"A masterful, pacesetting drama. It combines moments of pain, poignancy, beauty, and hope. It is the most compelling work of its kind since Tennessee Williams' 'The Glass Menagerie.'"—*Variety*

"It is alive with thought and feeling, compassion informed by insight and humor reinforcing a sane view of life which sees the agony of waste and the difficult beauty of hope." — JACK KROLL, *Newsweek*

"The play itself is one of the lucky blooms; it survives, and is beautiful. With it, Mr. Zindel becomes one of our most promising new writers." — WALTER KERR, *The New York Times*

Toward Dramatic Illusion

*Theatrical Technique and Meaning from
Hardy to Horace*

by T. J. Reiss

This analysis of the crucial changes which occurred in the French theater of 1600-50 approaches the dramatic text as one element in an artistic whole which also encompasses physical and verbal acting, scenic decoration, and the emotional and intellectual predispositions of the spectators. Reevaluating the dramaturgy of this experimental period, which has too often been viewed from the misleading perspective of the so-called classical theater, Mr. Reiss examines closely a few plays and refers to many more.

In discussing the plays of Alexandre Hardy, Mr. Reiss focuses on the semiliturgical atmosphere, largely created by language, within which the problematic continuance of pre-Renaissance themes is suggested. He then turns to the work of such experimenters as Tristan, Scudéry, Monlëon, Mairet, and Rotrou, devoting particular attention to their use of the various theatrical elements which force the spectator to become conscious of the unreliability of his own perceptions. He finds echoes of the philosophical and social issues raised by such drama in the critical writings of the period, and he portrays Corneille's development up to and including *Horace* as a movement toward the classical style, marked by stable handling of language, characters, and events in moral or social rather than metaphysical terms. \$7.50
