Heating and Compression of Thermonuclear Targets by Laser Beam

Edited by N. G. BASOV

Translated by R. DRAGILA and B. LUTHER-DAVIES

Laser fusion is under study in laboratories world-wide because of its possible impact on energy production from controlled thermonuclear fusion reactions. This book describes the essential process associated with laser thermonuclear synthesis and summarises the most important developments to occur during the second half of the 1970s and in the early 1980s.

'... a comprehensive survey of recent investigations on laser fusion...'

Laser and Particle Beams

Instabilities in Space and Laboratory Plasmas

DONALD B. MELROSE

This book is an introductory account of instabilities in plasmas which will bridge the gap between textbooks and specialist monographs. Concentrating on laboratory plasmas, such as those encountered in fusion research, and the space plasmas studied in physics of the magnetosphere and solar atmosphere, this account stresses the similarities between the two and provides a wider perspective of the subject.

280 pp. 1986 0 521 30541 1 £35.00 net

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge
Silver Street, Cambridge CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California, 94305, USA*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92093, USA*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/86/2828-0001 \$05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022.

Three parts form a volume. The subscription price (which includes postage) of volumes 35 and 36 (1986) is £80.00 net per volume (US \$197.50 in the USA and Canada) for institutions; £40.00 (US \$98.75) per volume for individuals. Single parts cost £28.00 each (US \$70.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *Postmaster*: send address changes in USA and Canada to Cambridge University Press, 32 East 57th Street, New York, NY 10022.

CONTENTS TO VOLUME 36

PART 1 AUGUST 1986

The intrinsic electromagnetic solitary vortices in magnetized plasma. J. LIU and W. HORTON	1
On the formation of periodic and solitary whistler envelopes. G. MANN	25
Stimulated Raman scattering from a fully focused relativistic electron beam in a waveguide. R. A. SCHILL and S. R. SESHADRI	37
Kinematic and temperature restrictions on the electron cyclotron maser instability. P. A. ROBINSON	63
Criteria governing ion-acoustic waves in two-ion plasmas. I. M. A. GLEDHILL and M. A. HELLBERG	75
Three-wave coupling coefficient in a drifting bi-Maxwellian plasma. R. BERGMANN	97
Nonlinear Landau damping of purely perpendicular Bernstein modes. S. RIYOPOULOS	111
A macroscopic interpretation of Landau damping. V. V. SUBRAMANIAM and W. F. HUGHES	127
Self-interaction of compressional hydromagnetic waves in a cylindrical plasma-filled waveguide. B. GHOSH and K. P. DAS	135
Nonlinear surface waves on a thin plasma layer. I. ZHELYAZKOV, T. VODENICHAROVA and M. Y. YU	143

PART 2 OCTOBER 1986

Thermal relaxation of light dilute particles in a heat bath: a model problem. A. J. M. GARRETT	151
Stimulated Brillouin scattering of an Alfvén wave in low-density plasmas. K. M. JAIN, M. BOSE, S. GUHA and D. P. TEWARI	189
Quantum-kinetic theory of free electron lasing in a spatially periodic longitudinal electrostatic field by a relativistic electron beam. S. H. KIM	195
New terms in MHD equations and their implications for the inertial confinement fusion concept. S. K. H. AULUCK	211
Theory of thermal solitary vortices in current-carrying edge plasmas. J. P. MONDT and J. LIU	235

Magnetohydrodynamic standing oscillations in a spherical dipole field. H. MURATA	243
Energy variations at the onset of the tearing instability. G. TORRICELLI-CIAMPONI	251
Reactive and resistive nonlinear instabilities. D. B. MELROSE	269
Thermodynamic approach to transport scalings in tokamaks. T. YAMAGISHI	281
Nonlinear excitation of electron-acoustic waves. H. SALEEM and G. MURTAZA	295
Effect of ion temperature on ion-acoustic solitons in a two-ion warm plasma with adiabatic positive and negative ions and isothermal electrons. S. G. TAGARE	301
PART 3 DECEMBER 1986	
Collisional transport for a superthermal ion species in magnetized plasma. F. COZZANI and W. HORTON	313
Nonlinear bound on unstable fluctuation level in low-density non-neutral plasma. R. C. DAVIDSON and K. T. TSANG	329
Relationship between directions of wave and energy propagation for cold plasma waves. Z. E. MUSIELAK	341
Collisionless evolution of ion distributions in the presence of ion cyclotron resonance heating. D. ANDERSON, L.-G. ERIKSSON and M. LISAK	357
Stimulated Brillouin scattering of whistler waves in low-density collision- less plasmas. S. GUHA and C. BASU	371
On the propagation of half-gyrofrequency whistler-mode waves in the magnetospheric plasma. N. OHMI and M. HAYAKAWA	379
Nonlinear aspects of collective, electromagnetic interactions in magnet- ized plasmas with anisotropic protons and isotropic alpha particles. S. CUPERMAN, L. OFMAN and M. DRYER	387
A model problem for thermal relaxation. Part 2. A. J. M. GARRETT	407
Models of laser-plasma ablation. Part 2. Steady-state theory: self- regulating flow. G. J. PERT	415
Electromagnetic modulations of electron whistlers in plasmas. L. STENFLO, M. Y. YU and P. K. SHUKLA	447
Electron hole and electron wave excitation in a plasma with transverse effects. S. IZUKA and H. TANACA	453
New electromagnetic hot plasma waves around electron cyclotron harmonics. K. MATSUDA	465
AUTHOR INDEX TO VOLUME 36	473
