

and the library, constantly at work in spite of frequent and severe headaches. His indomitable will and steady perseverance did not fail until he was completely exhausted. He died on the 22nd of April.

During the course of his too short life he maintained his sweet remembrance of his beloved Normandy, of the ancient city of Rouen, and especially of his native village. He liked to speak of Auffay and its Roman origin—the place of the high beech tree. There he lies at rest—*sub tegmine fagi*.

RÉNÉ SEMELAINNE.

FRANK SCHOFIELD, M.D.

We regret to record the death of Dr. Frank Schofield, who was for many years a colleague of the late Dr. Paul at Camberwell House. Dr. Schofield received his medical education at St. George's Hospital, where he proved to be an able and diligent student, and where he was for a time Demonstrator of Anatomy and Physiology. In his capacity as Demonstrator he had the gratification of receiving from the members of his class at the end of the session a valuable presentation. He took the diplomas of M.R.C.S.Eng. and L.S.A. in 1861, and the degree of M.D.St. Andrews in 1862. On the advice and through the influence of the late Sir Benjamin Ward Richardson, who was a life-long friend, he was appointed Assistant Medical Officer to Camberwell House in 1861. He was then in his 23rd year. His predecessor was Dr. Murray Lindsay. Later he was promoted to be Medical Superintendent at Camberwell House, and he held this post till the autumn of 1899, when the delicate state of his health compelled him to resign.

On his retirement he went with his wife and family to reside at Weymouth. For a few years he to some degree regained strength, and he enjoyed the rest from the strenuous professional life of London. In the end of last year his health markedly failed, and after a severe illness of four months' duration, borne with great patience and fortitude, he passed away peacefully, greatly beloved and keenly regretted by a wide circle of friends.
