## BIOGRAPHICAL NOTICES

A full account of Corner's publications and life will appear in a special volume based on the Corner/Stone symposium held in Kuala Lumpur in July 1998 and organized by the Flora Malaysiana Committee. In that work, the tremendous contributions Corner made to our understanding of tropical plants and basidiomycetes is dramatically demonstrated. An almost complete bibliography up to 1976 was published in the *Gardens' Bulletin Singapore* **29**: 4–11 (1977); Mabblerley (1999) brings that listing up to date. See also the personal reflections in Corner (1981, 1992b, 1993).

## SUDDEN DEATH OF BMS PRESIDENT, STEPHEN MOSS

It is with deep regret that we announce the sudden, tragic, and unexpected death of Dr Stephen Moss, President of the British Mycological Society for 2001–2002. Stephen, aged 58 years, died at his home in Portsmouth on Friday 26 October 2001. He was a caring and conscientious person who dedicated his

life to mycology, and in particular the Society, throughout his career. Our thoughts are with his wife Jan and all the family at this difficult time. A full obituary will appear in a future issue of *Mycological Research*.
