SUB-PATENT INNOVATION RIGHTS

This ground-breaking work delves into the world of sub-patent intellectual property rights, exploring utility model and similar protection offered by over 100 countries worldwide. Drawing on the expertise of leading scholars from around the globe, this volume provides a comprehensive analysis of sub-patent protection systems, comparing and contrasting statutory frameworks, registration requirements, corporate strategies, and litigation tactics. The book also highlights current policy debates surrounding these systems, including their potential to promote local innovation and economic development, proposals for cross-border harmonization, and their interaction with increasingly integrated litigation systems. This book is an invaluable resource for scholars, attorneys, historians, economists, and anyone dealing with complex international intellectual property matters. This title is also available as Open Access on Cambridge Core.

Jorge L. Contreras, the James T. Jensen Endowed Professor for Transactional Law at the University of Utah S.J. Quinney College of Law, is an internationally recognized expert on intellectual property law and practice. He is the author or editor of twelve prior books and more than 150 scholarly book chapters and articles. Before entering academia, he was a partner at a major international law firm where he practiced transactional intellectual property law in Boston, Washington, DC, and London.

Sub-patent Innovation Rights

UTILITY MODELS, PETTY PATENTS AND INNOVATION PATENTS AROUND THE WORLD
