

SUBJECT INDEX

A

accretion	210, 219, 241, 364
age	117, 121
aggregates	85, 113
associations	1, 109, 226, 348
ASTRON	301

B

Balmer decrement	317, 321
Bok globules	226
broad-band radio observations	141
bursts	125, 139
BY Dra stars	189

C

catalog	101, 105
chromosphere	313, 317, 321
circular polarization	127, 179
circumstellar	
-disk	181
-dust	181
-shells	215, 293, 366
corona	126

D

decrement	317, 321
density	130, 300
disks	179, 181, 209, 240
dMe stars	49, 134
dust	181
dynamic spectra	134

E

EINSTEIN	159, 302
electron density	130, 300
electron-cyclotron masers	125, 139
energy transport	337
EXOSAT	147, 153, 302
extinction	293

F

flare	
-impulsive	148, 306, 313
-radio	125, 139, 145, 275, 302, 364, 382
-slow	9, 82, 109, 257, 377
-spike	27, 31, 33, 35, 132
-stellar	15, 25, 31, 41, 43, 49, 193, 209, 321, 333, 371
-thermal	155, 313
-X-ray	147, 153, 159, 302, 330, 363, 375
flare colours	44
flare heating	304
flare models	299, 321, 325, 329, 333
flare stars	1, 71, 81, 85, 105, 117, 121, 125, 139, 163, 209, 263, 321, 371
-new	67, 91, 93
flare statistics	17, 46, 50, 53, 59, 195, 322
frequency drifts	125
fuors	166, 229, 253, 257, 261

G

gas/dust complexes	271
globules	226
gyroresonant radiation	129
gyrosynchrotron radiation	125, 365

H

Hα emission	20, 82, 95, 153, 215, 300
heating	304
H₂O maser	271, 275
Herbig-Haro objects	165, 221, 225, 229, 279, 284

I

infrared excess	181, 287, 364
interferometry	126
IRAS	279, 283, 287
IR emission	283, 287
IUE	301, 314

J

jets	221, 245
-------------	----------

K

K-band photometry	381
kinetics	317, 321

L

- linear polarization 179, 185
- line profiles 219, 231, 316, 343, 386
- low mass stars 49, 347, 363
- Lorentz force 327, 337

M

- magnetic field 130, 179, 366, 374
- mass-age-activity relation 85
- mass loss 165, 215
- microflaring 148

N

- naked T Tau stars 185, 189
- narrow-band emission 134
- NLTE code 315
- non-thermal radiation 129, 365

O

- OSO III 153
- oscillations 143, 325, 379
- ouflow 166, 219, 267, 356, 375

P

- photographic observations 71, 77
 - chain method 81, 85
 - trail method 63, 67
- photometry 15, 19, 25, 31, 33, 35, 43, 49, 173, 177, 193, 253
 - H α , H β 25, 300
 - UBVRI 15, 19, 25, 27, 31, 33, 35, 41, 185, 215, 300
 - Walraven 37
- polarization 177, 179
 - linear 179, 185
 - circular 127, 179
- post-T Tau stars 6, 287
- precessing jet 221
- prominences 219, 325
- pulsation 125, 379

Q

quasi-periodic fluctuations	133
quiescent radio emission	128
quiescent X-ray emission	147

R

radio emission	125, 365
radio flares	125, 139, 145, 275, 302, 364, 382
radio observations	19, 125, 139
red dwarfs	41, 49, 55, 59, 121, 321, 347, 371
relaxation oscillations	143
rotation period	170, 175, 181, 185, 189

S

slow variations	55, 169, 173, 193
solitons	338
spectroscopy	19, 95, 99, 177, 219, 253, 293, 381
star clusters	1, 71, 109, 117, 350
star formation	347, 363
starspots	20, 55, 169, 174
stellar evolution	2, 117, 246

T

Taurus-Auriga complex	204, 283
thermal flare	155, 313
TiO feature	96, 100, 171
trail method	63, 67
T Tau stars	6, 81, 163, 169, 173, 179, 185, 189, 193, 209, 215, 219, 221, 226, 229, 257, 279, 284, 343, 363

U

U-filter monitoring	15, 25, 27, 31, 41, 49, 197, 300
UBV	33, 35, 43, 215
UBVRI	19, 185
unpolarized radio emission	128
uvby	194
UV Cet stars	1, 43, 59, 197, 299

V

variability	55, 148, 160, 169, 173
--------------------	------------------------

W

- Walraven photometry 37
wave solutions 337
winds 210, 243, 343

X

- X-ray emitters 363
X-ray flares 147, 153, 159, 302, 330, 363, 375

Y

- young stellar objects (YSO) 179, 354

Z

- z-pinch 304
