

## JFQA Style Requirements

Submit manuscripts online at [www.jfqa.org](http://www.jfqa.org). Manuscripts must be double-spaced and single-sided on 8.5" × 11" paper. The cover page must show title, author name(s) and affiliation(s), e-mail address(es), and work phone number(s). The first page of text should include the title and a one-paragraph abstract of no more than 100 words. All sections of the paper, beginning with the introduction and ending with a conclusion or summary, must be numbered with Roman numerals. Subsection headings must be lettered A, B, C, etc.

The manuscript should explain its relation to other research in the field, especially recently published material. References cited in the text should be noted by the last name(s) of the author(s) followed by the publication year enclosed in parentheses without punctuation: Smith (1988). When a particular page, section, or equation is referred to, the reference also should be placed within parentheses: (Smith and Jones (1988), p. 222), (Green (1988a), eq. 3).

Lengthy mathematical proofs and extensive tables should be placed in an appendix or omitted from the manuscript entirely. In the latter case, the author may indicate in a footnote that proofs or tables are available from the author. The author should make every effort to explain the meaning of mathematical proofs.

The author should check the manuscript for clarity, grammar, spelling, and punctuation to minimize editorial changes and the necessity of extensive corrections at the proof stage. All abbreviations must be defined.

*Equations.* All but very short mathematical expressions should be displayed on a separate line and centered. Important displayed equations must be identified by consecutive Arabic numerals in parentheses on the left. Expressions should be aligned, and subscripts and superscripts clearly marked to avoid confusion.

*Tables.* Each table must be titled and numbered consecutively with Arabic numerals. Please check the text to make sure there is a reference to each table. General footnotes should be marked a, b, c, etc., for specific footnotes. Asterisks \* or \*\* indicate significance at the 5% and 1% levels, respectively. The author should check tables to be sure that totals are correct and that the title, column headings, and footnotes clearly explain the content of the table. If tables are on separate pages at the end of the article, indicate approximate placement within the text.

*Figures.* Figures must be titled and numbered consecutively with Arabic numerals. Captions should present sufficient information to describe the purpose of the figure. Figures for accepted manuscripts must be of professional quality and ready for reproduction.

*Footnotes.* Footnotes must be double-spaced. Footnotes must not be used for the purpose of citation. Footnotes with extensive content should be avoided.

*References.* All works cited in the text must be alphabetically arranged in a double-spaced list at the end of the manuscript. Examples:

Brown, S., and J. Warner. "Using Daily Stock Returns: The Case of Event Studies." *Journal of Financial Economics*, 14 (1985), 1–31.

Ross, S. A. "Return Risk and Arbitrage." In *Risk and Return in Finance*, Vol. I, I. Friend and J. L. Bicksler, eds. Cambridge, MA: Ballinger (1977).

Titman, S.; K. C. Wei; and F. Xie. "Capital Investments and Stock Returns." *Journal of Financial and Quantitative Analysis*, 39 (2004), 677–700.

New Series!

## *International Series on Actuarial Science*

*New in Paperback in November!*

Insurance Risk and Ruin

DAVID C. M. DICKSON

“A clear, concise and well written text-book on two daunting actuarial areas... The exposition is so clear that it feels like [the author is] talking to you...”

This is an excellent book equally suitable for self-study and classroom instruction. It is highly recommended as supplementary reading for students studying for their professional exams and as an overview of the latest developments in risk models, ruin theory and reinsurance for practitioners.”

–*Annals of Actuarial Science*

\$86.00: Hardback: 978-0-521-84640-0: 242 pp.

\$48.00: Paperback: 978-0-521-17675-0

Regression Modeling with Actuarial and Financial Applications

EDWARD W. FREES

This book provides actuarial and finance students with a foundation in multiple regression and time series, along with a discussion of advanced statistical topics that are relevant to actuarial and financial practice. It uses statistical techniques to analyze real data in risk management and finance. No specific knowledge of these areas is presumed.

\$146.99: Hardback: 978-0-521-76011-9: 584 pp.

\$55.00: Paperback: 978-0-521-13596-2

Actuarial Mathematics for Life Contingent Risks

DAVID C. M. DICKSON,  
MARY R. HARDY,  
HOWARD R. WATERS

A modern perspective on life contingencies that uses the powerful framework of multiple state models to develop and demonstrate a theory that can be adapted to changing products and technologies. Balancing rigor and intuition, and emphasizing applications, this modern text is ideal for university courses and actuarial exam preparation.

\$65.00: Hardback: 978-0-521-11825-5: 510 pp.

*Prices subject to change.*

Nonlife Actuarial Models Theory, Methods and Evaluation

YIU-KUEN TSE

Preface; Notation and convention; Part I. Loss Models: 1. Claim-frequency distribution; 2. Claim-severity distribution; 3. Aggregate-loss models; Part II. Risk and Ruin: 4. Risk measures; 5. Ruin theory; Part III. Credibility: 6. Classical credibility; 7. Bühlmann credibility; 8. Bayesian approach; 9. Empirical implementation of credibility; Part IV. Model Construction and Evaluation: 10. Model estimation and types of data; 11. Nonparametric model estimation; 12. Parametric model estimation; 13. Model evaluation and selection; 14. Basic Monte Carlo methods; 15. Applications of Monte Carlo methods; Appendix. Review of statistics; Answers to exercises; References; Index.

\$65.00: Hardback: 978-0-521-76465-0: 540 pp.

# Foster School of Business

---

UNIVERSITY *of* WASHINGTON

The Foster School of Business seeks to hire a qualified candidate for a full-time tenure track position as an assistant or associate professor in finance to start in Autumn Quarter 2011. We will consider new Ph.D. graduates (or those near degree completion) as well as current assistant or associate professors with very strong records. All candidates should send a cover letter indicating research and teaching interests, a curriculum vitae, and at least three letters of recommendation. Applicants should also submit examples of recently published or unpublished research. Priority will be given to applications received by December 3, 2010. All applications should be sent to:

*Professor Lawrence D. Schall, Chair  
c/o Andrew Anderson*

*Department of Finance and Business Economics, UW Box 353226  
Foster School of Business at the University of Washington  
Seattle, WA 98195-3226*

The University of Washington is an affirmative action, equal opportunity employer. The University is building a culturally diverse faculty and staff and strongly encourages applications from women, minorities, individuals with disabilities and covered veterans. Questions regarding this position may be sent to [finance@u.washington.edu](mailto:finance@u.washington.edu).

University of Washington Faculty engage in teaching, research and service. Employment at the University of Washington is contingent upon budgetary approval.
