
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 75, 2022, which includes print and electronic access, is £759 (USA, Canada and Mexico US \$1368) and includes delivery by air; single parts are available at £140 (USA, Canada and Mexico US \$252) plus postage. The electronic-only price available to institutional subscribers is £570 (USA, Canada and Mexico US \$1041). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

THE JOURNAL OF NAVIGATION

VOLUME 75 • NUMBER 4 • JULY 2022

CONTENTS

- Web-based nautical charts automated compilation from open hydrospatial data** 763
Stilianos Contarinis, Byron Nakos, Lysandros Tsoulos and Athanasios Palikaris
- Research on a modeling method of wing deformation under the influence of separation and compound multi-source disturbance** 784
Zhuangsheng Zhu, Yaxin Gao, Hao Tan, Yue Jia and Qifei Xu
- Determination of latitude by two fixed-altitude sightings** 805
Brian Villmoare
- Remote use of shiphandling simulator: BRM skill acquisition** 813
Seta Hiroaki, Yoshino Shingo, Takashima Kyoko and Unno Teppei
- A novel partial ambiguity resolution based on ambiguity dilution of precision- and convex-hull-based satellite selection for instantaneous multiple global navigation satellite systems positioning** 832
Xin Liu, Shubi Zhang, Qiuzhao Zhang, Nanshan Zheng, Wenyan Zhang and Nan Ding
- A mixed single- and dual-frequency quad-constellation GNSS precise point positioning approach on Xiaomi Mi8 smartphones** 849
Yanjie Li and Changsheng Cai
- A Doppler enhanced TDCP algorithm based on terrain adaptive and robust Kalman filter using a stand-alone receiver** 864
Kefan Shao, Zengke Li, Zhehua Yang, Zan Liu and Yaowen Sun
- A fast and accurate transfer alignment method without relying on the empirical model of angular deformation** 878
Jie Yang, Xinlong Wang, Xiaokun Ding, Qing Wei and Liangliang Shen
- Dual-channel LIDAR searching, positioning, tracking and landing system for rotorcraft from ships at sea** 901
Tao Zeng, Hua Wang, Xiucong Sun, Hui Li, Zhen Lu, Feifei Tong, Hao Cheng, Canlun Zheng and Mengying Zhang
- Rapid star identification algorithm for fish-eye camera based on PPP/INS assistance** 928
Chonghui Li, Yuanxi Yang, Guorui Xiao, Zhanglei Chen, Shuai Tong and Zihao Liu
- A hybrid indoor/outdoor detection approach for smartphone-based seamless positioning** 946
Yuntian Brian Bai, Lucas Holden, Allison Kealy, Safoura Zaminpardaz and Suelynn Choy
- Detection of abnormal ship trajectory based on the complex polygon** 966
Jinxian Weng, Guorong Li and Yahui Zhao
- Study on site selection for a cruise home port in the Yangtze River Delta region from the perspective of safety** 984
Zhaoqian Su and Yingjie Xiao
- Communication-constrained cooperative bathymetric simultaneous localisation and mapping with efficient bathymetric data transmission method** 1000
Teng Ma, Wenjun Zhang, Ye Li, Yuxin Zhao, Qiang Zhang, Xiaojun Mei and Jijia Fan
