

PLASMON

NATURE'S NUTRIENT.

Soluble, Digestible, Natural Albumen.
Pure, Tasteless, Odourless, Nutritious, Cheap.

PLASMON is the only soluble Proteid or Albumen free from Chemicals—therefore highly digestible and safe.

PLASMON is the outcome of modern systematic research on proteids.

PLASMON is a highly concentrated milk proteid food of great merit. It is a soluble Albumen, and being prepared by a mechanical process only, is free from chemicals and therefore easily digested and safe.

Professor W. PRAUSNITZ, M.D., Principal of the Hygienic Institute, and Principal of the State Department for Investigation of Food, said at the meeting of the German Scientific Association in Munich:

"Plasmon possesses the highest assimilative value known for any albumen food.

"There is no food preparation known to us equal to Plasmon, either as regards constancy of composition, as guaranteed by its source, or in respect to the proportion, solubility, and digestibility of the nutritive constituents."

Professor F. HOFMANN, M.D., Privy Medical Councillor and President of the Hygienic Institute, Leipsic University, says:

"The Plasmon taken fully replaced the albumen of ordinary meat diet.

"Plasmon is an albumen preserve which contains in a minimum space the maximum quantity of indispensable food."

Dr. C. VIRCHOW, of Berlin. After a systematic trial of the nutrient value of Plasmon, including nineteen days' experiment upon himself, Dr. VIRCHOW expresses himself as follows:

"From my experience I can recommend the administration of Plasmon. Plasmon is an albumen preparation containing a very high proportion of nitrogen and extremely digestible. As practical trials have demonstrated, it can replace all other animal albumen foods and is superior even to meat in nutrient value. Plasmon, moreover, maintains the physical strength of workmen engaged in the most laborious tasks, and therefore at its low price it can be strongly recommended as of inestimable value in the kitchens of the working classes."

Dr. W. CASPARI, Physiological Institute of the German Board of Agriculture, says:

"The dietetic experiments show that more flesh is put on when dieted with Plasmon than with meat food."—*FORSCHRITTE DER MEDICIN*, XVII, No. 19.

A complete Pamphlet of Scientific Reports will be furnished on application, together with Free Samples, by

THE PLASMON SYNDICATE, LTD.,
56, DUKE STREET, GROSVENOR SQUARE, W.

SECOND EDITION, considerably enlarged (with additional chapters on "Special Instruction," etc.). Crown 8vo. Illustrated, 5s. net.

MENTALLY DEFICIENT CHILDREN: their Treatment and Training.

By G. E. SHUTTLEWORTH, B.A., M.D., etc., Medical Examiner of Defective Children, School Board for London; late Medical Superintendent, Royal Albert Asylum for Idiots and Imbeciles of the Northern Counties, Lancaster; formerly Assistant Medical Officer, Earlswood Asylum.

"Is a book that should be in the hands of all physicians, as well as those who have the special care of these defectives. . . . We commend the book cordially to our readers."—*Alienist and Neurologist*, April, 1900.

JUST READY.

A TREATISE ON
MENTAL DISEASES,

Designed for the use of Practitioners and Students of Medicine

By HENRY J. BERKLEY, M.D.,

Clinical Professor of Psychiatry, Johns Hopkins University; Chief Visiting Physician to the City Insane Asylum, Baltimore.

624 pages, 8vo, with Frontispiece, Lithographic Plates and Illustrations in the Text.

Prices: Cloth, 21/- net; handsome Roxburgh binding, 25/- net.

The absence of a comprehensive, practical work in the English language on MENTAL DISEASES—one adapted to the student and busy practitioner—has led the author to prepare this treatise embodying all the principal forms of alienation.

The work opens with a section containing the most necessary points in the gross anatomy and histology of the cerebrum from the modern standpoint, and in which especial attention is given to the all-important lymphatic circulation of the brain.

Then follows a section on the general pathology of mental maladies, the lesions of the vascular apparatus meeting with especial consideration. Next comes a clinical section of over 500 pages. This comprises four distinct divisions, with numerous subdivisions, it being considered by the writer that a definite classification helps materially to fix upon the mind the details of a disease, rather than to group all diseases having a common series of symptoms.

London: HENRY KIMPTON, 18, Furnival Street, Holborn, E.C.

THE THYROID TREATMENT

and the Preparations Manufactured by

ALLEN & HANBURY'S LTD.

Myxœdema.—The relief afforded to cases of Myxœdema by the use of the Thyroid Gland during the last five years has marked a totally new departure in the history of medicine. We are beginning to understand the physiological importance of Internal Secretions to the animal economy.

Myxœdema has been recognised as long ago as 1874 by Sir Wm. Gull as a distinct disease, and before that time it had been found that animals invariably succumbed after total extirpation of the Thyroid.

Cretinism, too, had long been recognised to be connected with congenital absence or deficiency in the glandular structure of the Thyroid.

Time enough has now elapsed to prove that those cases of Myxœdema which have been restored to health maintain that condition as long as they continue to take the gland or efficient preparation of its extract.

Sporadic Cretinism.—As regards Sporadic Cretinism, we cannot do better than refer the reader to an original article which appeared in the *Lancet*, with Photographs, by W. W. O.—M.D. Oxon., M.R.C.P. London, November 4th, 1893, p. 1113.

All these cases were treated by Allen and Hanbury's Thyroidin Tablets. The results are perhaps more remarkable than those obtained in the allied condition of Myxœdema. The writer observes that these Preparations have given entire satisfaction. The Photographs speak for themselves.

The success attending the use of Thyroid Extract in the Myxœdematous condition of the skin and its appendages has suggested its employment in various skin lesions.

Psoriasis.—Very good results have been attained in some cases of obstinate psoriasis by using Thyroidin Tablets.

In a recent number of the *Lancet* three of these cases are reported. After treatment with iodide of potassium and arsenic internally, and chrysophanic acid ointment locally, showed no improvement, but, on the other hand, the disorder was in some cases aggravated, developing a general dermatitis of the face with febrile disturbance.

But on the treatment being changed, and TABLETS OF THYROID GLAND (ALLEN AND HANBURY'S) being administered, the writer observes:

Case 1.—“The improvement was very striking, . . . the scales were completely gone, and all that was left was a slight discoloration of the skin where the disease had appeared.”

Case 2.—“The scalp and limbs were nearly clear. . . . The patient, who has suffered from the disease for nineteen years past, has had no discomfort from the remedy, and says that nothing has ever acted so rapidly upon his disease.”

Case 3.—“The result was astonishing, for in three days there was a marked improvement, and no further spread of the disease had taken place. No discomfort was experienced from the remedy.”

For full details of the above quotations see the *Lancet*, January 6th, 1894, p. 19.

Whilst formerly liquid extracts and the raw gland were used, ALLEN AND HANBURY'S were the first to offer the active principles of the Thyroid Gland in the compressed form, which is now the favourite mode of administration. The glands are dissected and carefully examined and separated from all blood, fat, and inert tissue, which readily decompose and produce gastric disturbances, vomiting, &c., and which give to some preparations on the market a most repulsive smell, especially when they have been kept for a short time.

THYROIDIN TABLETS

Readily disintegrate when swallowed, and from their shape and size are taken without difficulty. If preferred, they may be dissolved in a little water before being swallowed.

One Tablet equals 5 grs. of Gland. Dose: 1 or 2.

THYROIDIN CACHETS

Contain 5 grs. of Thyroidin in each. Dose: 1 or 2. A very suitable and convenient mode of taking Thyroidin.

ELIXIR THYROIDIN

is a very palatable, slightly sweet preparation, of which one fluid ounce represents one Gland (average) It will be found to keep well without change. Dose: 1 to 4 fluid drachms.

The above are put up in 1s., 2s. 6d., and 4s. 6d. packages (retail), or 8s., 21s., and 40s. per doz. to the Profession.

SAMPLES SUPPLIED TO THE PROFESSION ON APPLICATION.

ATKINSON & CO.,

GOVERNMENT CONTRACTORS,

198, 200, 202, 204, 206, 208, 210, 212,
WESTMINSTER BRIDGE ROAD, LONDON,

Have the honour to hold some of the largest Contracts in the Kingdom from Asylums, Unions, Hospitals, and Government Departments. The magnitude of their Contracts enables them to employ Manufacturers solely for their demands, thus affording a direct charge to the Consumer.

NUMEROUS SPECIALITIES IN

HOSPITAL BEDSTEADS, CHAIRS, SEATS, MATTRESSES, LOCKERS,
&c. &c.

NAPIER MATTING, LINOLEUMS, AND VARIOUS FLOOR COVERINGS

Made in Special Widths and Qualities to meet exceptional wear.

"**ATKINSON'S**" **PINE FIBRE MATTRESS** is specially recommended because—

It is healthful—the faint odour of the pine is beneficial in catarrh and diseases of the lungs, and conduces to sleep.

It is antiseptic and vermin-proof—no insects will harbour in it.

It will not decay nor collect dampness, neither will it break up nor pack.

It is better than common hair or vegetable fibres that cost much more.

It is durable—found sweet and fresh thirteen years old.

PRICES ON APPLICATION.

ATKINSON & CO. undertake to supply any quantity of Goods as specified below by the quarter, half-year, or year, viz.:

Bedsteads in Wood or Iron, Iron Bedsteads with Patent Spring Mesh Bottoms, Woven Wire and other Mattresses, Coir, Fibre, Horsehair, Flocks, and every other Material for Bedding.

Blankets, Eugs, Counterpanes.

Sheeting, Waterproof ditto.

Flannels, Calicoes, Prints, Woollen Cloths of all qualities.

Corduroys, Fustians, &c.

Men and Women's Under and Upper Clothing.

Ready-made Garments, in all Sizes and for both Sexes.

Hats, Caps, Bonnets, &c.

Hosiery and Haberdashery.

Uniforms, &c.

FURNITURE, CARPETS, and every Requisite supplied on the Shortest Notice for Board Rooms, Offices, Masters' Houses, &c.

ILLUSTRATED CATALOGUES AND ESTIMATES FREE.

Secretaries and Clerks of Institutions are respectfully requested, when issuing Contracts, to forward a Form of Tender to ATKINSON & Co.

SPECIAL CATALOGUE POST FREE ON APPLICATION.

TREATMENT OF INEBRIATES—GENTLEFOLK ONLY.—Dr. STEWART, of "Dunmurry," Sneyd Park, near Clifton (Estd. 1876), and Mrs. S. (both total abstainers) receive as voluntary boarders in their family a few Ladies and Gentlemen of good social position anxious to be *permanently* cured of inebriety. Refined society. Bracing air. No "nervous" cases received. No legal formalities.

Telegrams: "Dr. STEWART, Dunmurry, Rockleaze, Bristol."

ALWAYS USE
REFLEX
FLOOR POLISH

REQUIRES NO MIXING WHATEVER.

Brilliantly Polishes Floors, Linoleums, Floorcloths, &c.

Economical, Cleanly, Healthful; Maximum of Lustre for Minimum of Labour.

GEO. T. COX & SONS, Ltd., 35, EASTCHEAP, E.C.

This Polish is specially adapted for use in Public Institutions and other large establishments. Samples Free on application.

COMPRESSED PAPER FANCY AND HOUSEHOLD GOODS.

Leading Asylum Superintendents who have tested these goods and found same most satisfactory and suitable for use in asylums (copies of their testimonials on inquiry) request us strongly to advertise our

**COMPRESSED PAPER FLOWER POTS, VASES, WALL
PLAQUES, TRAYS, and GENERAL FANCY GOODS**

in High-class Ornamental Finishes, or plain, suitable for Oil-painting purposes.

These articles are highly recommended for decorative purposes in Asylums.

**COMPRESSED PAPER HOUSEHOLD GOODS, BASINS, JUGS,
BUCKETS, TUBS, etc., stamped out in one piece.**

SPECIALITY: CHAMBERS WITH OR WITHOUT HANDLES.

BY USING THESE ARTICLES ALL ACCIDENTS ARE PREVENTED.

The goods are perfectly acid proof, almost indestructible, and wash like china.

SAMPLE ORDERS PROMPTLY EXECUTED.
