## Volume 15

Organized and edited by

**BEN DAWES**

Professor Emeritus, University of London, England

April 1977 x + 410 pp., \$17.50/\$34.25 0.12.031715.X

### Contents

Denys L. Hughes: Preface and tribute. David H. Molyneux: Vector relationships in the Trypanosomatidae. R. E. Purnell: East Coast fever: recent research in Africa. James C. Chubb: Seasonal occurrence of helminths in freshwater fishes. Part 1. Monogenea. David A. Erasmus: The host-parasite interface of trematodes. D. A. Denham and P. A. McGreevy: Brugian filariasis: epidemiological and experimental studies. M. A. Gemmel and P. D. Johnstone: Experimental epidemiology of hydatidosis and cysticercosis. Author index. Subject index.

### From reviews of previous volumes

*'The whole volume has grace and style. These reviews unlike many others are more than mere lists of facts, authors, and dates, crammed into the smallest possible space. They will be read widely, not only because no parasitologist can afford to ignore them, but also because their reading gives pleasure.'*

R. J. Terry in *Biologist*

*'The book is, as is the rule with the series edited by Professor Dawes, an excellently produced, illustrated and arranged volume, and all these articles will provide important stimuli for advance in their respective subjects.'*

W. H. R. Lumsden in *Tropical Diseases Bulletin*
