VOL. LXIII

1947-1949

PUBLISHED BY
OLIVER & BOYD
EDINBURGH: TWEEDDALE COURT
LONDON: 98 GREAT RUSSELL STREET, W.C. 1
1950

CONTENTS

NO.	PAGE
*1. An Experiment in Marine Fish Cultivation: I. Introduction. By F. Gross, Dr.Phil., Department of Zoology, University of Edinburgh. Issued separately November 19, 1947,	I
*2. An Experiment in Marine Fish Cultivation: II. Some Physical and Chemical Conditions in a Fertilized Sea-loch (Loch Craiglin, Argyll). By A. P. Orr, M.A., D.Sc., Marine Station, Millport. <i>Communicated by</i> Professor James Ritchie, D.Sc. (With Nineteen Text-figures.) Issued separately November 19, 1947,	3
*3. An Experiment in Marine Fish Cultivation: III. The Plankton of a Fertilized Loch. By Sheina M. Marshall, D.Sc. <i>Communicated by</i> Professor James Ritchie, D.Sc. (With Seven Text-figures.) Issued separately November 19, 1947,	21
*4. An Experiment in Marine Fish Cultivation: IV. The Bottom Fauna and the Food of Flatfishes in a Fertilized Sea-loch (Loch Craiglin). By J. E. G. Raymont, B.Sc., A.M., Department of Zoology, University of Edinburgh. <i>Communicated by</i> Professor James Ritchie, D.Sc. (With Seven Text-figures.) Issued separately November 19, 1947,	34
*5. An Experiment in Marine Fish Cultivation: V. Fish Growth in a Fertilized Sea-loch (Loch Craiglin). By F. Gross, Dr.Phil., Department of Zoology, University of Edinburgh. <i>Communicated by</i> Professor James Ritchie, D.Sc. (With Two Plates and Eleven Text-figures.) Issued separately November 19, 1947,	56
*6. Some Basaltic Rocks from West Greenland. By H. I. Drever and D. F. Livingstone. (With One Plate and Nine Text-figures.) Issued separately December 18, 1948,	97
*7. Monazite from Bodmin Moor, Cornwall: A Study in Geochronology. Part I. Monazite as a Geological Timekeeper. By Arthur Holmes, D.Sc., F.R.S., University of Edinburgh. Part II. Analysis of Bodmin Moor Monazite for Lead, Thorium and Uranium. By A. A. Smales, B.Sc., A.R.I.C., Imperial Chemical Industries Limited, Billingham Division, Research Department, Billingham, Co. Durham. (With Two Plates and Three Text-figures.) Issued separately December 18, 1948,	115
8. Variation in Shape of Shell with Respect to Ecological Station. A Review dealing with Recent Unionidæ and Certain Species of the Anthracosiidæ in Upper Carboniferous Times. By R. M. C. Eagar, B.A., Ph.D., F.G.S. <i>Communicated by</i> Professor H. Graham Cannon, F.R.S. (With Nine Text-figures.) Issued separately December 18, 1948,	130
*9. The Fall in the Fertility of Scottish Women during the Period 1875-1939: A Comparison of the Trends in Various Geographical Localities. By R. S. Barclay, B.Sc., Ph.D., and W. O. Kermack, M.A., D.Sc., LL.D., F.R.S. (With Six Text-figures.) Issued separately December 18, 1948,	149

NO.	PAGE
*10. An Apparatus for Following the Course of Gaseous Exchange by Living Tissue. By G. F. Asprey, B.Sc., Ph.D., Department of Botany, University of Aberdeen. <i>Communicated by</i> Professor J. Walton, M.A., D.Sc. (With Seven Text-figures.) Issued separately December 18, 1948,	163
*11. The Occurrence in the Uredinales of Species with Unstable Life-History. By Malcolm Wilson, D.Sc. From the Mycology Department, University of Edinburgh. Issued separately December 18, 1948,	177
12. Quantitative Evolution. XIV. Production Rates. By Professor James Small, Queen's University, Belfast. (With Four Text-figures.) Issued separately December 18, 1948,	188
13. A Comparative Study of the Cytoplasmic Components during the Oogenesis of Dog, Cat, and Rabbit. By I. Zlotnik, Ph.D., M.R.C.V.S., Department of Zoology, University of Edinburgh. <i>Communicated by</i> Dr R. A. R. Gresson. (With Three Plates and Four Text-figures.) Issued separately December 18, 1948,	200
*14. A Preliminary Investigation into the Use of <i>Xenopus laevis</i> as a Test Animal for Biological Assay of Chorionic Gonadotropin. By F. W. Landgrebe. From the Department of Public Health and Social Medicine, University of Edinburgh. <i>Communicated by</i> Professor F. A. E. Crew, F.R.S. (With One Text-figure.) Issued separately December 18, 1948,	213
*15. The Effect of Certain Factors on the Formation of Root Nodules on Pea Plants in Aseptic Culture. By Moira P. McGonagle, B.Sc., Ph.D., Botany Department, University of Glasgow. <i>Communicated by</i> Professor J. Walton, D.Sc., Sc.D. Issued separately September 29, 1949,	219
*16. The Heather Rhizomorph Fungus, <i>Marasmius androsaceus</i> Fries. By J. A. Macdonald, D.Sc., Ph.D., Botany Department, St Andrews University. (With One Plate and Fifteen Text-figures.) Issued separately September 29, 1949,	230
*17. Tests for a Possible Action of Ethylene Glycol on the Chromosomes of <i>Drosophila melanogaster</i> . By Subrata Bhattacharya, M.Sc., Ph.D.(Edin.). <i>Communicated by</i> Professor C. H. Waddington, F.R.S. Issued separately September 29, 1949,	242
*18. Studies on Reproduction in Wild-Type and Female-Sterile Mutants of <i>Drosophila melanogaster</i> (Meig). By R. A. Beatty, Genetics Laboratory, Animal Breeding and Genetics Research Organization, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, F.R.S. (With Five Text-figures.) Issued separately September 29, 1949,	249
*19. The Structure and Behaviour of <i>Hiatella gallicana</i> (Lamarck) and <i>H. arctica</i> (L.), with special reference to the Boring Habit. By W. Russell Hunter, B.Sc., F.G.S. From the Department of Zoology, University of Glasgow, and the Marine Biological Laboratory, Millport. <i>Communicated by</i> Professor C. M. Yonge, F.R.S. (With Twelve Text-figures.) Issued separately November 23, 1949,	271

NO.	PAGE
*20. Inheritance of Resistance to Blight (<i>Phytophthora infestans</i>) in Potatoes: Comparison of A and B Strains. By William Black, B.Sc., Ph.D., Scottish Plant Breeding Station, Corstorphine, Edinburgh. <i>Communicated by</i> William Robb, N.D.A. (With Two Text-figures.) Issued separately November 23, 1949,	290
*21. A Study of the Incidence, Distribution and Characteristics of Blood Spots and Miniature Eggs. By Ganpati Parshad Sharma, M.Sc., Ph.D. (Punjab), Ph.D. (Edinburgh), Poultry Research Centre, Edinburgh. <i>Communicated by</i> Dr A. W. Greenwood. (With Five Plates.) Issued separately November 23, 1949,	302
*22. The Autecology of Bracken (<i>Pteridium aquilinum</i> (L.) Kuhn): The Germination of the Spore, and the Development of the Prothallus and the Young Sporophyte. By Elsie Conway, B.Sc., Ph.D., Department of Botany, University of Glasgow. <i>Communicated by</i> Professor J. Walton and Professor K. W. Braid. (With Three Plates and Eight Text-figures.) Issued separately November 23, 1939,	325
*23. Life and Times of James Hutton. By Murray Macgregor, M.A., D.Sc., F.R.S.E., F.G.S. Issued separately February 6, 1950,	351
*24. James Hutton, Founder of Modern Geology. By Sir Edward B. Bailey, M.C., D.Sc., LL.D., F.R.S., F.G.S. Issued separately February 6, 1950,	357
*25. Hutton on Arran. By G. W. Tyrrell, A.R.C.Sc., D.Sc., F.R.S.E., F.G.S. Issued separately February 6, 1950	369
26. Note on the Original Publication of Hutton's <i>Theory of the Earth</i> , and on the Subsequent Forms in which it was Issued. By V. A. Eyles, B.Sc., F.R.S.E., F.G.S. Issued separately February 6, 1950,	377
27. James Hutton and the Philosophy of Geology. By S. I. Tomkeieff, D.Sc., F.R.S.E., F.G.S. Issued separately February 6, 1950,	387

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of the illustrations, tables, etc., in these papers.

INSTRUCTIONS TO AUTHORS (*continued*)

For fine pencil sketches, and line and wash sketches, the whitest base available should be used. The lightest tones or lines should be a little stronger than is desired in the reproduction, and the heavier tones strengthened in proportion, so that in reproduction the whole scale of tones may be adjusted to bring the base into its proper relationship. Otherwise a very light pencil line or a weak wash will not reproduce as a stronger tone than the base, but will merge with it and be lost. Fine pencil lines should be uniform throughout.

Drawings and photographic prints should be kept as clean as possible.

When the illustrations are to form plates, a scheme for the arrangement of the figures in Roy. 4to plates for the *Transactions*, and in Super Roy. 8vo for the *Proceedings*, must be given, and the figures numbered (and, when necessary, lettered).

Space available for figures and lettering in *Transactions*, $9\frac{1}{2}'' \times 7\frac{1}{2}''$.
" " " " *Proceedings*, $7\frac{1}{2}'' \times 4\frac{3}{4}''$.

A proof of each paper will be sent to the author, whose address should be given on the MS. The cost of corrections made in the proof should not exceed 5 per cent. of the printers' charges for the setting of each paper. The author may be charged with any excess.

The proof must, if possible, be returned within one week, addressed to *The Secretary, Royal Society of Edinburgh, 22 George Street, Edinburgh, 2, and not to the printer*. To prevent delay, an author residing abroad should appoint someone residing in this country to correct the proof.

As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies or reprints, in covers, bearing the title of the paper and the name of the author, are printed off and placed on sale. The date of such separate publication is printed on each paper.

Authors of papers will receive fifty reprints free, if they so desire; but in view of the strict necessity for economy in paper and printing, their attention is directed to the desirability of requesting only twenty-five gratis copies, where this number will meet their needs. Authors may have a reasonable number of additional reprints at a fixed scale of prices, which will be furnished by the printer, who will charge them with the cost. To prevent disappointment, especially if the paper contains plates, the author should, as soon as possible, notify to the Secretary the number of additional reprints required.

To facilitate the compilation of indexes, and to secure that due attention to the important points in a paper shall be given in General Catalogues of Scientific Literature and in Abstracts published by periodicals, each author is requested to return to the Secretary, together with the proof of his paper, a brief index (on the model given below) of the points in it which he considers new or important. These indexes will be edited by the Secretary and incorporated in separate index slips issued with each part of the *Transactions* and *Proceedings*.

MODEL INDEX

- Schäfer, E. A.—On the Existence within the Liver Cells of Channels which can be directly injected from the Blood-vessels. Proc. Roy. Soc. Edin., xxiv, 1902, 65-69.
