## TEMPORAL BONE SURGICAL DISSECTION COURSE

OFFERED BY

THE DEPARTMENT OF OTOLARYNGOLOGY

THE UNIVERSITY OF MICHIGAN MEDICAL SCHOOL, ANN ARBOR, MICHIGAN

COURSE DIRECTOR: JOHN L. KEMINK, M.D.

**1990:**                    2-6 April                    14-18 May                    15-19 October                    12-16 November

Intensive one-week courses emphasize the surgical and anatomical approaches to the temporal bone, and are presented in a manner relevant for the otologic surgeon, utilizing lectures, videotapes, and dissection.

Mornings and afternoons are spent in the dissection laboratory, giving extensive drilling experience in temporal bone anatomy and surgical techniques. All instruments and high-speed handpieces will be provided.

Course fee is: Physicians \$1,000                    Residents \$750

**WORKSHOP ON TISSUE-INTEGRATED IMPLANTS  
IN CRANIO-FACIAL REHABILITATION  
MAXILLO-FACIAL PROSTHESES AND BONE-ANCHORED HEARING DEVICES**

by  
The Department of Otolaryngology, Sahlgren's Hospital, University of Göteborg, Sweden  
and  
The Institute of Applied Biotechnology, Göteborg, Sweden  
4-6 April, 1990

Conducted by Per-Ingvar Brånemark, M.D., Ph.D., and Anders Tjellström, M.D., Ph.D.

The workshop is focused on osseointegration of titanium implants and the possibility to establish and maintain a permanent reaction free skin penetration.

This three-day programme will cover:

- ☆ Principle aspects on osseointegration
- ☆ Implant material
- ☆ Bone biology and interface zone theories
- ☆ Tissue integration in ENT and Plastic surgery
- ☆ Surgical training in the bone lab
- ☆ Operations on patients with participants assisting
- ☆ Patient demonstrations
- ☆ Prosthetic rehabilitation procedures
- ☆ The Bone Anchored Hearing Aid
- ☆ A special nurse/technician programme.

Registration fees: Surgeon/Prostodontis US\$ 1,000  
Nurse/Technician US\$ 600

Deadline for registration, 1 March, 1990, but early registration is recommended as enrolment is limited.

**DILEMMAS IN OTOLOGY**  
by Mr A. G. Kerr, F.R.C.S.  
at the Royal Society of Medicine  
on Friday 2 March, 1990  
at 5.00 p.m.

in association with  
**THE INSTITUTE OF LARYNGOLOGY AND OTOTOLOGY**  
 are pleased to announce  
**THE 8th TEMPORAL BONE DISSECTION PRIZE**

The First Prize enables the winner to attend the Portmann Course in Microsurgery in Otolaryngology and Otoneurology at Bordeaux in July 1990.

The Second Candidate will receive Medical Books to the value of £150 and the Third Candidate to the value of £100.

Commemorative Ties are awarded for all bones included in the display.

Candidates eligible for this prize will be full-time SHO's, Registrars and Senior Registrars in clinical posts in Otolaryngology within the United Kingdom, and Consultants appointed after 1 January 1990.

Submissions should consist of two dried temporal bones:

- 1) Dissected to demonstrate the intra-temporal course of the facial nerve
- 2) Dissected according to the candidates' own choice.

The Winner will be announced at the meeting of the Otolaryngology section at the Royal Society of Medicine in May 1990.

The judges are: Mr Bernard Colman, Mr Stephen Richards and Mr Martin Bailey.

Further Information is available from Mr C. M. Bailey at the address below.

Entries must be sent to Mr C. M. Bailey (c/o the Department of Pathology), at the address below. All temporal bones must be transported according to the existing regulations, and must be received before 28 February 1990. No entries can be accepted after this date.

# Instructions to Authors

**Historical Articles.** Articles of this type are generally encouraged, but it is obvious that they have to provide some new information or interpretation, whether it be about a well-known person or for example an instrument associated with him, but those from within a Hospital's own department who have made a hitherto less well-known contribution would be welcome.

**Letters to the Editor.** This feature has been re-introduced to give those who wish to comment about a paper previously published within the Journal, an opportunity to express their views. Wherever possible, the original author is asked to add his further comment, thereby adding to the value of the contribution. Such letters should be sent as soon as possible after publication of each month's issue of the Journal in the hope of including them as soon as possible thereafter.

'Mini-papers, such as those which appear in the British Medical Journal, Lancet, or New England Journal of Medicine, will not be acceptable except on the rare occasion that they bring information of immediate interest to the reader.

**Pathology.** Articles which are of pathological interest with particular emphasis on the way the diagnosis was achieved now appear on a monthly or bi-monthly basis. It is hoped that clinicians will involve their pathologists in these reports, and all illustrations must be of first-class quality. Where a department, particularly those overseas, may not have such specialized facilities, it may be possible, if a block or several unstained sections are provided for our Adviser to produce or supplement the illustration submitted. Only contributions of particular pathological interest will be accepted.

**Radiology.** Short reports on cases in which the radiology has been crucial in the making of the diagnosis or the management of a particular case now appear on a monthly or bi-monthly basis. This spot is to encourage clinicians and radiologists to produce material of particular interest in the specialty and to encourage co-operation in this field. Only presentations with first-class illustrations can be accepted and these must emphasise a problem of unusual clinical interest.

**Short Communications.** This feature will be used on an occasional basis. Examples of material suitable for inclusion under this title would be, for example: a piece of work which was of clinical interest but had failed to produce findings which were of statistical significance; where an investigative technique has been applied to an allied field, not warranting a further in-depth description of its earlier application and methodology.

## Check List for Authors/Secretaries

1. Title page—Titles should be short with names of the authors, higher degrees only and the city/country. Details of the departments in which the authors work should be put lower down.  
An address for correspondence should be supplied together with the author who should receive this and this will ultimately appear beneath the list of references. If the paper was presented at a meeting, the details of this must be given and will be inserted at the bottom of the first page of the printed script.
2. Abstract—No paper will be accepted without this and it adds considerably to the Editor's time to have to write and request this if the paper is accepted.
3. To follow the instructions to Authors with the way in which the paper is set out. It is preferred that each section should start on a fresh page with double spacing and wide margins.
4. References must be in the Harvard system; to submit a paper using the Vancouver system is automatically to have it returned or rejected.
5. Two sets of illustrations must be included, one of half-plate size and the other with the width of 80 mm. Illustrations must be clearly labelled with the author's name on the reverse side and where appropriate with an arrow to give orientation.
6. Authors to check manuscript and references to see that these match up particularly for dates and spelling.
7. Title of Journals must be given in full with the date, volume number and first and *last* pages.
8. Consent to be obtained from a patient if a photograph of their face is to be reproduced.
9. If the author to whom correspondence is to be directed changes his address, he should let the Editorial Office know as soon as possible.
10. Page proofs will normally be sent out three months in advance and must be returned as soon as possible.
11. Authors should provide a Facsimile number (FAX) whenever possible to speed communication. The FAX number of the Editorial office is 01-224 1645. (N.B. the code for London will change to 071- in June 1990).
12. Manuscripts with tables only may be transmitted by FAX; those with graphic or visual illustrations, e.g. graphs, X-rays, pathology, electrical records (ENG, BSER etc) must continue to be sent by post; the quality of reproduction does not give sufficient accuracy of detail.
