

PROCEEDINGS

of the

GLASGOW MATHEMATICAL ASSOCIATION

Published with the support of the University Court of the University of Glasgow

CONTENTS

D. A. R. Wallace , On the commutativity of the radical of a group algebra	1
S. Sankaran , Continuous sums of measures and continuous spectra	9
Pawan Kumar Kamthan , Proximate order (R) of entire functions represented by Dirichlet series (IV)	15
Lowell W. Beineke and Frank Harary , Inequalities involving the genus of a graph and its thicknesses	19
Robert Bumcrot , On lattice complements	22
J. H. E. Cohn , Lucas and Fibonacci numbers and some diophantine equations	24
R. C. Thompson , Generalizations of a well-known result in matrix theory	29
J. W. Moon , On minimal n -universal graphs	32
T. T. West , The spectra of compact operators in Hilbert spaces	34
E. M. Wright , An extension of a theorem of Gordon	39
Jet Wimp , Two integral transform pairs involving hypergeometric functions	42
Prem Narain , A note on an asymmetric mixed boundary value problem for a half-space with a cylindrical cavity	45
I. N. Sneddon , The stress on the boundary of an elastic half-plane in which body forces are acting	48
W. A. Al-Salam and L. Carlitz , A note on the Hardy-Hille and Mehler formulas	55

EDINBURGH: TWEEDDALE COURT

LONDON: 39A WELBECK STREET, W.1

PROCEEDINGS OF THE GLASGOW MATHEMATICAL ASSOCIATION

THE *Proceedings* are published in Parts and issued twice yearly in January and July. Four Parts complete a Volume of approximately 200 pages, and the Title Pages and Index are published in Part 4 of each Volume.

The prepaid subscription for each Volume is Sixty Shillings (U.S.A. \$10.00), post free. Single Parts may be supplied at a cost of Fifteen Shillings each (U.S.A. \$2.50), net.

Copies may be ordered direct from the publishers or from any bookseller.

Information for Contributors

While the *Proceedings* are intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Proceedings*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for off-prints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:

The University Press, Glasgow, W. 3*

CONTENTS

Allenby, R. B. J. T. Adjunction of roots to nilpotent groups	109
Al-Salam, W. A. and Carlitz, L. A note on the Hardy-Hille and Mehler formulas	55
Beineke, Lowell W. and Harary, Frank. Inequalities involving the genus of a graph and its thicknesses	19
Blyth, T. S. \wedge -distributive Boolean matrices	93
Bumcrot, Robert. On lattice complements	22
Carlitz, L. <i>See</i> Al-Salam, W. A. and Carlitz, L.	
Chen, Yung-Ming. Some integrability theorems	101
Clark, W. Edwin. Affine semigroups over an arbitrary field	80
Cohn, J. H. E. Lucas and Fibonacci numbers and some diophantine equations	24
Dey, I. M. S. Schreier systems in free products.	61
Earl, J. P. and Shackell, J. R. Note on the region of overconvergence of Dirichlet series with Ostrowski gaps	169
Farahat, H. K. The semigroup of doubly-stochastic matrices	178
Geddes, A. and Walker, R. G. The structure of cancellative power-free groups	199
Harary, Frank. <i>See</i> Beineke, Lowell W. and Harary, Frank.	
Howie, J. M. and Lallement, G. Certain fundamental congruences on a regular semigroup	145
Jensen, C. U. A remark on the distributive law for an ideal in a commutative ring	193
Kamthan, Pawan Kumar. Proximate order (R) of entire functions represented by Dirichlet series (IV)	15
Lallement, G. <i>See</i> Howie, J. M. and Lallement, G.	
Leavitt, W. G. <i>See</i> Peinado, R. E. and Leavitt, W. G.	
Maddox, I. J. Generalized Cesàro means of order -1	119
Moon, J. W. On minimal n -universal graphs	32
Munn, W. D. and Reilly, N. R. Congruences on a bisimple ω -semigroup	184

Narain, Prem. A note on an asymmetric mixed boundary value problem for a half-space with a cylindrical cavity	45
Peinado, R. E. and Leavitt, W. G. The maxit and minit of a ring	128
Ragab, F. M. and Simary, M. A. Integrals involving E -functions	174
Rankin, R. A. Isomorphic congruence groups and Hecke operators	168
Reilly, N. R. Bisimple ω -semigroups	160
Reilly, N. R. <i>See</i> Munn, W. D. and Reilly, N. R.	
Sankaran, S. Continuous sums of measures and continuous spectra	9
Shackell, J. R. <i>See</i> Earl, J. P. and Shackell, J. R.	
Simary, M. A. <i>See</i> Ragab, F. M. and Simary, M. A.	
Sneddon, I. N. The stress on the boundary of an elastic half-plane in which body forces are acting	48
Sneddon, I. N. The Reissner-Sagoci problem	136
Srivastava, K. N. On integral equations involving Whittaker's function	125
Thompson, R. C. Generalizations of a well-known result in matrix theory	29
Walker, R. G. <i>See</i> Geddes, A. and Walker, R. G.	
Walker, R. G. Non-cancellative power-free groups	207
Wallace, D. A. R. On the commutativity of the radical of a group algebra	1
West, T. T. The spectra of compact operators in Hilbert spaces	34
Wimp, Jet. Two integral transform pairs involving hypergeometric functions	42
Wright, E. M. An extension of a theorem of Gordon	39
