MCMLII

“ In adopting our title of the *Journal of Mental Science*, published by authority of the *Medico-Psychological Association*, we profess that we cultivate in our pages mental science of a particular kind, namely, such mental science as appertains to medical men who are engaged in the treatment of the insane. But it has been objected that the term mental science is inapplicable, and that the term mental physiology or mental pathology, or psychology, or psychiatry (a term much affected by our German brethren), would have been more correct and appropriate; and that, moreover, we do not deal in mental science, which is properly the sphere of the aspiring metaphysical intellect. If mental science is strictly synonymous with metaphysics, these objections are certainly valid; for although we do not eschew metaphysical discussion, the aim of this JOURNAL is certainly bent upon more attainable objects than the pursuit of those recondite inquiries which have occupied the most ambitious intellects from the time of Plato to the present, with so much labour and so little result. But while we admit that metaphysics may be called one department of mental science, we maintain that mental physiology and mental pathology are also mental science under a different aspect. While metaphysics may be called speculative mental science, mental physiology and pathology, with their vast range of inquiry into insanity, education, crime, and all things which tend to preserve mental health, or to produce mental disease, are not less questions of mental science in its practical, that is in its sociological point of view. If it were not unjust to high mathematics to compare it in any way with abstruse metaphysics, it would illustrate our meaning to say that our practical mental science would fairly bear the same relation to the mental science of the metaphysicians as applied mathematics bears to the pure science. In both instances the aim of the pure science is the attainment of abstract truth; its utility, however, frequently going no further than to serve as a gymnasium for the intellect. In both instances the mixed science aims at, and, to a certain extent, attains immediate practical results of the greatest utility to the welfare of mankind; we therefore maintain that our JOURNAL is not inaptly called the *Journal of Mental Science*, although the science may only attempt to deal with sociological and medical inquiries, relating either to the preservation of the health of the mind or to the amelioration or cure of its diseases; and although not soaring to the height of abstruse metaphysics, we only aim at such metaphysical knowledge as may be available to our purposes, as the mechanician uses the formularies of mathematics. This is our view of the kind of mental science which physicians engaged in the grave responsibility of caring for the mental health of their fellow-men may, in all modesty, pretend to cultivate; and while we cannot doubt that all additions to our certain knowledge in the speculative department of the science will be great gain, the necessities of duty and of danger must ever compel us to pursue that knowledge which is to be obtained in the practical departments of science with the earnestness of real workmen. The captain of a ship would be none the worse for being well acquainted with the higher branches of astronomical science, but it is the practical part of that science as it is applicable to navigation which he is compelled to study.”—*Sir J. C. Bucknill, M.D., F.R.S. (Journ. Ment. Sci., vol. vii, 1861, p. 137).*

Made and Printed in Great Britain.

Barbiturates

Since the original synthesis of 'Amytal,' nearly thirty years ago, the House of Lilly has been closely associated with the further development of the barbiturates. Today, as a result of the progress achieved in this field of research, the physician has an extensive range of barbiturates from which to choose and can select the drug especially suited to his needs.

For fairly prolonged hypnosis and day-time sedation

TRADE MARK 'AMYTAL' BRAND AMYLOBARBITONE in strengths of gr. $\frac{1}{8}$, gr. $\frac{1}{4}$, gr. $\frac{1}{2}$, gr. $\frac{3}{4}$, gr. $1\frac{1}{2}$

For medium onset and duration, and especially in the neuroses

TRADE MARK 'SODIUM AMYTAL' BRAND SODIUM AMYLOBARBITONE in strengths of gr. 1 (sedative) and gr. 3 (hypnotic). Also in Ampoules 0.125 Gm., 0.25 Gm., 0.5 Gm. and 1.0 Gm.

For rapid onset and short duration; suited for simple insomnia and as a pre-anaesthetic

TRADE MARK 'SECONAL SODIUM' BRAND QUINALBARBITONE SODIUM in strengths of gr. $\frac{3}{4}$ (sedative) and gr. $1\frac{1}{2}$ (hypnotic)

To combine rapid onset with a more prolonged action

TRADE MARK 'TUINAL' BRAND SODIUM AMYLOBARBITONE with QUINALBARBITONE SODIUM in strengths of gr. $1\frac{1}{2}$ (sedative) and gr. 3 (hypnotic)

JOURNAL OF MENTAL SCIENCE

CONTENTS FOR OCTOBER, 1952

Original Articles—	PAGE
The Latah Reaction: Its Pathodynamics and Nosological Position; by <i>P. M. Yap, M.A., M.B.Camb., M.R.C.S., D.P.M.Lond.</i>	515
The Concentration of Adrenaline-like Substances in Blood During Insulin Hypoglycaemia; by <i>H. Weil-Malherbe, M.D., D.Sc., and A. D. Bone, D.P.M.</i>	565
The Ecology of Mental Disease; by <i>E. H. Hare, M.A., M.D.Camb., D.P.M.</i>	579
Narcolepsy: A Brief Critical Review and Study of Eight Cases; by <i>D. A. Pond, M.D., M.R.C.P., D.P.M.</i>	595
Experimental Studies of a Perceptual Anomaly. II. Confirmatory and Explanatory Experiments; by <i>M. B. Shapiro, M.A.</i>	605
Clinical and E.E.G. Aspects of Psychiatric Disorders Associated with Tetany; by <i>D. S. G. M. Bailey, M.B., B.S., J. F. Donovan, M.R.C.S., L.R.C.P., D.P.M., and A. J. Galbraith, M.D., D.P.M.</i>	618
The Response of the Neurotic Personality to Abreaction; by <i>Anthony Hordern, M.B., Ch.B., D.P.M.</i>	630
Studies on the Physiology of Awareness: The Effect of Rhythmic Sensory Bombardment on Emotions, Blood Oxygen Saturation and the Levels of Consciousness; by <i>John W. Lovett Doust, B.Sc., M.B., B.S.Lond., M.R.C.P., and Robert A. Schneider, B.A., B.S., M.D. Minnesota, with the technical assistance of George W. Harris</i>	640
The E.E.Gs. of the Relatives of Schizophrenics; by <i>G. H. A. Chamberlain, M.D., M.R.C.P.I., D.P.M., and J. Gordon Russell, M.R.C.P., D.P.M.</i>	654
Individual Differences between Interviewers and their Effect on Interviewees' Conversational Behaviour; by <i>Frieda Goldman-Eisler, Ph.D.</i>	660
Migraine Patients: A Discussion of Some Test Results; by <i>A. Kaldegg, Ph.D., B.A.</i>	672
The Diagnostic Significance of Certain Tests of Carbohydrate Metabolism in Psychiatric Patients and the Question of "Oneirophrenia"; by <i>W. Mayer-Gross, M.D., F.R.C.P.</i>	683
Gargoylism (Hurler's Disease); by <i>Ronald C. MacGillivray, M.B., F.R.F.P.S.G., D.P.M.</i>	687
Rorschach Validation. I: A Rationale; by <i>J. D. Keehn</i>	697
A Preliminary Investigation into Abreaction Comparing Methedrine and Sodium Amytal with Other Methods; by <i>F. Houston, M.R.C.S., L.R.C.P., D.P.M.</i>	707
The Electroencephalogram in Aged Patients of a Mental Hospital; by <i>W. McAdam, M.D., M.R.C.P.I., D.P.M., and W. T. McClatchey, M.B., D.P.M.</i>	711
Reviews	716
Psychanalyse de L'Artiste et de son Oeuvre. (Psychoanalysis of Artists and Their Work.); by <i>N. N. Dracoulides</i> .—Annual Review of Psychology; edited by <i>C. P. Stone</i> .—Personality and the Frontal Lobes; by <i>Asenath Petrie</i> .—A History of Philosophy; by <i>Frank Thilly</i> ; revised by <i>Ledger Wood</i> .—The Perception of the Visual World; by <i>James J. Gibson</i> .—The Educability of Cerebral Palsied Children; by <i>M. I. Dunsdon</i> .—Brain and Thought; by <i>Jean Lhermitte</i> .—Textbook on Psychiatry.; by <i>Eugen Bleuler</i> ; translated by <i>A. A. Brill</i> .	
Bibliography and Epitome	720
1. Physiology, Biochemistry, etc.—2. Pharmacology and Treatment.
