

people

*A quarterly magazine on
population and development*

Editor John Rowley

In its 10 years of publication *People* has established itself as a leading international magazine reporting on population dynamics and the related questions of food, employment, health care, education and the threatened environment.

It takes as its starting point the need to balance population with available resources, investigating in detail individual nations' attempts to develop population policies and family planning services as part of their development planning, and recording the conditions and opinions of their peoples.

People is primarily concerned with the human aspects of development, publishing in-depth reports of programmes and projects in Asia, Africa and Latin America.

If you want to keep in touch with the relationship between human numbers and human needs, order your subscription to *People* today. Complete the coupon below and send it, with your payment, to Liz Gradley, Longman Group Limited, Westgate House, Harlow, Essex CM20 1NE, England.

ANNALS OF BOTANY

Edited For The Annals Of Botany Company By

D. F. Cutler (Chairman), A. J. Abbott, J. A. Bryant, J. A. Callow, A. F. Dyer, P. B. Gahan, J. R. Hillman, J. Moorby, K. G. Moore, J. D. Dodge (Secretary)

Members Of The Company

J. Heslop-Harrison (Chairman), J. D. Dodge (Secretary and Treasurer), L. J. Audus, W. G. Chaloner, D. F. Cutler, J. E. Dale, J. L. Harper, J. M. Hirst, G. N. Thorne

Annals of Botany is a journal that gives broad coverage to all aspects of Botany. It emphasizes current research in growth physiology and plant structure. The journal attracts short communications, research papers and longer articles that are essential reading for research workers who aim to keep abreast of their own related subjects. Book reviews are also published.

**Publication: Monthly, Subscription: Volumes 55, 56, 1985
£101.00 (UK)/\$246.00 (overseas)**

Recent Contents:

Fife, D. N. and Nambiar, E. K. S. Movement of Nutrients in Radiata Pine Needles in Relation to the Growth of Shoots.

Shirreffs, D. A. and Bell, A. D. Rhizome Growth and Clone Development in *Anemone nemorosa* L.

Hahn, B. D. A Mathematical Model of Leaf Carbon Metabolism.

Lazzeri, P. A. and Dunwell, J. M. *In vitro* Shoot Regeneration from Seedling Root Segments of *Brassica oleracea* and *Brassica napus* Cultivars.

Lazzeri, P. A. and Dunwell, J. M. Establishment of Isolated Root Cultures of *Brassica* Species and Regeneration from Cultured-root Segments of *Brassica oleracea* var. *italica*.

Smirnov, N., Todd, P. and Stewart, G. R. The Occurrence of Nitrate Reduction in the Leaves of Woody Plants.

Hama Rashid, A. and Halloran, G. M. Influence of Photoperiod on Culm Elongation and Apical Development in Semi-dwarf and Standard-height Wheats

McLaren, J. S. Investigation of Quantitative Relationships in Dry Matter Distribution Between Tops and Storage Roots in Sugar-beet.

Wheeler, A. W. and Lord, K. A. Foliar Uptake and Movement of Chlormequat in Cereals: Influence of Dose and Addition of Related Chemicals.

Atkinson, C. J. Quantum Flux Density as a Factor Controlling the Rate of Growth, Carbohydrate Partitioning and Wood Structure of *Betula pubescens* Seedlings.

Garrity, D. P., Vidal, E. T. and O'Toole, J. C. Genotypic Variation in the Thickness of Silica Deposition of Flowering Rice Spikelets.

Gad, A. E. and Aloni, R. Time Course and Polarity of Primary Phloem Fibre Differentiation in *Pisum sativum*.

Mann, D. G. Observations on copulation in *Navicula pupula* and *Amphora ovalis* in Relation to the Nature of Diatom Species.

Argall, J. F. and Stewart, K. A. Effects of Decapitation and Benzyladenine on Growth and Yield of Cowpea [*Vigna unguiculara* (L.) Walp.]

Oryx Editorial Board

Dr Jacqui Morris (Chairman)	Dr David Macdonald Professor R.D. Martin
Dr Keith Banister	Fergus O'Gorman
Mrs Maisie Fitter	Dr John Sparks
Brian Jackman	Edward Wright

Notes for contributors

Oryx publishes original articles and reports dealing with the conservation of species and habitats throughout the world, with particular emphasis on those that are endangered.

Contributions should be concise but informative, normally in English. Articles should be as short as possible, preferably under 2500 words, and very short articles are acceptable.

Manuscripts should be typed on one side only and double-spaced on A4 paper (208×298 mm). The left-hand margin must be at least 40 mm wide.

Two copies should be submitted if possible.

Footnotes should be avoided but if necessary should be indicated with asterisks in the text.

References in the text should give the author's name with the year of publication in parentheses. The reference list should be in alphabetical order and include the full title. References should be given according to the abbreviations in the World List of Scientific Periodicals.

Illustrations are welcomed and ideally should be glossy, black-and-white whole plate prints. Good colour slides are acceptable if black-and-white photographs are not available.

Line drawings and maps should be in black ink on strong white or translucent paper. Lettering on maps should not be handwritten.

Captions for figures should be typed consecutively on a separate sheet.

Scientific names should be underlined and not placed in brackets. Species' names should follow a named checklist, which should be mentioned in a covering letter where there is a risk of confusion.

The first time a species is mentioned its scientific name should be given. English names should be lower case throughout except where they incorporate the name of a particular country.

The author's name and postal address should follow any acknowledgments and references at the end of the article.

Edited manuscripts are sent so that corrections can be made before typesetting. Authors should check these carefully since corrections at galley stage are expensive. Galley proofs will be sent to the author for approval before going to press if time permits.

Fifty reprints are supplied free; additional copies are supplied at cost.

All correspondence to Dr Jacqui Morris, Editor of *Oryx*, Fauna and Flora Preservation Society, 8–12 Camden High Street, London NW1 0JH, UK.
