Part 1. Invited Reviews and Contributed Presentations

Session 1: A census of the PostAGB stars and PN populations Chair: Arturo Manchado

Some Historical Notes	5
<i>S. Torres-Peimbert</i>	
Challenges faced by current Galactic planetary nebula surveys.....	11
<i>D. J. Frew</i>	
Post-AGB nebular studies.....	20
<i>E. Lagadec</i>	
Infrared studies of post-AGB stars and PNe	28
<i>K.-W. Suh</i>	
Planetary Nebulae in the UWISH2 Galactic Plane survey	32
<i>T. M. Gledhill & D. Froebrich</i>	
Exploiting the HASH Planetary Nebula Research Platform.....	36
<i>Q. A. Parker, I. Bojićić, D. J. Frew</i>	

Session 2: PNe as a versatile laboratory I

Chair: Michael Barlow

Photoionization models of Planetary Nebulae	43
<i>C. Morisset</i>	
Gaseous abundances in planetary nebulae: What have we learned in the past five years?.....	51
<i>G. Delgado-Ingla</i>	
The kinematical behavior of ORLs and CELs in PNe with [WC] central star	60
<i>The kinematical behavior of ORLs & CELs in PNe with [WC] central star</i>	
Imaging the elusive H-poor gas in planetary nebulae with large abundance discrepancy factors.....	65
<i>J. García-Rojas, R. L. M. Corradi, H. M. J. Boffin, H. Monteiro, D. Jones, R. Wesson, A. Cabrera-Lavers & P. Rodríguez-Gil</i>	
Close binary central stars and the abundance discrepancy - new extreme objects	70
<i>R. Wesson, D. Jones, J. García-Rojas, R. L. M. Corradi & H. M. J. Boffin</i>	

Atomic Data and Neutron-Capture Element Abundances in Planetary Nebulae	74
<i>N. C. Sterling</i>	
Abundances of Iron-Group Elements in Planetary Nebulae and Consequences for Chemical Enrichment	82
<i>H. L. Dinerstein, T. R. Geballe & N. C. Sterling</i>	
Stellar yields and abundances: new directions from planetary nebulae	86
<i>M. Lugaro, A. I. Karakas, M. Pignatari & C. L. Doherty</i>	
Understanding Galactic planetary nebulae with precise/reliable nebular abundances	95
<i>D. A. García-Hernández, P. Ventura, G. Delgado-Inglada, F. Dell'Agli, M. Di Criscienzo & A. Yagüe</i>	
³ He Abundances in Planetary Nebulae	99
<i>L. Guzman-Ramirez</i>	
X-ray Studies of Planetary Nebulae	104
<i>R. Montez Jr.</i>	
Analysis of the X-ray spectrum of the hot bubble of BD+30°3639	109
<i>D. Schönberner, R. Jacob, R. Heller & M. Steffen</i>	
Revealing the Location of the Mixing Layer in a Hot Bubble	114
<i>M. A. Guerrero, X. Fang, Y.-H. Chu, J. A. Toalá & R. A. Gruendl</i>	
Session 3: PNe as a versatile laboratory II	
Chair: Alberto Lopez	
Dust in planetary nebulae	121
<i>G. C. Sloan</i>	
Herschel observations of planetary nebulae	128
<i>G. C. Van de Steene</i>	
Magnetic fields in PNe and other evolved low-mass and intermediate-mass stars	136
<i>L. Sabin, Q. Zhang, Gregg A. Wade, A. Lèbre & R. Vázquez</i>	
Molecular studies of Planetary Nebulae	141
<i>Y. Zhang</i>	
GTC/CanariCam mid-IR imaging of the fullerene-rich planetary nebula IC 418	150
<i>J. J. Díaz-Luis, D. A. García-Hernández, A. Manchado, P. García-Lario, E. Villaver & G. García-Segura</i>	
Session 4: From the AGB to the WD stellar phases	
Chair: Miriam Pena	
Progress and Application of The Initial-Final Mass Relation	157
<i>J. D. Cummings</i>	
Modelling dust production in AGB stars	165
<i>F. Dell'Agli</i>	

Central Stars of Planetary Nebulae	169
<i>D. Jones</i>	
[WN] central stars of planetary nebulae.	174
<i>H. Todt, B. Miszalski, J. A. Toalá & M. A. Guerrero</i>	
New models for the evolution of central stars of planetary nebulae: Faster and Brighter	179
<i>M. M. M. Bertolami</i>	
The history of the Galactic bulge	184
<i>A. A. Zijlstra, K. Gesicki & M. M. M. Bertolami</i>	
The kinematics of the nebular shells around low mass progenitors of PNe with low metallicity	188
<i>M. Pereyra, J. A. López & M. G. Richer</i>	
Planet destruction and the shaping of planetary nebulae.	193
<i>L. A. Boyle & M. P. Redman</i>	
Session 5: The connection between binary evolution and PN phenomena	
Chair: Roberto Mendez	
Circumstellar spirals/shells/arcs: the message from binary stars.	199
<i>H. Kim</i>	
Common Envelope Evolution: Implications for Post-AGB Stars and Planetary Nebulae	207
<i>J. Nordhaus</i>	
Post-common envelope PN, fundamental or irrelevant?	213
<i>O. De Marco, T. Reichardt, R. Iaconi, T. Hillwig, G. H. Jacoby, D. Keller, R. G. Izzard, J. Nordhaus & E. G. Blackman</i>	
Where are the binaries in proto-planetary nebulae? Results of a long-term radial velocity study	218
<i>B. J. Hrivnak, H. Van Winckel, G. Van de Steene, D. Bohlender, J. Sperauskas & W. Lu</i>	
Binary interactions on the RGB: Dusty post-RGB stars	223
<i>D. Kamath, H. Van Winckel & P. Wood</i>	
Shaping planetary nebulae with jets in inclined triple stellar systems.	227
<i>M. Akashi & N. Soker</i>	
Post-AGB binaries as tracers of stellar evolution.	231
<i>H. Van Winckel</i>	
Session 6: PNe in nearby galaxies and chemical evolution	
Chair: Romano Corradi	
Abundances and gradients in nearby galaxies	237
<i>F. Bresolin</i>	

The evolution of the oxygen abundance radial gradient in the Milky Way Galaxy disk	245
<i>M. Mollá, O. Cavichia, R. D. D. Costa, W. J. Maciel, B. Gibson & A. I. Díaz</i>	
XSHOOTER spectroscopy of the enigmatic PN Lin49 in the SMC	254
<i>M. Otsuka, F. Kemper, M. L. Leal-Ferreira, I. Aleman, J. Bernard-Salas, J. Cami, B. B. Ochsendorf, E. Peeters & P. Scicluna</i>	
Abundances and Gradients in M31 – A Chemical Study of Planetary Nebulae in the Substructures	259
<i>X. Fang, R. García-Benito, M. A. Guerrero, X. Liu, Y. Zhang & H. Yuan</i>	
The Origins of Planetary Nebulae in the Inner and Outer Disks of M31	264
<i>B. Balick, K. Kwitter, R. Corradi, R. G. Rosillo & R. Henry</i>	
Session 7: PNe outside of the local group	
Chair: Letizia Stanghellini	
Planetary nebulae as kinematic tracers of galaxy stellar halos	271
<i>L. Coccato</i>	
The P.N.S ETG survey	279
<i>M. Arnaboldi, C. Pulsoni, O. Gerhard & P.N.S Consortium</i>	
Resolving the Disk-Halo Degeneracy using Planetary Nebulae	284
<i>S. Aniyan, K. C. Freeman, M. Arnaboldi, O. Gerhard, L. Coccato, M. Fabricius, K. Kuijken & M. Merrifield</i>	
The VIRGO PN population and the mass assembly in M87	288

Preface

Planetary nebulae are the spectacular products of low- and intermediate-mass stellar evolution. They are key laboratories for the understanding of atomic, molecular, dust and plasma processes in different astrophysical environments, they probe fundamental physics of single and binary star evolution, including nucleosynthesis, rotation, mass transfer and loss, and magnetic fields, and they trace stellar populations, kinematics and chemistry of galaxies including our own galaxy the Milky Way.

The planetary nebula community, now represented by IAU Commission H3 of Division H, has had a history of very successful IAU symposia, beginning in 1967 with IAU Symp. 34 held in Tatranska Lomnica (Czechoslovakia), followed in 1977 by IAU Symp. 76 in Ithaca, NY (USA), IAU Symp. 103 in London (England) in 1982, IAU Symp. 131 in Mexico City (Mexico) in 1987, IAU Symp. 155 in Innsbruck (Austria) in 1992, IAU Symp. 180 in Groningen (Holland) in 1996, IAU Symp. 209 in Canberra (Australia) in 2001, IAU Symp. 234 in Hawaii (USA) in 2006, and IAU Symp. 283 in Puerto de la Cruz (Spain) in 2011.

Following the endorsement and sponsorship by IAU Divisions and approved by the IAU Executive Committee in April 2015, the latest of this series of IAU Symposia of planetary nebulae, IAU Symposium 323: Planetary nebulae: Multi-wavelength probes of stellar and galactic evolution, was held in Beijing on October 10-14, 2016. This was the first time an IAU symposium on this topic was held in Asia. Over one hundred registered participants from seventeen countries attended the symposium, and interacted and discussed the wide range of topics related to the field. In total 17 invited reviews, 44 contributed talks and 36 posters were presented.

The meeting covers broad themes including new challenges to surveys of planetary nebula, AGB and post-AGB populations in the Milky Way, in the Local Group of galaxies and beyond, planetary nebulae as versatile laboratories for atomic, molecular, dust and plasma physics, stellar nucleosynthesis and chemical enrichment of the interstellar medium, hydrodynamic and radiative modeling of planetary nebulae, single and binary stellar evolution from the asymptotic giant branch to white dwarf stellar phases, magnetic fields, mass loss and mass transfer in binaries and connection to the planetary nebula phenomena, planetary nebulae in nearby galaxies as tracers of galactic dynamics and chemical evolution. In addition, two discussion sessions, each of one hour duration, were held on the topics "Modelling and data" and "Planetary nebulae and forefront instrumentation", moderated by specific SOC members and other scientists who are experts in these areas.

The programme was carefully put together by the Scientific Organizing Committee, consisting of Magda Arnaboldi (Germany), You-Hua Chu (China Taipei), Romano Corradi (Spain), Orsola De Marco (Australia), Adam Frank (U.S.A.), Amanda Karakas (co-chair, Australia), Karen Kwitter (U.S.A.), Sun Kwok (China Nanjing), Xiaowei Liu (co-chair, China Nanjing), Alberto Lopez (Mexico), Arturo Manchado (Spain), Roberto Mendez (U.S.A.), Quentin Parker (Australia), Miriam Pena (Mexico), Letizia Stanghellini (co-chair, U.S.A.), Albert Zijlstra (U.K.). The Committee made an early decision that, in order to help bring in early career speakers, no Committee members were invited to give a review talk. During the symposium, three of the Committee members, Orsola De Marco, Letizia Stanghellini, and Albert Zijlstra volunteered to run a best student poster competition. One first class, two second class and a number of encouragement awards were awarded, with generous prizes provided by the Local Organizing Committee. The activity was well received by all student participants.

The Local Organizing Committee, consisting of Bingqiu Chen, Jianning Fu, Biwei Jiang (co-chair), Stephen Justham (co-chair), Xiaowei Liu (co-chair), Juanjuan Ren, Jieling Yu, Juanjuan Ren and Haibo Yuan provided the local support. The symposium website was built and maintained by Jian Li. Ning Zhang provided indispensable logistic assistance. The symposium was operated by the Overseas Exchange Center of Peking University. The smooth and efficient operation of the symposium was widely and highly praised by the participants. As one of the participants commented afterwards, "Everything was outstanding. From the scientific program to the logistics assistance, the social activities and everything. The meeting was perfect."

Finally, it is a great pleasure to acknowledge the financial support from the International Astronomical Union, National Natural Science Foundation of China, National Astronomical Observatories of Chinese Academy of Sciences, and Peking University. The active involvement of members of the Scientific Organizing Committee, crucial for the success of the meeting, is also acknowledged.

Xiaowei Liu, Letizia Stanghellini, and Amanda Karakas
Co-chairs of Scientific Organizing Committee Beijing,
Rome, and Melbourne, February 2017

The Organizing Committees

Scientific

Magda Arnaboldi (Germany)	You-Hua Chu (China Taipei)
Romano Corradi (Spain)	Orsola De Marco (Australia)
Adam Frank (U.S.A.)	Amanda Karakas (co-chair, Australia)
Karen Kwitter (U.S.A.)	Sun Kwok (China Nanjing)
Xiaowei Liu (co-chair, China Nanjing)	Alberto Lopez (Mexico)
Arturo Manchado (Spain)	Roberto Mendez (U.S.A.)
Quentin Parker (Australia)	Miriam Pena (Mexico)
Letizia Stanghellini (co-chair, U.S.A.)	Albert Zijlstra (U.K.)

Local

Juanjuan Ren	Bingqiu Chen
Jianning Fu	Stephen Justham (co-chair)
Biwei Jiang (co-chair)	Jifeng Liu
Xiaowei Liu (co-chair)	Jieling Yu
Haibo Yuan	

Acknowledgements

The symposium was sponsored and supported by IAU Division H (Interstellar Matter and Local Universe), Division G (Stars and Stellar Physics), Division J (Galaxies and Cosmology), as well as by IAU Commission H3 (Planetary Nebulae).

The Local Organizing Committee operated under the auspices of School of Physics, Peking University.

Funding by the
 International Astronomical Union,
 National Natural Science Foundation of China,
 National Astronomical Observatories of Chinese Academy of Sciences,
 Peking University
 is gratefully acknowledged.

CONFERENCE PHOTOGRAPH**Part 1. Invited Reviews and Contributed Presentations**

1. SOC co-Chair Xiaowei Liu gives the welcome address

2. IAU President, and Planetary Nebula scholar, Silvia Torres-Peimbert delivers a very interesting introductory talk

3. Mike Barlow, SOC Member Arturo Manchado, and others are attentively following an interesting review

4. Participants discussing science during a break

5. SOC co-Chair Letizia Stanghellini enjoys coffee while discussing science with Invited Speaker Maria Lugaro

6. Astronomers connect with old and new friends and drink coffee

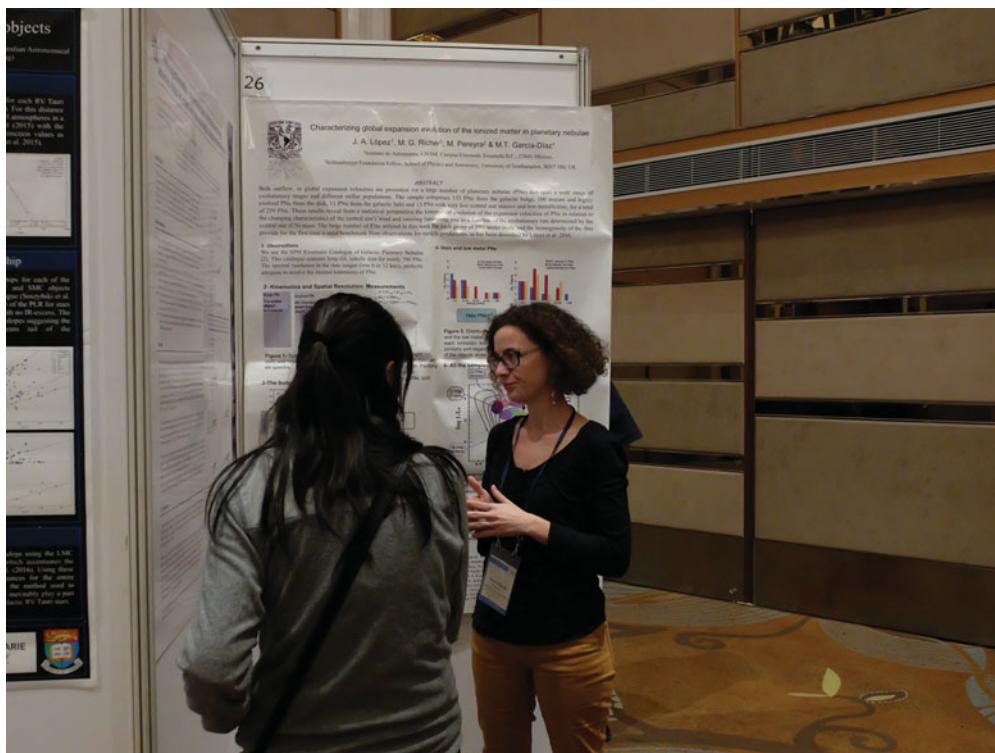

7. SOC Member Magda Arnaboldi and Devika Kamath at the coffee break

8. Invited speaker Flavia dell'Agli and Jorge Gardia-Rojas enjoying coffee break

Part 2. Poster Presentation

9. Invited speaker Gloria Delgado-Ingla views the posters

10. Poster viewing and science discussion
