Plant Genetic Resources: Characterization and Utilization

Volume 11 2013 ISSN: 1479-2621

Aims and Scope

The journal provides a forum for describing the application of novel genomic technologies, as well as their integration with established techniques, towards the understanding of the genetic variation captured in both *in situ* and *ex situ* collections of crop and non-crop plants; and for the airing of wider issues relevant to plant germplasm conservation and utilisation. We particularly welcome multi-disciplinary approaches that incorporate both a technical and a socio-economic focus.

Technical aspects can cover developments in technologies of potential or demonstrated relevance to the analysis of variation and diversity at the phenotypic and genotypic levels; the development of rational germplasm collection, evaluation and conservation strategies; and the impact of crop genetic modification and biotechnology on plant genetic resources. Authors should note that the journal will not review submissions using the RAPD marker system, except where very large numbers of assays place a cost limitation on the analysis, or where RAPD data is combined with, and is co-analysed with other forms of descriptive data, which allows an objective means of assessing the credibility of the RAPDs.

Non-technical aspects can include ethical, legal, commercial and social issues of relevance, in particular relating to farmers' rights, intellectual property and ethnobotany.

Editor-in-Chief

Plant Genetic Resources Characterization and Utilization

Contents

In this Issue

<i>Robert Koebner</i>	1
Diversity and geographical gaps in <i>Cajanus scarabaeoides</i> (L.) Thou. germplasm conserved at the ICRISAT genebank <i>H. D. Upadhyaya, K. N. Reddy, R. P. S. Pundir, Sube Singh, C. L. L. Gowda and M. Irsbad Ahmed</i>	3
Distribution of downy mildew (<i>Bremia lactucae</i> Regel) resistances in a genebank collection of lettuce and its wild relatives <i>R. van Treuren, A. J. M. van der Arend and J. W. Schut</i>	15
Screening of wild and cultivated lentil germplasm for resistance to stemphylium blight <i>Rajib Podder, Sabine Banniza and Albert Vandenberg</i>	26
Correspondence between genetic structure and farmers' taxonomy – a case study from dry-season sorghum landraces in northern Cameroon <i>Clelia Soler, Abdoul-Aziz Saidou, Tuong Vi Cao Hamadou, Marco Pautasso, Jean Wencelius and H�el�ene H. I. Joly</i>	36
Genetic diversity among INERA-Mulungu (DR Congo) <i>Musa</i> spp. germplasm and their relatedness to those in Tanzania using numerical taxonomy <i>D. B. Nzawe, C. L. Rweyemamu and A. P. Maerere</i>	50
Portable search engine for registered crop germplasm: a new concept for enhancing access to information on plant genetic resources <i>Sunil Archak and Vikas Kumar</i>	62
Geographical distribution and phenotypic diversity of wild/weedy sorghum [<i>Sorghum bicolor</i> (L.) Moench] in Ethiopia: implications for germplasm conservation and crop–wild gene flow <i>Asfaw Adugna and Endashaw Bekele</i>	68
Phenotypic evaluation of the Chinese mini-mini core collection of peanut (<i>Arachis hypogaea</i> L.) and assessment for resistance to bacterial wilt disease caused by <i>Ralstonia solanacearum</i> <i>Huifang Jiang, Xiaoping Ren, Yuning Chen, Li Huang, Xiaojing Zhou, Jiaquan Huang, Lutz Froenicke, Jiujiang Yu, Baozhu Guo and Boshou Liao</i>	77
Short Communications	
Collection, characterization and olfactory evaluation of <i>Pandanus</i> species in Southern India <i>Rabul L. Zanan and Altafbusain B. Nadaf</i>	84
Anthocyanin indexes, quercetin, kaempferol and myricetin concentration in leaves and fruit of <i>Abutilon theophrasti</i> Medik. genetic resources <i>J. B. Morris and M. L. Wang</i>	87
Molecular distinction of two closely resembling <i>Morinda</i> species using <i>rbc</i> L and <i>mat</i> K loci for quality management of Indian herbal medicines <i>Rabul R. Nair, P. S. Udayan, S. Thilaga, M. Kavitha, R. M. Bharathanandhini, A. M. Nizzy and D. Ganesh</i>	90

Publisher: Katy Christomanou

Plant Genetic Resources: Characterization and Utilization is an international journal published tri-annually by Cambridge University Press in April, August and December on behalf of NIAB. The online edition is available at journals.cambridge.org/pgr.

Special sales and supplements:

This Journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The Journal also publishes proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at the Cambridge address above.

Subscription information:

The subscription rates for Volume 11, 2013 (3 issues) are:

Institutional subscription

Internet/Print Package £375.00/\$665.00 (Americas only)

Internet only £280.00/\$515.00 (Americas only)

Print only £350.00/\$595.00 (Americas only)

Any **supplements** to this Journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact CUP Publishing for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of

publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections Plant Genetic Resources USA address.

Information for Authors:

Please email manuscript (with any accompanying figures or tables) to the Journal Administrator Faye Kalloniatis at plantgeneticresources@googlemail.com

Notes for Authors are available on the internet at journals.cambridge.org/pgr

Offprints: The corresponding author of an accepted paper will receive a pdf offprint. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges or submission charges are levied by this journal.**
