

## ABSTRACTS OF COMMUNICATIONS

University of Leeds

21/22 NOVEMBER 1991

- Basal metabolic rate and fuel oxidation rates in chronic obstructive pulmonary disease. *J. H. Green, P. N. Bramley & M. F. Muers* 94A
- Nutrition team audit. *C. E. Plester, K. C. H. Fearon, R. Richardson, P. Rogers, C. Sedgwick, J. McWhirter, H. Reddy & O. J. Garden* 95A
- Infection with human immunodeficiency virus does not prevent the acute anabolic response to nutrition. *D. C. Macallan, M. A. McNurlan, P. J. Garlick & G. E. Griffin* 96A
- The independent metabolic effects of anaesthesia and surgery. *F. Carli, J. Webster & G. Ronzoni* 97A
- Metabolic responses to interleukin-1 (IL-1) are attenuated by dietary eicosapentaenoic (20:5 n-3) and docosahexaenoic (22:6 n-3) fatty acids in the rat. *A. L. Cooper, K. Weddell, T. A. B. Sanders & N. J. Rothwell* 98A
- Effect of Ibuprofen on the acute-phase response and whole-body protein turnover of weight-losing cancer patients. *T. Preston, K. C. H. Fearon, F. P. Winstanley, C. Slater, D. C. McMillan, A. Shenkin & O. J. Garden* 99A
- Lymphocyte protein synthesis: an in vivo measure of activation. *K. G. M. Park, S. D. Heys, O. Eremin & P. J. Garlick* 100A
- Effects of surgical trauma on muscle protein synthesis at local and distant sites. *A. Ghousain-Choueiri & P. W. Emery* 101A
- The influence of respiratory quotient and serum lipid levels on thermic effect of continual enteral nutrition. *L. Sobotka, Z. Zadak & J. Chaloupka* 102A
- Plasma amino acids and peptiduria during intravenous infusion of a short-chain ovalbumin hydrolysate, or its equivalent amino acid (AA) mixture, in man. *G. K. Grimble, P. C. Aimer, P. Morris, A. Raimundo, B. Weryk & D. B. A. Silk* 103A
- The effect of alanyl-glutamine peptide supplementation on muscle protein synthesis in post-surgical patients receiving glutamine-free amino acids intravenously. *J. M. Barua, E. Wilson, S. Downie, B. Weryk, A. Cuschieri & M. J. Rennie* 104A
- Glutamine promotes interleukin-2 production by concanavalin A-stimulated lymphocytes. *P. C. Calder & E. A. Newsholme* 105A
- Glutamine increases protein synthesis in heart, skeletal muscle, liver and gut of dexamethasone-treated rats. *P. W. Watt, H. S. Hundal, S. Downie & M. J. Rennie* 106A
- Effects of major and minor surgery on plasma glutamine and cytokine concentrations. *M. Parry-Billings, E. A. Newsholme, R. Baigrie, P. M. Lamont & P. J. Morris* 107A
- Evidence for tumour-induced changes in basal metabolic rate in patients with small cell lung cancer. *Susan A. Jebb, R. J. Osborne, A. K. Dixon & M. Elia* 108A
- A multi-tracer investigation of the effect of a flooding dose administered during the constant infusion of tracer amino acid on the rate of tracer incorporation into human muscle protein. *K. Smith, P. Essen, M. A. McNurlan, M. J. Rennie, P. J. Garlick & J. Wernerman* 109A
- Correlation of albumin synthesis rates with the Child-Turcotte score (CTS) in patients with cirrhosis of the liver. *P. E. Ballmer, D. Walshe, M. A. McNurlan, P. W. Brunt & P. J. Garlick* 110A
- Insulin reduces leucine oxidation and improves nitrogen balance in the parenterally-fed state. *B. C. N. Ang, D. Halliday, A. J. Wade & J. Powell-Tuck* 111A
- Growth, nitrogen retention and peptiduria in TPN-fed rats receiving short-chain protein hydrolysates. *G. K. Grimble, A. K. Wennberg, L. Magnusson, P. C. Aimer, P. Morris & D. B. A. Silk* 112A
- The cytokine response to abdominal sepsis. *D. J. Leinhardt, G. L. Carlson, W. R. Lamb, P. E. C. Brenchley, R. A. Kay, K. A. Shipley & M. Mughal* 113A
- Changes in tissue protein distribution in the rat after sequential injections of turpentine. *Monica Wusteman & Marinos Elia* 114A
- Absence of hypermetabolism following operation in the newborn infant. *L. K. R. Shanbhouge & D. A. Lloyd* 115A
- The effect of n-3 and n-6 polyunsaturated fatty acids on the T-cell function of healthy controls and weight-losing pancreatic cancer patients. *J. S. Falconer, K. C. H. Fearon & J. A. Ross* 116A
- Measurement of whole-body protein turnover using [<sup>15</sup>N]-glycine as tracer fails to demonstrate changes in response to hyperinsulinaemia in post-absorptive man. *B. C. N. Ang, A. J. Wade, D. Halliday & J. Powell-Tuck* 117A
- Bed rest decreases whole-body protein turnover in the post-absorptive state. *B. C. N. Ang, D. Halliday, S. Georgiannos & J. Powell-Tuck* 118A
- Augmentation of plasma arginine and glutamine by ornithine  $\alpha$ -ketoglutarate in healthy, enterally-fed volunteers. *G. K. Grimble, C. Coudray-Lucas, J. J. Payne-James, L. Cynober, F. Ziegler & D. B. A. Silk* 119A
- In vivo and in vitro assimilation of orally-administered dextran 40KDa in man. *G. K. Grimble, S. C. Collins & D. B. A. Silk* 120A
- Ileal starch output in two groups of differing colonic cancer risk. *D. M. Bradburn, J. C. Mathers, A. Gunn, J. Burn & I. D. A. Johnston* 121A
- Changes in feeding behaviour in cachectic tumour-bearing rats during the period of tumour growth. *O. A. Obeid & P. W. Emery* 122A
- The effect of chronic dietary restriction on post-prandial glycogen and lipid synthesis in the rat. *T. T. A. Carpenter, O. A. Obeid & P. W. Emery* 123A
- Can energy expenditure be measured in critical illness using [<sup>13</sup>C]-labelled bicarbonate? *J. C. Devlin, Lynn Newman, S. T. Brookes, Therese A. Samuels, Ceri J. Green & I. T. Campbell* 124A
- Anthropometric indices of lean body mass using ultrasound. *Tracey Watt, D. Withers, D. Martin & I. T. Campbell* 125A
- Daily body-weight changes in critical illness. *Irene Hall, B. J. Pollard & I. T. Campbell* 126A
- The use of a four-component model for evaluation of the density and the hydration fraction of fat-free mass, and for validation of bedside prediction methods of body composition. *N. J. Fuller, S. A. Jebb, M. A. Laskey, W. A. Coward & M. Elia* 127A
- Low incremental workload cycle ergometry during in-patient nutritional treatment of patients with anorexia nervosa. *R. Das Gupta, J. Powell-Tuck, A. J. Wade, J. Treasure & A. W. Goode* 128A

## CONTENTS

### SYMPOSIUM PROCEEDINGS

	PAGE
<i>University of Edinburgh</i> 27-30 AUGUST 1991 <b>IMPACT OF DIET ON DEVELOPMENT</b> <i>Chairmen: J. BASSETT, University of Oxford</i> <i>C. KNIGHT, Hannah Research Institute, Ayr</i>	
The effect of nutrition of the fetus and neonate on cardiovascular disease in adult life. <i>D. J. P. Barker</i>	135-144
Food and biological clocks. <i>Brian Wharton</i>	145-153
Breast and gut: the relationship between lactating mammary function and neonatal gastrointestinal function. <i>Lawrence T. Weaver</i>	155-163
Maternal and environmental influences on thermoregulation in the neonate. <i>M. E. Symonds &amp; M. A. Lomax</i>	165-172
Diet effects on enterocyte development. <i>Michael W. Smith</i>	173-178
 <i>University of Edinburgh</i> 27-30 AUGUST 1991 <b>MICRONUTRIENT TRANSPORT PROCESSES</b> <i>Chairman: I. BREMMER, Rowett Research Institute, Aberdeen</i>	
Tocopherol transport and absorption. <i>William Cohn, Peter Gross, Hugo Grun, Francine Loechleiter, David P. R. Muller &amp; Martin Zulauf</i>	179-188
The transport of vitamin C and effects of disease. <i>C. J. Schorah</i>	189-198
The transport of iron and copper across the cell membrane: different mechanisms for different metals? <i>Harry J. McArdle</i>	199-209
Dose dependence of zinc and manganese absorption in man. <i>Brittmarie Sandström</i>	211-218
Folate-vitamin B <sub>12</sub> interrelationships in the central nervous system. <i>John M. Scott</i>	219-224
 <i>University of Edinburgh</i> 27-30 AUGUST 1991 <b>CYSTIC FIBROSIS</b> <i>Chairman: B. WHARTON</i>	
Nutrition in cystic fibrosis: a historical overview. <i>John A. Dodge</i>	225-235
Energy metabolism in cystic fibrosis. <i>A. O'Rawe</i>	237-244
Fat soluble vitamins in cystic fibrosis. <i>Rosemary J. Rayner</i>	245-250

### THE SIR DAVID CUTHBERTSON MEDAL LECTURE 1991

<i>University of Leeds</i> 21/22 NOVEMBER 1991	
The mechanisms and treatment of weight loss in cancer. <i>Kenneth C. H. Fearon</i>	251-265

### SYMPOSIUM PROCEEDINGS

<i>University of Leeds</i> 21/22 NOVEMBER 1991 <b>METABOLIC RESPONSE TO SEVERE ILLNESS</b> <i>Chairman: A. FLECK</i>	
Modulating the metabolic response to injury and infection. <i>Stephen F. Lowry</i>	267-277
The metabolic response to cancer. <i>Johan Gelin &amp; Kent Lundholm</i>	279-284
Dietary manipulation of the inflammatory response. <i>Robert F. Grimble</i>	285-294
