

The following papers have been accepted for publication and will appear shortly:

- LOYNES, A. The stability of a queue with non-independent inter-arrival and service times.
- COHN, P. M. Factorization in non-commutative power series rings.
- RUTOVITZ, D. Absolute and unconditional convergence in normed spaces.
- RUSTON, A. F. Auerbach's theorem and tensor products of Banach spaces.
- STEPHENSON, G. A static spherically symmetric solution of the Einstein–Maxwell–Yukawa field equations.
- SURDIN, M. A note on time-varying gravitational potentials.
- STALLINGS, JOHN. The piecewise-linear structure of Euclidean space.
- SHARPLES, A. An approximate method in high frequency scattering.
- SCHINZEL, A. On primitive prime factors of  $a^n - b^n$ .
- FLAVIN, J. N. Thermo-elastic Rayleigh waves in a prestressed medium.
- NOBLE, B. Some dual series equations involving Jacobi polynomials.
- SAXENA, R. K. Definite integrals involving  $G$ -functions.
- ENGLAND, A. H. A punch problem for a transversely isotropic layer.

## CONTENTS OF BIOLOGICAL REVIEWS

Vol. 37, No. 2. May 1962

- T. R. E. SOUTHWOOD. Migration of terrestrial arthropods in relation to habitat.
- D. A. WALKER. Pyruvate carboxylation and plant metabolism.
- A. P. M. LOCKWOOD. The osmoregulation of Crustacea.

# CONTENTS

	PAGE
FOWLER, J. A note on cubic equations . . . . .	165
HALL, P. Wreath powers and characteristically simple groups . . . . .	170
ROSEBLADE, J. E. On certain classes of locally soluble groups . . . . .	185
HAYES, A. Additive functionals on groups . . . . .	196
COCKCROFT, W. H. On the Thom isomorphism theorem . . . . .	206
SCHWARZENBERGER, R. L. E. Reducible vector bundles on a quadric surface . . . . .	209
ASPLUND, E., GROSSWALD, E. and GRÜNBAUM, R. On a measure of asymmetry of convex bodies . . . . .	217
MCMILLAN, D. R. and ZEEMAN, E. C. On contractible open manifolds . . . . .	221
CROFT, H. T. On the sum of differentiable functions . . . . .	225
MIRSKY, L. Estimates of zeros of a polynomial . . . . .	229
HAMMERSLEY, J. M. Generalization of the fundamental theorem on subadditive functions . . . . .	235
RAGAB, F. M. Expansions of generalized hypergeometric functions in series of products of generalized Whittaker functions . . . . .	239
TALBOT, A. On the class of Tchebysheffian approximation problems solvable algebraically . . . . .	244
MILLER, H. D. A matrix factorization problem in the theory of random variables defined on a finite Markov chain . . . . .	268
MILLER, H. D. Absorption probabilities for sums of random variables defined on a finite Markov chain . . . . .	286
KARLIN, S. and MCGREGOR, J. On a genetics model of Moran . . . . .	299
MILLER, A. J. Road traffic flow considered as a stochastic process . . . . .	312
MITCHELL, ANN F. S. Sufficient statistics and orthogonal parameters . . . . .	326
RAYCHAUDHURI, A. K. and SOM, M. M. Stationary cylindrically symmetric clusters of particles in general relativity . . . . .	338
COLLINSON, C. D. A class of conserved tensors in an arbitrary gravitational field . . . . .	346
UNDERHILL, J. Non-relativistic dispersion relations for a two-channel scattering process . . . . .	363
DOUGLAS, A. S. and GARSTANG, R. H. Transition intervals for Si IV and Ca II . . . . .	377
MERCIER, R. P. Diffraction by a screen causing large random phase fluctuations . . . . .	382
ELIEZER, C. J. and ROY, S. K. The effect of a magnetic pole on the energy levels of a hydrogen-like atom . . . . .	401
BELINFANTE, D. C. On viscous flow in a pipe with constrictions . . . . .	405
MILNE-THOMSON, L. M. Bounds for the torsional rigidity of isotropic beams . . . . .	417
<b>RESEARCH NOTES:</b>	
MAULDON, J. G. Equally inclined spheres . . . . .	420
WULFSOHN, A. A note on the vague topology for measures . . . . .	421
VERBLUNSKY, S. A uniqueness theorem for the exponential series of Herglotz (II) . . . . .	422
DIANANDA, P. H. Some cyclic and other inequalities . . . . .	425
KRISHNA IYER, P. V. and SHAKUNTALA, N. S. Asymptotic cumulants for distributions of $k$ -state Markov chains . . . . .	427
SMITH, W. L. A note on characteristic functions which vanish identically in an interval . . . . .	430
