PROCEEDINGS

OF THE

CAMBRIDGE PHILOSOPHICAL SOCIETY

VOL. XXIII

PART VIII

(WITH TITLE-PAGE, TABLE OF CONTENTS, AND INDEX TO VOL. XXIII)

CAMBRIDGE

AT THE UNIVERSITY PRESS

AND SOLD BY

DEIGHTON, BELL & CO., LIMITED,

AND BOWES & BOWES, CAMBRIDGE

CAMBRIDGE UNIVERSITY PRESS,

FETTER LANE, LONDON, E.C. 4

1927

October 1927.

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

NOTICES.

1. As the stock of early Parts of the *Transactions* and *Proceedings* of the Society is very unequal, the Council is obliged to require that no separate Parts of Volumes I—XI of the *Transactions*, or of Volumes I—XVI of the *Proceedings*, shall be sold without the authority of the Secretaries; to whom also enquiries concerning complete sets should be made.

Members of the Society having early Parts of the publications to dispose of, to add to the sets in the hands of the Society, are invited to communicate with the Secretaries.

2. Letters, and Communications to the Society, should be addressed to one of the Secretaries,

Mr F. P. WHITE, St John's College. [Mathematical]

Mr R. H. FOWLER, Trinity College. [Physical]

Mr F. T. BROOKS, Emmanuel College. [Biological]

Presents for the Library of the Society should be addressed to *The Philosophical Library, New Museums, Cambridge.*

3. Fellows and Honorary Members who desire the *Transactions* of the Society to be sent to them should communicate with the Secretaries if they do not receive the Numbers as they appear.

4. Authors of papers are informed that the Illustrations and Diagrams are executed as far as possible by photographic "process" work; drawings should be on a large scale and on smooth white Bristol board in Indian ink.

Authors may receive, on request, twenty-five offprints of a paper in the *Proceedings* or *Transactions*, without charge. Additional copies may be had by payment to the University Press.

5. *Members of the Society are particularly requested to inform the Secretaries of any change of postal address.*

CONTENTS

VOL. XXIII

PAGE

The stability of rotating masses of liquid; note to a former paper. By Professor H. F. BAKER 1

On the hypothesis of the obtuse angle. By Professor M. J. M. HILL, Peterhouse. (With Twenty-Six Text-figures) 2

On the substitution of Wallis's postulate of similarity for Euclid's postulate of parallels. Addendum. By Professor M. J. M. HILL, Peterhouse. (With Three Text-figures) 19

The reciprocation of one quadric into another. By Professor H. F. BAKER 22

Note on the pedal locus. By Mr J. P. GABBATT, Peterhouse . . . 28

On the series of forms of Jacobi's rotating liquid ellipsoid. By W. F. SEDGWICK, M.A., Trinity College 33

Periodic solutions of a linear differential equation of the second order with periodic coefficients. By Mr E. L. INCE, Trinity College . . 44

The second solution of the Mathieu equation. By Mr E. L. INCE, Trinity College 47

On a family of constructs in higher space. By C. G. F. JAMES, B.A., Trinity College. (With Two Text-figures) 50

The equianharmonic and harmonic envelopes of a quadrinodal cubic surface. By G. TIMMS, St John's College. (Communicated by Mr W. P. MILNE) 68

The adiabatic hypothesis for magnetic fields. By P. A. M. DIRAC, St John's College. (Communicated by Mr R. H. FOWLER) . . 69

A photographic method of determining the mobility of recoil atoms. By G. H. BRIGGS. (Communicated by Dr J. CHADWICK.) (With One Text-figure and Plate I) 73

The quenching of resonance radiation and the breadths of absorption-lines. By R. W. DITCHBURN, B.A., Trinity College 78

Notes on the electrical counter. By K. G. EMELÉUS, B.A., St John's College. (Communicated by Mr E. V. APPLETON.) (With Three Text-figures) 85

On chains of two-two relations and the theory of elliptic functions. By Professor H. F. BAKER 92

On a group of 1440 birational transformations of four variables that arises in considering the projective equivalence of double sixes. By Mr W. BURNSIDE, Honorary Fellow of Pembroke College . . 103

The general (m, n) correspondence. By R. VAIDYANATHASWAMY. (Communicated by Mr H. W. TURNBULL) 109

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

PAGE

The stability of a strut under thrust, when buckling is resisted by a force proportional to the displacement. By S. GOLDSTEIN, B.A., St John's College. (With One Text-figure) 120

Insular gravity and oceanic isostasy. By Sir JOSEPH LARMOR, Lucasian Professor. 130

A contribution to the theory of ferromagnetism. By G. S. MAHAJANI, B.A., St John's College 136

Over-tension in a condenser battery during a sudden discharge. By P. KAPITZA, Ph.D., Fellow of Trinity College, Assistant Director of Magnetic Research at the Cavendish Laboratory, Clerk Maxwell Student of Cambridge University. (With One Text-figure and Plate II). 144

The period of decay of radium B and radium C. By P. BRACELIN. (Communicated by Dr J. CHADWICK) 150

On the diurnal variation of ultra-short wave wireless transmission. By Mr E. V. APPLETON, St John's College. (With Three Text-figures) 155

The influence of an illuminated mercury surface on the Franck-Hertz reactions. By HERBERT SIM HIRST, Trinity College. (Communicated by Mr E. K. RIDEAL.) (With One Text-figure) . . . 162

The behaviour of the centres of activity of saturated surfaces during the initial stages of unimolecular reactions. By F. H. CONSTABLE, B.A., Fellow of St John's College. (With Two Text-figures) . . . 172

Metallic complexes with the aliphatic poly-amines. By Dr F. G. MANN and Prof. Sir WILLIAM J. POPE. (With One Text-figure) . . 183

Oxidations on charcoal. By Miss W. M. WRIGHT. (Communicated by Mr E. K. RIDEAL) 187

The problem of relativity in reference to several bodies. By Mr R. HARGREAVES, St John's College 191

Relativity in connexion with axial rotation. By Mr R. HARGREAVES, St John's College 198

Sur la non-existence simultanée de deux fonctions de Mathieu. Par Ż. MARKOVIĆ. (Communicated by Mr E. L. INCE) . . . 203

On the higher singularities of plane algebraic curves. By Miss C. A. SCOTT. (Communicated by Mr F. P. WHITE.) (With One Text-figure) 206

The (2, 1) correspondence. By R. VAIDYANATHASWAMY. (Communicated by Mr H. W. TURNBULL) 233

Integral invariants of the affine field. By Mr M. H. A. NEWMAN, St John's College 262

An approximation to the motion of two rotating electrical doublets in a plane. By P. A. TAYLOR, B.A., Emmanuel College. (With Two Text-figures) 269

A theory of the action of X-rays on living cells. By J. A. CROWTHER, Sc.D., St John's College. (With One Text-figure) 284

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

PAGE

On the attenuation of wireless signals in short distance overland transmission. By J. A. RATCLIFFE, B.A. and M. A. F. BARNETT. (Communicated by Mr E. V. APPLETON.) (With Five Text-figures) 288

Some relations between the optical spectra of different atoms of the same electronic structure. II. *Aluminium-like and copper-like atoms.* By Mr D. R. HARTREE, Fellow of St John's College . . . 304

On the quantum theory of vibration-rotation bands. By J. R. OPPENHEIMER. (Communicated by Mr R. H. FOWLER) 327

The elliptic products of Jacobi and the theory of linear congruences. By Major P. A. MACMAHON 337

On Mellin's inversion formula. By Mr J. C. BURKILL, Trinity College . 356

Note on the extension to higher space of a theorem of Wallace. By Mr J. P. GABBATT, Peterhouse 361

A mathematical theory of natural and artificial selection. Part III. By Mr J. B. S. HALDANE, Trinity College 363

The summation of a Fourier integral of finite type. By Mr S. POLLARD, Trinity College 373

On the descriptive form of Taylor's theorem. By Mr S. POLLARD, Trinity College 383

The correspondence between lines in threefold space and points of a quadric fourfold in fivefold space, established by a geometrical construction. By Mr T. L. WREN, St John's College . . . 386

On some resistance properties of a certain network containing inductances and capacities and their analogies in a vibrating mechanical system. By Mr E. B. MOULLIN, Downing College. (Communicated by Dr G. F. C. SEARLE.) (With Seven Text-figures) 391

The polarisabilities of atomic cores. By BERTHA SWIRLES, Yarrow Research Student, Girton College. (Communicated by Mr R. H. FOWLER.) (With Two Text-figures) 403

On quantum algebra. By Dr P. A. M. DIRAC, St John's College. (Communicated by Mr R. H. FOWLER) 412

An optical illusion due to contrast. By Mr G. P. THOMSON, Corpus Christi College. (With One Text-figure and Plate III) . . . 419

On the quantum theory of the problem of the two bodies. (Preliminary Communication.) By Mr J. R. OPPENHEIMER. (Communicated by Mr R. H. FOWLER) 422

On the stability of copper catalysts produced by thermal decomposition. By Dr F. H. CONSTABLE, Fellow of St John's College . . . 432

Note on the velocity of gas-reactions. By Mr J. A. CHRISTIANSEN, of the University of Copenhagen. (Communicated by Mr R. H. FOWLER) 438

Improvements in the apparatus for measuring the velocity of very rapid chemical reactions. II. By Dr H. HARTRIDGE, Fellow of King's College, Cambridge, and Dr F. J. W. ROUGHTON, Fellow of Trinity College, Cambridge. (With Five Text-figures) 450

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

PAGE

Note on the Petzval optical condition. By Mr G. C. Steward, Gonville and Caius College. (With One Text-figure) 461

Maxwell's law, and the absorption and emission of radiation. By Mr E. A. Milne, Trinity College 465

On compressional waves in two superposed layers. By Mr Harold Jeffreys, St John's College 472

Proceedings at the meetings held during the session 1925—1926 . . . 482

Statement of Accounts of the Cambridge Philosophical Society, from January 1, 1925, to December 31, 1925 490

Geodetic and dynamical principles, a comparison and connexion. By Mr R. Hargreaves, St John's College 493

On the figure of Pappus' theorem. By Mr C. V. Hanumanta Rao, Trinity College. (Communicated by Professor H. F. Baker) . 496

On a group of order 25920 *and the projective transformations of a cubic surface.* By Mr W. Burnside, Pembroke College 498

The Compton effect in wave mechanics. By Dr P. A. M. Dirac, St John's College 500

On the polarisation of mercury lines emitted from a discharge tube in a magnetic field. By Dr H. W. B. Skinner, Trinity College. (With Three Text-figures) 508

Note on the effect of alpha particles on paraffin. By William T. Richards, Ph.D. (Communicated by Prof. Sir E. Rutherford.) (With Two Text-figures) 516

The application of the method of the magnetic spectrum to the study of secondary electronic emission. By C. F. Sharman, B.A., King's College. (Communicated by Prof. Sir E. Rutherford.) (With Four Text-figures) 523

Some investigations of gas discharges by means of an exploring electrode. By Dr K. G. Emeléus, St John's College. (Communicated by Mr E. V. Appleton.) (With Three Text-figures) 531

The calculation of atomic fields. By L. H. Thomas, B.A., Trinity College. (With One Text-figure) 542

The tensile deformation of large aluminium crystals at crystal boundaries. By R. L. Aston, M.Sc., Barker Graduate Scholar of the University of Sydney, Dominion Exhibitioner of Trinity College. (Communicated by Mr G. I. Taylor.) (With Nine Text-figures and Plate IV) 549

Some developments in the X-ray analysis of single crystals. By R. L. Aston, M.Sc., Barker Graduate Scholar of the University of Sydney, Dominion Exhibitioner of Trinity College. (Communicated by Mr G. I. Taylor.) (With Eleven Text-figures) 561

Contribution to the theory of the diffusion pump. By L. Wertenstein, D.Sc., Professor of Radiology at the Free-University, Warsaw. (Communicated by Professor Sir E. Rutherford.) (With One Text-figure) 578

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

PAGE

On the addition of the primary aberrations. By Mr G. C. STEWARD, Gonville and Caius College 584

The absorption spectra of "saturated" and "unsaturated" organic substances. By Mr J. E. PURVIS. (With One Text-figure) . . 588

Surface adsorption and the velocity of chemical action at gas-solid interfaces. By Dr F. HURN CONSTABLE, Fellow of St John's College. (With Three Text-figures) 593

A mathematical theory of natural and artificial selection. Part IV. By Mr J. B. S. HALDANE, Trinity College 607

What determines the resistance and the tilt of an aeroplane? By Sir JOSEPH LARMOR, Lucasian Professor. (With One Text-figure) . 617

The pedal (3, 2) *correspondence.* By R. VAIDYANATHASWAMY. (Communicated by Mr H. W. TURNBULL) 631

Lines and planes in a metrical space. By W. HUNTER, B.A., Trinity College. (Communicated by Mr S. POLLARD.) (With Four Text-figures) 653

Note on Ramanujan's arithmetical function $\tau(n)$. By Mr G. H. HARDY, Trinity College 675

Notes on the theory of series (III): *On the summability of the Fourier series of a nearly continuous function.* By Mr G. H. HARDY and Mr J. E. LITTLEWOOD, Trinity College 681

The evaluation of Gibbs' phase-integral for imperfect gases. By H. D. URSELL, Trinity College. (Communicated by Mr R. H. FOWLER). 685

The limits of classical scattering. By P. M. S. BLACKETT, M.A., Fellow of King's College 698

On Herschel's condition and the optical cosine law. By Mr G. C. STEWARD, Gonville and Caius College. (With One Text-figure) . 703

The effect of the orbital velocity of the electrons in heavy atoms on their stopping of α-particles. By L. H. THOMAS, B.A., Trinity College. (With One Text-figure) 713

The absolute intensities of the γ-rays of radium B and radium C. By C. D. ELLIS, Ph.D., Trinity College, and W. A. WOOSTER, B.A., Peterhouse 717

An experiment on the stability of superposed streams of fluid. By Mr G. I. TAYLOR, Trinity College. (With One Text-figure) . . 730

The stopping power of hydrogen atoms for α-particles according to the new quantum theory. By J. A. GAUNT, B.A., Trinity College. (Communicated by Mr R. H. FOWLER.) (With One Text-figure) . 732

A case of distinction between Fourier integrals and Fourier series. By MARGARET ELEANOR GRIMSHAW, Newnham College. (Communicated by Mr S. POLLARD) 755

Wave propagation in strings with continuous and concentrated loads. By Mr HAROLD JEFFREYS, St John's College 768

On the fifth book of Euclid's Elements. (Second Addendum to Fifth Paper.) Proof of Euclid v, 19. By Dr M. J. M. HILL, Peterhouse 779

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

PAGE

Some measurements on the absorption of X-rays of long wave-length. By L. H. MARTIN, M.Sc., Trinity College. (Communicated by Prof. Sir E. RUTHERFORD.) (With Two Text-figures) . . . 783

The total energy of binding of a heavy atom. By Mr E. A. MILNE, Trinity College 794

The Hall effect in single crystals of iron. By Dr W. L. WEBSTER, Trinity College. (Communicated by Dr KAPITZA.) (With One Text-figure) 800

Excitation by high velocity electrons. By Mr E. G. DYMOND, Fellow of St John's College. (With Two Text-figures) 804

A valve amplifier for ionisation currents. By C. E. WYNN-WILLIAMS, Trinity College. (Communicated by Prof. Sir E. RUTHERFORD.) (With Four Text-figures) 811

The production of characteristic X-rays by electronic impact. By L. H. THOMAS, B.A., Trinity College. (With One Text-figure) . 829

On the effect of continued small additions of poisonous substances on the velocity of gaseous catalytic reaction in closed vessels. By Dr F. HURN CONSTABLE, Fellow of St John's College . . . 832

A mathematical theory of natural and artificial selection, Part V: Selection and mutation. By Mr J. B. S. HALDANE, Trinity College 838

A theorem of Dr P. Zeeman. By Mr J. H. GRACE, Peterhouse . . 845

The pedal planes of a tetrahedron. By Mr J. H. GRACE, Peterhouse 853

An illustration of the space representation of circles. By Mr J. H. GRACE, Peterhouse 859

On the generalizations of the theorems of Parseval and Riesz-Fischer. By Mr S. POLLARD, Trinity College 865

Summation of the integral conjugate to the Fourier integral of finite type. By MARGARET ELEANOR GRIMSHAW, Newnham College. (Communicated by Mr S. POLLARD) 871

Simplexes and other configurations upon a rational normal curve. By Mr F. P. WHITE, St John's College 882

The specific heat of carbon dioxide and the form of the CO_2 molecule. By W. H. M^{c}CREA, B.A., Trinity College. (Communicated by Mr R. H. FOWLER.) (With Two Text-figures) 890

Eddy currents in thin circular cylinders of uniform conductivity, due to periodically changing magnetic fields, in two dimensions. By Dr F. W. CARTER, St John's College. (Communicated by Mr F. P. WHITE) 901

The relation between refractive index and density. By D. BURNETT, B.A., Clare College 907

On the distribution of the error of an interpolated value, and on the construction of tables. By Dr R. A. FISHER, Gonville and Caius College, and J. WISHART 912

https://doi.org/10.1017/S0305004100013670 Published online by Cambridge University Press

PAGE

A differential retarding potential method for the study of the energy distribution of slow electron emissions. By C. F. SHARMAN, B.A., King's College. (Communicated by Prof. Sir E. RUTHERFORD.) (With Five Text-figures) 922

The emission of radiation by a quadripole electric moment on the quantum mechanics. By J. A. GAUNT, B.A., Trinity College, and W. H. M^{c}CREA, B.A., Trinity College 930

The amount of energy emitted in the γ-ray form by radium E. By G. H. ASTON, B.A., Trinity Hall. (Communicated by Prof. Sir E. RUTHERFORD.) (With One Text-figure) 935

The specific heat of water vapour and the theory of the dissociation of water vapour at high temperatures. By W. H. M^{c}CREA, B.A., Trinity College. (With One Text-figure) 942

A case of double reflexion. By E. T. S. APPLEYARD, B.A., King's College, and Dr H. W. B. SKINNER, Trinity College. (With One Text-figure) 951

A convenient method of distillation of the alkali metals. By R. J. CLARK, Lecturer in Physics and Carnegie Teaching Fellow in the University of Edinburgh. (Communicated by Prof. Sir E. RUTHERFORD.) (With One Text-figure) 953

A rapid mercury still. By R. J. CLARK, Lecturer in Physics and Carnegie Teaching Fellow in the University of Edinburgh. (Communicated by Prof. Sir E. RUTHERFORD.) (With Three Text-figures) 956

Notes on spectrophotometry. By R. W. DITCHBURN, B.A., Trinity College, Isaac Newton Student. (With Seven Text-figures) 959

The absorption and reduction in velocity of β-rays on their passage through matter. By Dr E. MADGWICK, M.C., Emmanuel College. (Communicated by Prof. Sir E. RUTHERFORD.) (With Nine Text-figures) 970

The β-ray spectrum of Ra E. By Dr E. MADGWICK, M.C., Emmanuel College. (Communicated by Prof. Sir E. RUTHERFORD.) (With One Text-figure) 982

Proceedings at the meetings held during the session 1926—1927 . . 985

Statement of Accounts of the Cambridge Philosophical Society, from January 1, 1926, to December 31, 1926 994

Index to Vol. XXIII 996
