## THE LOWNDES YATES OTOSCOPE

This instrument possesses the following features which meet the demands of Otologists and Practitioners making a study of the ear.

- (1) It affords binocular vision.
- (2) The lenses are interchangeable to suit the requirements of the Surgeon.
- (3) The angle of the malleus can be recorded on a scale before and after treatment.
- (4) The whole of the portion used for myringotomy is sterilisable.
- (5) The improved prism illumination is adapted so that the nasal cavities can also be examined as well as the throat.

The instrument is supplied attached to a dry battery either directly, or by means of a flex so that the battery may be carried in the pocket.

**PRICES:**

Complete with battery handle and rheostat, flexes for use with battery in pocket, two speculae, Siegle's bulb and one supplementary lens	£4 18 6
With handle and rheostat	£3 10 0
Spare Lamps	- 5s. od. each
Extra Speculae	- 5s. 6d. each
Extra Lenses	- 4s. 6d. each

*Announcing the New*  
**ILFORD**  
**FLUORAZURE**  
**INTENSIFYING SCREENS**  
(Levy-West)

Ilford Limited have pleasure in announcing the introduction of a new type of Intensifying Screen. This new screen possesses important advantages over Calcium Tungstate screens chiefly on account of its higher intensity of fluorescence. The Ilford Fluorazure screen is free from actinic after-glow, is very flexible and easily washable.

A brochure giving full particulars will be sent on application to

# GUY'S SILENT SUCTION APPARATUS

as made for

WM. MAYHEW MOLLISON, C.B.E., F.R.C.S.

“An efficient *silent* suction apparatus is essential in many throat investigations and operations and indeed is used for many operations on other parts of the body.

“The above illustration shows an Electric Suction Apparatus which can rightly claim to be more efficient than the apparatus generally in use. The suction is continuous and so powerful that clots of blood and the most tenacious mucus are quickly removed. The apparatus is quiet and can easily be moved about the operation theatre and from one theatre to another. It is possible to use it for intra-tracheal

insufflation at the same time as suction since the pump delivers sixty litres of air per minute. The valves in the cylinder head are strong and specially designed for silence in operation and the sump of the machine carries enough oil for six months' continuous use; this ensures efficiency with the minimum of attention. The entire unit is mounted in a robust mahogany case which is fitted with four rubber-tyred castors. On the side of the case two large screw necked bottles are mounted. These bottles are the commercial “Kilner” type and can therefore be replaced with the minimum of expense. Blood and other fluids are removed from the operating field by the suction plant and find their way into the big bottle. The second bottle is a safety trap in the unlikely event of the first bottle becoming full at a moment when it is inconvenient to change it.

“There are no resistances to regulate the speed and in order to use the apparatus it is only necessary to connect it to the main electrical supply.” The makers are Down Bros., Ltd., London.

## THROAT, NOSE AND EAR HOSPITAL

Near Piccadilly Circus  
LONDON, W.1

### HONORARY MEDICAL STAFF

SURGEONS: Mr. Lionel Colledge; Mr. Gilbert Chubb; Mr. F. Cunliffe Ormerod; Mr. A. R. Dingley; Mr. Gilbert H. Howells; Mr. J. F. Simpson.

ASSISTANT SURGEONS: Mr. J. C. Hogg; Mr. J. Roydon Peacock; Mr. J. P. Monkhouse.

Physicians: Dr. C. E. Lakin; Dr. H. C. H. Bull.

Neurologist: Dr. L. R. Yealland.

OPHTHALMOLOGIST: Mr. M. S. Mayou.

GENERAL SURGEON: Mr. J. B. Hunter.

DENTAL SURGEON: Mr. B. Mendleson.

RADIOLOGIST: Dr. Hope.

ANÆSTHETISTS: Dr. G. I. Moriarty; Dr. A. W. Matthew; Dr. S. Coffin; Dr. J. H. T. Challis; Dr. F. Longhurst; Dr. D. Lewis; Dr. G. Hochschild; Dr. G. Edwards; Dr. Blair Gould.

The Hospital has 100 Beds for In-patients and an annual Out-patient attendance of over 60,000.

### CLINICAL INSTRUCTION

Clinical instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is given in the Out-patient Department from 2 to 5 p.m. daily, and on Tuesdays and Thursdays from 6 to 9 p.m. also. Major operations are performed every morning and afternoon, except Saturdays, in the In-patient Operating Theatres. Minor operations are performed in the Out-patient Operating Theatre on three mornings a week.

Practitioners and Medical Students are admitted to the practice of the Hospital as Post-Graduates. Clinical Assistants, whose duty it is to assist the staff, are appointed as vacancies occur.

For further information apply to the Dean: GILBERT H. HOWELLS.

## ABSCESS OF THE BRAIN

ITS PATHOLOGY, DIAGNOSIS AND TREATMENT

By **E. MILES ATKINSON, M.B., B.S.(Lond.), F.R.C.S.(Eng.)**

*Jacksonian Prize Essayist, 1926; Hunterian Professor, R.C.S., 1927-28.*

*THE MEDICAL TIMES :*

"This is a most valuable monograph . . . . The author is a master of his subject, and has spared no pains to impart his knowledge clearly and precisely to his readers. It must be a long time before such a classic as this is presented to the medical profession."

*NURSING TIMES :*

It is certainly a most skilful piece of work . . . . . He deals with the pathology, diagnosis and treatment of this condition in a manner which no one has succeeded in doing just quite so well before."

*THE PRACTITIONER :*

"The book should be read with interest and profit by general practitioners as well as by surgeons."

*Illustrated with 8 colour plates, 25 photographs, 12 drawings. Large Deny 8vo. 21s. net.*

# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

*United States of America*

Orders for this Journal, for single parts or yearly subscriptions, may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York.

Please mention *The Journal of Laryngology* when replying to advertisements

## BINDING

### Journal of Laryngology & Otology

Subscribers wishing to have their Journals bound can do so by sending them to the Publishers.

Volumes are strongly bound in whole dark blue buckram cases, with gilt tops and gold lettering on spine. The cost of binding is 8s. 6d. per volume including postage.

Any missing parts can be supplied at 4s. each, or the whole volume, complete in the above binding, for 45s. 6d.

Publishers' cases can be supplied for 3s. 6d.

**HEADLEY BROTHERS, 109 KINGSWAY, LONDON, W.C.2**

## BACK NUMBERS OF

### Journal of Laryngology & Otology

Back numbers of most issues of this Journal since 1900 can be obtained from Headley Brothers, 109 Kingsway, London, W.C.2. The following, however, are out of print, and no stock is at present available:

1902. February.	1921. January to June.
1914. August.	1924. January to March, July to December.
1920. January and August.	1931. October.

If any subscribers have any of these copies which they do not need, it would be greatly appreciated if they would return them to the Publishers who will refund the full published price.

# TONSILLITIS · LARYNGITIS PHARYNGITIS

---

---

**A**CUTE affections of the pharynx and larynx are responsive to treatment with Antiphlogistine Dressing.

When applied from ear to ear as hot as can be comfortably borne, its anodyne and analgesic actions serve to relieve the congestion and local discomfort.

It is a most satisfactory therapeutic measure for the treatment of those conditions where the application and maintenance of prolonged moist heat is indicated.

ACTUAL  
SIZE

THE  
"MILLETT"  
ATOMISER

If you have been reluctant about using an Atomiser in the past because of the obvious disadvantages (awkwardness in use, difficulty of cleaning the containers, etc.), or if you hesitated to recommend them owing to their high cost . . . Study the Millett. Glance at the illustration, note its most important features, and its advantages should be sufficiently obvious without further comment, except perhaps to state that, as with all Millett products, atomisation is as complete for the heavy viscid oils as the more volatile aqueous solutions.

Model "N" (as illustrated) is specially designed for treatment of the nose and throat.

Model "U" is for more general and nasal use, and generously priced at 2s. 6d.

Model "G" specially designed for Gynecological treatment at 7s. 6d.
