

Index of Subjects

- Active immunization against tetanus, 29
- Aerosols of bacteria and bacteriophages, assay by electrostatic precipitation, 487
- Airborne micro-organisms, survival tests, 479
- Airborne *Salmonella typhimurium* infection of mice, 303
- Allergy in experimental tuberculosis of rat, 427
- Amoebic abscess of liver, absence of bacteria in uncomplicated abscesses, 161
- Antibody response in rats and mice to PPLO infections, 401
- Anticoagulant rodenticide, pindone sodium salt, for use against house-mouse, 335
- Antigens common to Types 1 and 2 polioviruses, 349
- Aseptic meningitis outbreak by an ECHO-like virus, 181
- Assay of mono-dispersed aerosols of bacteria and bacteriophages by electrostatic precipitation, 487
- Assay of plague vaccine by mouse protection tests, 49
- Avirulent variant of poliovirus related to Saukett strain, 57
- Bacteria**
- Bordetella pertussis*, 191, 205, 217, 373
- Brucella melitensis*, 379
- Mycobacterium tuberculosis*, 427, 471
- Pasteurella pestis*, 49
- Pasteurella tularensis*, 497
- PPLO, 401
- Salmonella saint-paul*, 133. *S. typhi*, 65, 231. *S. typhimurium*, 303, Others, 1, 93, 105, 343
- Staphylococcus aureus*, 15, 419
- Clostridium tetani*, 29
- Vibrio cholerae*, 109
- Bacteria, diagnostic tables for identification of common medical, 357
- Bacteria in amoebic abscess of liver due to secondary infection, 161
- Bacteriophages of *Vibrio cholerae*, 109
- Bakehouses and slaughterhouses, salmonella contamination of, 93
- Bordetella pertussis*, experimental infections in mice, 191, 205, 217, 373
- Bovine cysticercosis, the role of filth flies in the epizootiology in Kenya, 505
- British drift mines and infestation by brown rat, 271
- Brucella melitensis* epidemic in an Israeli village, 379
- Carrier state, typhoid, 65, 231
- Ceiling temperatures for growth of pox viruses in chick embryos, 457
- Chick embryo cell culture of vaccinia virus for smallpox vaccine, 171
- Chick embryo culture of pox viruses, effect of temperature on growth, 457
- Chicken carcasses, effect of treatment with chlorine for reduction of salmonella contamination, 343
- χ^2 'index of dispersion' test, 449
- Cholera phages as diagnostic tools for identification of vibrios, 109
- Combined immunization against tetanus, 29
- Common cold, epidemiology, cross-infection and immunity, 309, 321
- Complement-fixing and precipitating antigens common to Types 1 and 2 polioviruses, 349
- Cross-infection in maternity hospitals and nasal carriage of staphylococci, 15, 419
- Cross-infection in the common cold, 321
- Cynomolgus monkeys sensitivity to subcutaneous injections of strains of poliovirus in the testing of virulence, 387
- Determinator, an apparatus for use with diagnostic tables for the identification of common medical bacteria, 357
- Direct poisons for control of rats in sewers, 413
- Drift mines, rat infestation of, 271

- Electrostatic precipitation for assay of bacteria and bacteriophages in aerosols, 487
 Enteric-like fever due to *Salmonella saint-paul*, 133
 Enterovirus (ECHO-like) associated with an outbreak of aseptic meningitis, 181
 Epidemic of brucellosis in an Israeli village, 379
 Epidemiology of the common cold, 309, 321
 Epidemiology of infectious hepatitis in Israel, 123
 Experimental studies on epidemiology with Newcastle Disease Virus, 285
 Experimental tuberculosis in rats and mice, 427, 471
- Flies, filth, and bovine cysticercosis in Kenya, 505
 Fluoracetamide as a direct poison for the control of rats in sewers, 413
 Frater virus, an ECHO-like virus associated with an outbreak of aseptic meningitis, 181
 Freeze-drying of bacteria, 77
- Hepatitis in Israel, epidemiology of infectious, 123
 House-mouse, suitability of sodium salt of pindone for control of, 335
 Humatin, trial of effect of, in known typhoid carriers, 65
- Immunity in mice to intracerebral challenge with *Bordetella pertussis*, 373
 Infection of rats and mice with PPLO and antibody response, 401
 Infectious hepatitis in Israel, epidemiology of, 123
 Infectivity of *Pasteurella tularensis* clouds, 497
 Innate resistance of Australian wild rabbits to myxomatosis, changes in, 117
 Intracerebral infection of mice with *Bordetella pertussis*, 205
 Intranasal and intracerebral infection of mice with *Bordetella pertussis*, comparison of, 217
 Intranasal infection of mice with *Bordetella pertussis*, 191
 Intraspinal injection of poliovirus, influence of technique on sensitivity of monkeys, 395
- Liver abscess, amoebic, presence or absence of bacteria, 161
 Louping-ill virus infections in sheep, 437
- Medical bacteria, diagnostic tables for, 357
 Metabolic inhibition test for titration of poliovirus neutralizing antibodies, 295
 Mouse protection test for assay or comparison of plague vaccines, 49
 Multiple regression analysis of post-operative hospital sepsis, 259
 Myxomatosis, changes in innate resistance of Australian wild rabbits to, 117
- Nasal carriage of staphylococci by mothers in maternity hospitals and staphylococcal sepsis, 15, 419
 Newcastle disease virus, use of as a model for studies of experimental epidemiology, 285
- Paromomycin, laboratory assessment of value as treatment for typhoid carriers, 65
 Passive immunization against tetanus, 29
Pasteurella tularensis clouds, infectivity of, 497
 Pertussis infection of mice by intracerebral and intranasal routes, 191, 205, 217, 373
 Pindone, sodium salt, a rodenticide for use against mice, 335
 Plague vaccines, assessment by mouse protection test, 49
 Pleuropneumonia-like organisms in infections in rats and mice and antibody response, 401
 Poliovirus, excretion by normal children aged 0-5 years, 143
 Poliovirus, Types 1 and 2, with common antigens, 349
 Poliovirus, intraspinal inoculation of, influence of the technique on the sensitivity of monkeys, 395
 Poliovirus neutralizing antibodies, a modified metabolic inhibition test for the titration of, 295
 Poliovirus, a variant of the Saukett strain, 57
 Poliovirus, virulence for cynomolgus monkeys injected subcutaneously, 387
 Power function of χ^2 -test, 449
 Pox viruses, effect of temperature on growth in chick embryos, 457
 Post-operative surgical sepsis, study of, by multiple regression analysis, 259

- Preservation of bacteria by freeze-drying, 77
 Presumptive tests for detection of typhoid carrier state, 231
- Rat infestation of drift mines, 271
 Rats and mice, relative natural resistance to experimental tuberculosis, 471
 Rat tuberculosis, allergy in, 427
 Resistance, changes in, of Australian wild rabbits to myxomatosis, 117
 Respiratory route for experimental infection of mice with *Salmonella typhimurium*, 303
 Rodenticides, 335, 413
- Salmonella contamination of bakehouses and slaughterhouses, 93
 Salmonella contamination of chicken carcasses, effect of chlorine treatment on, 343
 Salmonella enrichment media, a modification containing sodium lauryl sulphate, 1
 Salmonella infection of bakers' confectionery, 105
 Salmonella infection of mice by respiratory route, 303
Salmonella saint-paul infections in England and Wales in 1959, 133
 Sampling study of the power function of the binomial χ^2 'index of dispersion', test, 449
 Sepsis in surgical wounds, 259
 Serological response of sheep to infection with louping-ill virus, 437
 Sewer swab technique in a rural outbreak of salmonellosis, 1
 Smallpox vaccine, large-scale preparation in tissue culture cells, 171
 Sodium fluoracetate as a direct poison for control of rats in sewers, 413
 Sodium glutamate as a drying medium for preservation of freeze-dried bacteria, 77
 Sodium lauryl sulphate as a constituent for a modification of the usual tetrathionate salmonella enrichment medium, 1
 Soluble antigens of varicella-zoster virus produced in tissue culture, 249
 Staphylococcal nasal carriage by patients and staff in maternity hospitals and staphylococcal infections following childbirth, 15, 419
 Survival of viruses in aerosols, 479
 Symptomless excretors of poliovirus, 143
- Temperature, effect of, on growth of pox viruses in chick embryo, 457
 Tetanus, active and passive immunization, 29
 Tetrathionate enrichment media for salmonellae, a sodium lauryl sulphate modification, 1
 Tissue culture production of smallpox vaccine, 171
 Tissue culture production of soluble antigens of varicella-zoster virus, 249
 Tuberculous, experimental pulmonary infections in rats and mice, allergy and resistance, 427, 471
 Typhoid carrier state, 65, 231
- Umbilical-stump colonization by Staphylococci as source of sepsis in maternity hospitals, 419
- Vaccinia virus grown in tissue culture cells for preparation of smallpox vaccine, 171
 Varicella-zoster virus, soluble antigens produced in tissue culture, 249
 Vi antibody in typhoid carriers, 231
 Village epidemic of brucellosis, 379
 Virus aerosols survival, 479
- Viruses
 - ECHO-like, 181
 - Infectious hepatitis, 123
 - Louping-ill, 437
 - Myxoma, 117
 - Newcastle disease, 285
 - Poliomyelitis, 57, 143, 295, 349, 387, 395
 - Pox group, 457
 - Vaccinia, 171
 - Varicella, 249
 - Zoster, 249
