# Advances in Animal Biosciences

## Management Board

Nigel Scollan (Chair), Richard Dewhurst (BSAS), Mike Steele (BSAS), Howard Simmins (BSAS), Andrea Rosati (EAAP), Eberhard von Borell (EAAP), Philippe Chemineau (EAAP), Nicolas Friggens (INRA), Stephane Ingrand (INRA), Jaap Van Milgen (INRA)

## Editor-in-Chief

Cledwyn Thomas, European Federation of Animal Science (EAAP)

## Aims and Scope

*Advances in Animal Biosciences* is an associated publication to the journal *animal*. It aims to publish high-quality conference, symposium and workshop proceedings about animal-related aspects of the life sciences with emphasis on farmed and other managed animals. These can be in the form of a book of abstracts, summaries or complete papers. The format will highlight the title of the meeting and organisations involved but the publications will have the added advantage of forming a series under *Advances in Animal Biosciences*.

Subject areas can include aspects of Breeding and Genetics, Nutrition, Physiology and Functional Biology of Systems, Behaviour, Health and Welfare, Livestock Farming Systems, Human Health and Product Quality.

However, due to the integrative nature of biological systems, monographs and conference proceedings dealing with the translation of basic and strategic science into the whole animal and farming system and the impact on Productivity, Product Quality, Food Security, the Environment, Climate Change and Humans will be particularly welcome.

## Information for Conference Organisers

The Animal Consortium together with Cambridge University Press offers conference organisers a package that enables publication of high-quality conference, symposium and workshop proceedings about animal-related aspects of the life sciences with emphasis on farmed and other managed animals.

Summaries, abstracts or full papers may be published in *Advances in Animal Biosciences* and high-quality invited papers from these meetings may be submitted and published as a defined series in *animal*.

Conference organizers interested in publishing their proceedings should send a proposal for publication in *Advances in Animal Biosciences*, *animal*, or both journals to [astleger-honeybone@cambridge.org](mailto:astleger-honeybone@cambridge.org) with the following information:

- Title and date of conference
- Contact person/guest editor
- Number of summaries/abstracts/full papers
- Total number of pages (estimated)
- Any colour printing requirements
- Number of hard copies or USBs required and form of distribution
- Target date for publication

A decision in principle will be made regarding the suitability for publication on the basis of your proposal, and the Special Issues Editor will provide a quote and agree any specific requirements or deadlines. Manuscripts submitted to *Advances in Animal Biosciences* will be reviewed by the Editor-in-Chief and papers submitted to *animal* will be peer reviewed. If accepted after review, proceedings will be published within 12 weeks of receipt by the Publisher.

# Animal pain: Identifying, understanding and minimising pain in farm animals

## Advances in Animal Biosciences

This issue is part of a series which is a companion to the journal ANIMAL

## CONTENTS

	PAGE
<i>Le Neindre, P. and Sabbagh, C.</i> Foreword	281
<i>Le Neindre, P. and Sabbagh, C.</i> Introduction	283
<i>Guichet, J.-L. and Latouche, K.</i> The question of animal pain: the issues for debate	285
<i>Serrie, A. and Servièrre, J.</i> Pain: definitions, concepts and mechanisms in humans and farm animals	297
<i>Leterrier, C. and Prunier, A.</i> How should pain in farm animals be assessed?	310
<i>Guatteo, R. and Guémené, D.</i> Sources of known and/or potential pain in farm animals	319
<i>Levionnois, O. and Mormède, P.</i> Means of reducing pain in farm animals	333
<i>Le Neindre, P. and Sabbagh, C.</i> General conclusions	343
