CORRIGENDUM

Mortality Projections using Generalized Additive Models with applications to annuity values for the Irish population – CORRIGENDUM

M. Hall and N. Friel

A drafting error has been found in this paper by Hall and Friel (2011). The projections reported in the paper were generated using the predict function for GAM models in the R package mgcv and not as referenced in the paper by Clements *et al.* (2005). The sentence at the top of page 22 should read: 'Model projections are based on extrapolating the smooth functions using the predict function for GAM models in the R package mgcv (see next paragraph for details) and evaluating at the required values of age, period and cohort.'
