

### **Scope of the Journal**

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

### **Submission of manuscripts**

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

### **Join the Mineralogical Society today**

If you are a regular reader of Clay Minerals consider joining the Society and receiving your own copy four times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at [www.minersoc.org](http://www.minersoc.org). Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

### **Mineralogical Society Journals**

#### *Mineralogical Magazine*

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

#### *Clay Minerals*

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

### **Copyright**

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

## CONTENTS

### Articles

- ABDELMALEK BAGHDAD, REKIA BOUAZI, YUCEF BOUFTOUHA, FRÉDÉRIC HATERT and NATHALIE FAGEL: Characteristics and firing behaviour of the under-Numidian clay deposits from the Jijel region (northeast Algeria): potential use in the ceramics industry 325
- MOHSEN SHEYDAEI, ALI BALANEJAD GASEMSOLTANLU and ASADOLLAH BEIRAGHI: Optimization of ultrasonic-assisted copper ion removal from polluted water by a natural clinoptilolite nanostructure through a central composite design 339
- BRAHIM AYADEN, NOUARA BENABDESLAM, NEDJIMA BOUZIDI, LAILA MAHTOUT, MOHAMED BOUNOUALA and DJOUDI MERABET: Natural mordenite-rich tuff as an alternative for removing textile dyes (Asucryl red): adsorption properties, kinetic and equilibrium studies 349
- MALIHE SARABADAN, HADIS BASHIRI and SEYED MAHDI MOUSAVI: Adsorption of crystal violet dye by a zeolite-montmorillonite nano-adsorbent: modelling, kinetic and equilibrium studies 357
- MAJA MILOŠEVIĆ, PREDRAG DABIĆ, SABINA KOVAČ, LAZAR KALUĐEROVIĆ and MIHOVIL LOGAR: Mineralogical study of clays from Dobrodo, Serbia, for use in ceramics 369
- HICHAM NASRI, ALI AZDIMOUSA, KAMAL EL HAMMOUTI, ABDELILAH EL HADDAR and MERIAM EL OUAHABI: Characterization of Neogene marls from the Kert Basin (northeast Morocco): suitability for the ceramics industry 379
- ALEKSANDER NIKOLOV, HENK NUGTEREN, OGNJAN PETROV, IVAN ROSTOVSKY, TANYA PETROVA and ZLATKA DELCHEVA: Synthesis of natural zeolite agglomerates: clinoptilolite-based geopolymers through aluminate activation 393
- ELEANOR M. OLEGARIO, KATHRINA LOIS M. TAACA, JOHN CHRISTOPHER LAWRENCE MORILLO and HERMAN D. MENDOZA: Optimized chemical preconditioning of Philippine natural zeolites 401
- GUO-SHENG XIANG, WEI-MIN YE and LI-YONG LV: Swelling characteristics of bentonite after long-term dissolution in alkaline solution 409
