JOURNAL
OF THE
INSTITUTE OF ACTUARIES
STUDENTS' SOCIETY

VOLUME VIII, PART 3

January 1949

I maintain that the actuary should not abandon himself to mere empiricism; I maintain that he should be the person most suited to develop actuarial technique towards a practical end. In an actuarial department it is not a question of practical men and theoreticians: it is a question of practical men who do not know theory and practical men who do know it.
