

Psychological Medicine

Monograph Supplements

For over ten years *Psychological Medicine*, edited by Michael Shepherd, has been publishing Monograph Supplements on important topics of continuing interest. The Supplements are included in the subscription price of the journal and are also available separately. To order your copies simply complete the coupon below and return, with payment, to Cambridge University Press.

Noise, noise sensitivity & psychiatric disorder: epidemiological & psychophysiological studies *Stephen A. Stansfeld*

Is noise sensitivity a risk factor for psychiatric disorder? This monograph reports on two important studies of noise sensitivity: a 6-year follow-up study of a group of highly noise sensitive and low noise sensitive women, and a longitudinal study examining changes in noise sensitivity with recovery from depression.

N° 22 (1992) ISBN 0 521 43975 2 £7.95

A diagnostic analysis of the casebooks of Ticehurst House Asylum, 1845-1890 *Trevor H. Turner*

The recent discovery of the casebooks of around 600 patients admitted to Ticehurst House, an expensive private asylum, in 1845-6 offered direct insights into Victorian psychological medicine. In addition Dr Turner is able to demonstrate that the core symptoms of manic depressive disorder and schizophrenia shown by patients in the 1980s were shared by their Victorian predecessors.

N° 21 (1992) ISBN 0 521 42986 2 £6.50

Schizophrenia: manifestations, incidence & course in different cultures *A. Jablensky et al*

N° 20 (1991) ISBN 0 521 42328 7 £7.95

Community-based psychiatry: long term patterns of care in South Verona

N° 19 (1991) ISBN 0 521 40569 6 £6.50

A model of stability and change in minor psychiatric symptoms: results from three longitudinal studies *Paul Duncan-Jones et al*

N° 18 (1990) ISBN 0 521 39904 1 £6.50

Automatism, medicine and the law *Peter Fenwick*

N° 17 (1990) ISBN 0 521 39906 8 £6.50

The cardiovascular effects of antidepressants *S. J. Warrington et al*

N° 16 (1989) ISBN 0 521 38822 8 £6.50

The natural history of schizophrenia: a five-year follow-up study of outcome & prediction in a representative sample of schizophrenics *Michael Shepherd et al*

N° 15 (1989) ISBN 0 521 37999 7 £6.50

Eating disorders in a general practice population. Prevalence, characteristics and follow-up at 12 to 18 months

Michael B. King

N° 14 (1988) ISBN 0 521 37998 9 £6.50

The natural history of tolerance to the benzodiazepines

A. Higgitt et al

N° 13 (1988) ISBN 0 521 36971 1 £6.50

FREUDIAN FRAUD

The Malignant Effect
of Freud's Theory on
American
Thought and Culture

E. FULLER TORREY, M.D.
Author of *SURVIVING SCHIZOPHRENIA*

"Dr. Torrey's complaints about Freud are discussed with... subtlety and insight." —New York Times

Paperback, \$12.00 (ISBN 0-06-092378-4)

HarperCollins Publishers
New York, NY

Dr. E. Fuller Torrey examines the history and consequences of Freudian thinking in America.

"The best explanation I've encountered of the combination of self-centeredness and greedy materialism that dominated America during the seventies and eighties."

—Charles Peters, editor, *Washington Monthly*

"It is intriguing to see how a doctrine completely lacking in factual support or theoretical rigor became all-powerful in the public mind, while refuted, discredited, and rejected by scientifically minded psychologists, psychiatrists, and anthropologists. Torrey shows clearly how, once a myth has taken over, common sense vanishes. This is a unique book in the eschatology of Freudianism."

—Hans J. Eysenck, professor emeritus of psychology, University of London and author of *Decline and Fall of the Freudian Empire*

E. Fuller Torrey, M.D., is a clinical and research psychiatrist in Washington, D.C., who specializes in schizophrenia. He is the author of twelve books, including the bestselling *Surviving Schizophrenia*.

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to Professor Eugene Paykal, Executive Editor, *Psychological Medicine*, Department of Psychiatry, University of Cambridge, Addenbrooke's Hospital, Cambridge CB2 2QQ, UK. Contributors should send at least three copies of the text, tables and figures. Copies other than the first may be xeroxed. In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references and notes, and consecutively numbered. The following information must be given on the first page (title sheet): (1) title and short title for running head (not more than 60 characters); (2) authors' names, and (3) department in which work was done. A short synopsis of about half an A4 page double-spaced must be provided at the beginning of each article. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the Reference section).

Contributors should note the following:

1. Italic type should be indicated by underlining and bold type by wavy underlining (italic and bold typefaces should not be used even if they are available)
2. S.I. units should be used throughout in text, figures and tables
3. Authors should spell out in full any abbreviations used in their manuscripts.
4. Foreign quotations and phrases should be followed by a translation.
5. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by *et al.* (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be typed in alphabetical order on a separate sheet. Examples follow:

Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136.

Journal titles should always be given in full.

FIGURES AND TABLES Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These should not be included in the text and should be submitted in a form suitable for direct reproduction (the printed version will normally be reduced to 70 mm wide). Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in arabic numerals. Ensure that the figure number is marked on the back of the photograph or artwork together with the name of the author and paper title. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author indicated on the title page. Corrections other than to printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
