SUMMARY LIST

BREEDING AND GENETICS

- s01 Genetic approaches for rearing entire males
C Larzul, L Fontanesi, E Tholen, M van Son
- s02 Breeding against boar taint: Recent research activities within German pig breeding organizations
C Große-Brinkhaus, I Brinke, K Roth, C Looft, J Trautmann Mörlein, D Mörlein, E Tholen
- s03 Genome-wide DNA methylation analysis reveals candidate epigenetic biomarkers of boar taint in pigs
X Wang, M Drag, H N Kadarmideen
- s04 Mining whole genome resequencing data to identify functional mutations in boar taint-candidate genes
G Schiavo, S Bovo, S Cheloni, A Ribani, C Geraci, M Gallo, G Etherington, F Di Palma, L Fontanesi
- s05 Characterisation of expression quantitative trait loci associated with androstenone and skatole by sequencing of RNA from porcine testis
M Drag, L J A Kogelman, H Maribo, L Meinert, P D Thomsen, H N Kadarmideen
- s06 Fine mapping of QTL regions for boar taint using whole genome re-sequencing data
M van Son, R Agarwal, E Grindflek, H Grove, M P Kent, S Lien
- s07 Effect of CYP2E1 gene polymorphism and nutrition on skatole levels in crossbred pig
K Zadinova, R Stupka, J Citek, N Lebedova
- s08 Effect of divergent selection for cortisol level on boar taint
C Larzul, E Terenina, Y Billon, L Gress, R Comte, A Prunier, P Mormede
- s09 Genetic determinism of boar taint and relationship with meat traits
C Dugué, A Prunier, M J Mercat, M Monziols, B Blanchet, C Larzul
- s10 Influence of terminal sire on fattening traits of gilts and castrated, immunocastrated and entire male pigs
G Kušec, I Djurkin Kušec, M Škrlep, K Gvozdanović, V Margeta
- s11 Production of female pigs by embryo sexing using the porcine amelogenin gene
M Anastasiadou, G Michailidis

NUTRITION AND PHYSIOLOGY

- s12 The lysine requirement of growing entire male pigs (10-15 weeks of age): a dose-response study
S Millet, M Aluwé, J De Sutter, W Lambert, B Ampe, S De Campeneere
- s13 Entire males fed high-protein and –energy diets
H Maribo
- s14 Impact of sainfoin in entire male diets on nitrogen turnover and nutrient digestibility
E Seoni, G Battacone, F Dohme-Meier, G Bee

- s15 Testicular development, sex hormones and boar taint in pig lines divergent for residual feed intake
A Prunier, Y Billon, S Ferchaud, R Comte, W Gros, J Ruesche, H Gilbert
- s16 Finishing heavy boars for lower taint, suitable welfare and optimal performance
L Martin, A Frias, R P R Da Costa, M A P Conceição, R Cordeiro, A Ramos
- s17 Weight of sex glands as an on line tool to discriminate entire males from immunocastrates
N Batorek Lukač, G Fazarinc, M Prevolnik-Povše, M Škrlep, M Čandek-Potokar
- s18 Effect of the method of castration on growth performance and boar taint
K Zadinova, R Stupka, J Cítek, N Lebedova
- s19 Influence of housing conditions on antibody formation and testosterone after Improvac vaccinations
K Kress, U Weiler, V Stefanski
- s20 Development of long-term, pre-finishing immunocastration protocols for male Iberian pigs 1: Efficacy
F I Hernández-García, M Izquierdo, M A Pérez, A I Del Rosario, N Garrido, A Montero
- s21 Sex neutralization of heavy pigs from Iberian Peninsula breeds: solutions and limitations
R Charneca, F I Hernández-García, M Izquierdo
- s22 Is it possible to reduce androstenone by dietary means?
G Zamaratskaia, M K Rasmussen

MANAGEMENT AND HOUSING

- s23 Health and welfare issues regarding surgical castration of male piglets and its alternatives
E von Borell, A Prunier, U Weiler
- s24 Video analysis of entire male pigs' aggressive behaviour: Effects of inulin and housing conditions
M F Fonseca, M A P Conceição, M A Ramos, L Martin, A Frias, R Cordeiro, N Lavado, R P R Da Costa
- s25 Influence of raising entire boars and gilts during fattening in one unit on pubertal development, growth performance and welfare problems
J Bütfering, V Stefanski, U Weiler
- s26 Level of boar taint in young fattening boars as related to health and rearing conditions
M Škrlep, N Batorek Lukač, U Tomažin, M Prevolnik Povše, D Škorjanc, M Čandek-Potokar
- s27 Pork production with immunocastration: welfare and environment
V Stefanski, E Labussière, S Millet, U Weiler
- s28 Performance and welfare assessment in entire males compared to anti GnRH vaccinated boars
E von Borell, M Weber, S Ebschke
- s29 Penile Injuries in Immunocastrated and Entire Male Pigs of One Fattening Farm
S Reiter, S Zöls, M Ritzmann, V Stefanski, U Weiler
- s30 Influences of different vaccination protocols of immunocastration on endocrine parameters, growth performance, carcass quality, boar taint as well as on penile injuries and behavioural changes
S Reiter, U Weiler, P Lindner, A Bauer, V Stefanski, M Ritzmann, S Zöls

MEAT QUALITY

- s31 Meat quality issues in entire male and immunocastrated pigs
M Škrlep, M Čandek-Potokar
- s32 Quality control in entire male pig production with particular emphasis on boar taint detection
M Font-I-Furnols, M Čandek-Potokar, N Panella-Riera, J E Haugen, I Bahelka

- s33 Fully automated and rapid at-line method for measuring boar taint related compounds in back fat
R I D Birkler, C Borggaard, S Støier, B L W Lund
- s34 Quality and sensory evaluation of meat from entire males after adding hydrolysable tannins to diet
I Bahelka, O Bučko, E Hanusová
- s35 The quality of meat from Romanian pigs, surgical castrated *versus* entire male
G Iordăchescu, M Stoica, R M Dinică, A Cantaragiu, I Grecu, A O Mihalache
- s36 Impact of immunological castration on the carcass quality of final hybrids in commercial Ukrainian pig farms
M Povod, O Kravchenko, A Getya, T Kodak
- s37 Slovenian results within JRC-IRMM organised boar taint reference method ring test
Š Velikonja Bolta, H Baša-Česnik
- s38 Parallel analysis of boar taint compounds in meat and in back fat
S Ampuero Kragten, H Chavarria-Drecourt, G Bee
- s39 Effect of sampling location on concentration of boar taint compounds in fat tissue
N Batorek Lukač, Š Velikonja-Bolta, M Škrlep, U Tomažin, M Čandek-Potokar
- s40 The effect of sex on performance and carcass quality in commercial pig farms
A Van den Broeke, F Leen, M Aluwé, J Van Meensel, S Millet
- s41 Quality of pig carcasses of surgical- and immuno- castrated males slaughtered at different live weights in commercial Ukrainian pig farms
M Povod, O Kravchenko, A Getya, O Kodak
- s42 Retrospective by sex of the new EU lean meat content of pig carcasses
G Daumas

PROCESSING

- s43 Sensory analysis of cooked ham from entire pigs raised with different feeding and housing conditions
R Pinto, N Reis, C Barbosa, R Pinheiro, M Vaz Velho
- s44 Quality of dry-cured hams from entire males in relation to boar taint level
T Kaltnekar, M Škrlep, N Batorek Lukač, U Tomažin, M Prevolnik Povše, E Labussière, L Demšar, M Čandek-Potokar
- s45 Effect of slaughter age of entire males on cooked ham quality
N Reis, R Pinto, C Barbosa, M Vaz Velho
- s46 Fermentation is not a strategy to mask boar taint
M D Aaslyng, S Støier, A Granly Koch
- s47 Cooking meat for a long time at low temperatures does not decrease boar taint
M D Aaslyng, S Støier, A Granly Koch
- s48 Effect of essential oil addition on masking boar taint in fresh pork sausage
B Šojić, V Tomović, P Ikončić, B Pavlić, N Džinić, Z Zeković, T Tasić, N Batorek Lukač, I Tomašević, M Ivić, S Škaljac, M Jakanović

CONSUMER AND MARKET

- s49 Raising entire males: A framework for sensory quality control
D Moerlein
- s50 Challenges for pork industry: Profiling multi-dimensional consumers
L Lin, A Fischer, M Aluwé
- s51 Citizen attitudes and consumer acceptability towards meat from boars and immunocastrates in Europe
M Aluwé, L Tudoreanu, L Lin, A Fischer, M Font I Furnols

- s52 Consumer expectations towards meat from castrated and immunocastrated pigs: a segmentation approach
A Claret, L Guerrero, M Font-I-Furnols, A Dalmau
- s53 Consumer's opinion on animal welfare and pig castration in Croatia
I Djurkin Kušec, G Kušec, L Guerrero, M Font-I-Furnols, I Tomašević
- s54 Consumer's attitudes towards surgical castration of pigs in three Western Balkan countries
I Tomašević, S Novakovič, I Djekič, D Nakov, L Guerrero, M Font-I-Furnols
- s55 Economical assessment of the alternatives for surgical castration: a comparison of the gross margin per pig
F Leen, A Van den Broeke, M Aluwé, J Van Meensel, S Millet
- s56 Economic effects of alternatives to piglet castration without anaesthesia on competitiveness in Germany
M Verhaagh
- s57 The attitude of pig farmers from Vojvodina (Northern Serbia) regarding the alternative strategies for surgical castration of piglets
P Ikonić, T Peulić, B Šojić, I Tomašević

EXAMPLES IN AUSTRALIA AND THE NETHERLANDS

- s58 Pork production with entire males and immunocastrates in Australia
D N D'souza, R J E Hewitt, R J Van Barneveld
- s59 Whole chain approach for moving from surgical castrate to entire male production
G B C Backus

Abstracts presented in the Oeiras meeting	Abstracts presented in the Dubrovnik meeting
s02, s06, s07, s11, s13, s22, s25, s26, s28, s29, s30, s35, s36, s37, s39, s40, s44, s45, s46, s47, s48, s50, s55, s56, s57	s01, s03, s04, s05, s08, s09, s10, s12, s14, s15, s16, s17, s18, s19, s20, s21, s23, s24, s27, s31, s32, s33, s34, s38, s41, s42, s43, s49, s51, s52, s53, s54, s58, s59
