## **MANAGEMENT OF THE INDUSTRIAL FIRM IN THE USSR**

**A Study in Soviet Economic Planning**

DAVID GRANICK'S study of how the Soviet planning system integrates the thousands of industrial plants in the USSR shows that plant managers have greater entrepreneurial powers than is generally supposed. He analyzes the role of top management, showing where plant executives play a direct role, describing their characteristics as a group, their special problems, and the institutional structure within which they work. *A Study of the Russian Institute.* \$5.00

### **FAR EASTERN GOVERNMENT AND POLITICS**

#### ***China and Japan***

By **PAUL M. A. LINEBARGER, DJANG CHU, and ARDATH W. BURKS**

This singularly important new book presents the governments of China and Japan in a comparative study, *historically applied*. Here are descriptive presentations of selected, actual systems of government, with some reference to the historical events which led to the foundation of each system and its supersession by another. Included in this up to date work are the first complete treatments of Formosa and the Communist Government of China to be found in any general text. This is not a political history, but numerous bibliographical footnotes in appropriate sections throughout the book give leads from which one can follow political history as such.

### **RUSSIAN WRITERS: THEIR LIVES AND LITERATURE**
