S. Freire & P. B. Sonsin 386–392

Nutritional Immunology

- Orally administered glucans from the edible mushroom *Pleurotus pulmonarius* reduce acute inflammation in dextran sulfate sodium-induced experimental colitis.
I. Lavi, D. Levinson, I. Peri, L. Nimri, Y. Hadar & B. Schwartz 393–402

Microbiology

- Set up of a new *in vitro* model to study dietary fructans fermentation in formula-fed babies.
G. Le Blay, C. Chassard, S. Baltzer & C. Lacroix 403–411

Human and Clinical Nutrition

- Soya protein does not affect glycaemic control in adults with type 2 diabetes.
C. P. Gobert, E. A. Pipe, S. E. Capes, G. A. Darlington, J. W. Lampe & A. M. Duncan 412–421
