**JOURNAL OF LARYNGOLOGY,
 RHINOLOGY, AND OTOTOLOGY:**

A RECORD OF CURRENT LITERATURE

RELATING TO

THE THROAT, NOSE, AND EAR.

Printed and Published Monthly by

ADLARD & SON & WEST NEWMAN, Ltd., Bartholomew Close, London, E.C. 1.

A SAFE JUNKER'S INHALER

As made for MORRIS RIGBY, M.R.C.S., L.R.C.P.Lond., Capt., R.A.M.C.T.,
 Anæsthetist, Sussex County Hospital, and 2nd Eastern
 General Hospital, Brighton.

Can be used with safety in darkened rooms for Laryngological Operations, etc.

Rigby's Chloroform Inhaler complete in case £3 8s. 3d.
Rigby's Chloroform Bottle only £1 5s. 0d.

GRANDS PRIX:

Paris 1900, Brussels 1910, Buenos Aires 1910.

Gold Medal Allahabad 1910.

Manufactured by
DOWN BROS., LTD.,

Surgical Instrument Makers,
 21 & 23, ST. THOMAS'S ST., LONDON, S.E.
 (opposite Guy's Hospital.)

Telegrams:
 "DOWN, LONDON."

Telephone:
 Hop. 4400 (4 Lines)

Prepaid Annual Subscription, 30s. (8 dollars) post free.

Single Copies, Three Shillings.

ENTERED AT STATIONERS' HALL.

"We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions."—*British Medical Journal*, May 3, 1890.

LISTERINE

*A safe, non-poisonous, unirritating
antiseptic solution*

LISTERINE is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle, or douche, in catarrhal conditions of the nose and throat.

LISTERINE in proper dilution may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

LISTERINE embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria, and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

LISTERINE is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

LISTERINE in teaspoonful doses will often afford relief in fermentative dyspepsia, and is largely prescribed, with excellent results, in the various forms of diarrhoea occurring in infants and adults.

LISTERINE literature, including special pamphlets upon *Respiratory Diseases*, may be had, by physicians, upon application to

Immunisation against Hay Fever.

THE DEPARTMENT FOR THERAPEUTIC INOCULATION, ST. MARY'S HOSPITAL, LONDON, W., prepares for supply to the Medical Profession through the agency of Messrs. Parke, Davis & Co.

"POLLACCINE" (POLLEN VACCINE FOR HAY FEVER)

to be administered subcutaneously for the production of immunity to pollen toxin BOTH AS A PROPHYLACTIC AND CURATIVE OF HAY FEVER.

A HAY FEVER REACTION OUTFIT is also supplied, which affords a means of determining

- (a) whether a patient is susceptible to pollen toxin,
- (b) the degree of such susceptibility,
- (c) the dosage of "Pollaccine" suited to any case.

N.B.—The winter and early spring are the best seasons for administering prophylactic injections.

Further particulars will be supplied on request by

PARKE, DAVIS & CO., 80, Beak St., Regent St., **LONDON, W. 1.**

THE new volume of the *Medical Annual* is of unusual value and interest. The experiences gained by the War have produced advances in medical science and practice which, under ordinary conditions, would have required many years to reach.

This progress will be found chronicled in the *Annual*, and adapted in every way possible to the requirements of the practitioner.

From Press Notices.

British Medical Journal.—"Good reading, and an excellent investment."

Lancet.—"A valuable addition to the library of the Medical Practitioner; contains in one volume a practical summary of the progress of medicine during the past year."

Last year's volume was exhausted soon after publication, and, to avoid disappointment, early application advised for this issue.
