

# ESSENTIAL READING FROM CHAPMAN AND HALL

## **Biochemical Adaptation in Parasites**

**C Bryant** and **Carol Behm** with a  
chapter by **Michael J Howell**

Many parasites occupy different environments during their life-cycles and therefore must possess suites of characteristics that can be expressed at the proper time. This book surveys present knowledge of parasite metabolism and shows how it reflects adaptation to a particular environment.

May 1989 c.220 pages  
Hardback 0-412-32530-6 c.£35.00

## **The Comparative Biochemistry of Parasitic Helminths**

Edited by **Eva Bennett**, **Carol Behm**  
and **C Bryant**

Provides a challenging assessment of current ideas on the subject with contributions by acknowledged world authorities. Topics of current concern rather than specialized data is reviewed.

May 1989 c.256 pages  
Hardback 0-412-32730-9 c.£30.00

## **Parasite Communities**

Edited by **Gerald W Esch**,  
**Albert O Bush** and **John M Aho**

This book identifies patterns and processes which explain structure in the specific helminth communities of both intermediate and definitive hosts. It also contains observations which add to the understanding of the overall ecological and evolutionary relationships of parasite communities.

October 1989 c.250 pages  
Hardback 0-412-33540-9 c.£30.00

*These books may be obtained from your usual bookshop. In case of difficulty please write to the address below or telephone the Order Department on 0264 332424*
