

# Experimental Agriculture

**Editor**

Dave Harris, *ICRISAT, Kenya*

*Experimental Agriculture* publishes the results of original research from any source on the agronomy of field, plantation and herbage crops grown for human or animal food; for industrial purposes; and on systems of agricultural production, particularly in the warmer regions of the world. It is especially concerned with experimental work designed to explain agronomic results in biological and environmental terms. The journal publishes accounts of new experimental techniques, new methods of crop production and discusses problems in countries where production is developing rapidly. There are regular book reviews and occasional, often invited, reviews of research.

# Journal of Helminthology

## Editor

John Lewis, Royal Holloway, University of London, UK

*Journal of Helminthology* publishes original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts, including plant and insect parasites, are also published along with taxonomic papers contributing to the systematics of a group. The journal will be of interest to academics and researchers involved in the fields of human and veterinary parasitology, public health, microbiology, ecology, epidemiology and biochemistry.

# The Lichenologist

Published on behalf of The British Lichen Society

## Senior Editor

Peter D. Crittenden, University of Nottingham, UK

*The Lichenologist* is the premier scientific journal devoted exclusively to the study of lichens worldwide. As the leading forum for the dissemination of new concepts and topical reviews, *The Lichenologist* reaches more scientists concerned with the study of lichens and lichen symbionts than any other single journal. All aspects of lichenology are considered including systematics and phylogenetics; molecular biology; ultrastructure, anatomy and morphology; secondary chemistry, effects of pollutants and use as bioindicators; biogeography.

# Journal of Tropical Ecology

## Editor

Ian Turner, Winchelsea, UK

*Journal of Tropical Ecology* publishes papers in the important and now established field of the ecology of tropical regions, either arising from original research (experimental or descriptive) or forming significant reviews. First published in 1985, *Journal of Tropical Ecology* has become a major international ecological journal. With clear, stimulating and readable reports of recent research findings, the journal provides a platform for the dissemination of information on all aspects of tropical communities and ecosystems

CAMBRIDGE  
UNIVERSITY PRESS

*Edinburgh Journal of Botany* is an international journal of plant systematics. Contributions relating to plant systematics and allied subjects, including biodiversity, conservation science and phytogeography, will be considered. Papers reporting the results of research that link traditional and modern techniques are especially welcomed. **Manuscripts should be sent in electronic form** to [ejb@rbge.org.uk](mailto:ejb@rbge.org.uk). All manuscripts will be subject to multiple peer review before publication. Submitted manuscripts should not have been accepted for publication or be under consideration elsewhere. The **language** of the journal is UK English. Authors whose mother tongue is not English should have their papers checked by a fluent or proficient English speaker before submission.

There are no page charges. A PDF offprint will be supplied free of charge to the corresponding author. Paper offprints may be purchased through the publisher. Colour plates may be included in the online version free of charge; the cost of including colour plates in the printed version will be charged to the author. Halftone plates are free of charge both online and in print.

Text pages should be numbered serially, with the title and abstract on the first. Genus and species names should be italicised and should be followed by the authority when first used in the main text or in diagnoses. SI (metric) units must be used other than in specimen citations where appropriate. Authors are advised not to return loan material of new taxa until papers have been reviewed. Refer to volume 63 onwards to see how nomenclatural details, typification and specimens seen should be formatted.

The **title page** should include the title, the name(s) and address(es) of the author(s), the abstract, a short running title and a few important keywords. Titles do not normally include authors of scientific names. Correspondence will be addressed to the first author unless otherwise indicated. The **abstract** should be concise and informative, indicating what the paper contains without summarising it.

**Author abbreviations** should precisely follow: *The International Plant Names Index*, <http://www.ipni.org/index.html>; *Index Fungorum, Authors of Fungal Names*, [http://www.indexfungorum.org/authorsof\\_fungalnames.htm](http://www.indexfungorum.org/authorsof_fungalnames.htm).

**Herbarium abbreviations** should follow: *Index Herbariorum. Part I: The Herbaria of the World*, <http://sweetgum.nybg.org/ih/>.

**Journal abbreviations** should follow: *BPH Online*, [http://fmhibd.library.cmu.edu/fmi/iwp/cgi?-db=BPH\\_Online2014&-loadframes](http://fmhibd.library.cmu.edu/fmi/iwp/cgi?-db=BPH_Online2014&-loadframes).

**Book title abbreviations** should follow: *Taxonomic Literature*, <http://www.sil.si.edu/digitalcollections/tl-2/index.cfm> except that all abbreviated words should be capitalised, e.g. Sp. Pl. not Sp. pl.

**References in the text** should be cited by author and publication date: (Smith, 2014) or 'as stated by Smith (2014)'. Multiple references should be arranged chronologically. For three or more authors use *et al.* In the reference list, references should be in alphabetical order and should appear in the following style:

KNOFF, P., SCHULZ, C., LITTLE, D. P., STÜTZEL, T. & STEVENSON, D. W. (2012). Relationships within Podocarpaceae based on DNA sequence, anatomical, morphological, and biogeographical data. *Cladistics* 28: 271–299.

NOLTIE, H. J. (2013). *The Botanical Collections of Colonel and Mrs Walker: Ceylon, 1830–1838*. Edinburgh: Royal Botanic Garden Edinburgh.

ZHANG, Y. X. & LI, D. Z. (2013). History of and recent advances in plant taxonomy. In: HONG, D. Y. & BLACKMORE, S. (eds) *Plants of China: A Companion to the Flora of China*, pp. 256–278. Beijing: Science Press.

**Tables** should be numbered in arabic numerals and carry a descriptive title. **Figures**, whether line drawings or photographs, should be numbered consecutively in arabic numerals and referred to in the text thus: (Fig. 1), (Figs 2, 3), (Figs 1–4). Line drawings should be scanned in black and white at 600 dpi and photographs at 300 dpi (but correspond with the editor if this should prove problematic) and sent electronically with the manuscript. Please use LZW compression for tif files, remove excess space and elements from around the image, and crop or scale the image to the journal page size (12.5 × 19.5 cm to include caption). A measured scale mark should be included on each illustration to indicate magnification.

**First View:** Articles may be made available online before the issue in which they appear is published, though this is not possible in the case of nomenclatural acts, such as new species descriptions and lectotypifications. Cambridge University Press normally publishes the electronic version of the journal simultaneously with the paper edition in order to avoid problems of priority in nomenclature. Authors whose work contains no nomenclatural acts, and who wish their article to be published electronically before it is published on paper, may inform the editor.

**Open Access:** Cambridge Open Option allows authors the option to make their articles freely available to everyone, immediately on publication. For further information see the online Instructions for Contributors at <http://journals.cambridge.org/ejb>.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## CONTENTS

Floras of the Middle East: A quantitative analysis and biogeography of the flora of Iraq. S. A. GHAZANFAR & T. MCDANIEL	1
<i>Primulina versicolor</i> and <i>P. alutacea</i> spp. nov. (Gesneriaceae), two new species with yellow flowers from northern Guangdong, China. BO PAN, BING-MOU WANG, JIN-YAN HE & FANG WEN	25
A botanical inventory of forest on karstic limestone and metamorphic substrate in the Chiquibul Forest, Belize, with focus on woody taxa. H. M. BADEN, T. SÄRKINEN, D. A. CONDE, A. C. MATTHEWS, H. VANDROT, S. CHICAS, C. PENNIL, W. D. R. BAYLY, R. CHANCE, S. G. M. BRIDGEWATER & D. J. HARRIS	39
Vegetation succession in the Cerrado–Amazonian Forest transition zone of Mato Grosso State, Brazil. P. S. MORANDI, B. H. MARIMON-JUNIOR, E. A. DE OLIVEIRA, S. M. REIS, M. B. XAVIER VALADÃO, M. FORSTHOFER, F. B. PASSOS & B. S. MARIMON	83
Identifying conservation priority areas in the Marañón Valley (Peru) based on floristic inventories. J. L. MARCELO-PEÑA, I. HUAMANTUPA, T. SÄRKINEN & M. TOMAZELLO	95
<i>Prangos abieticola</i> (Apiaceae), a new species from South Anatolia, Turkey. Z. AYTAÇ & H. DUMAN	125
Lectotypification of the critically endangered subshrub <i>Phyllanthus talbotii</i> (Phyllanthaceae). R. KR. SINGH & A. GARG	133
A new species of <i>Diplycosia</i> (Ericaceae) from South Kalimantan, Indonesia. P. WILKIE & G. C. G. ARGENT	139
Two new species of Andean <i>Begonia</i> (Begoniaceae). M. C. TEBBITT	143
Lectotypification of <i>Viburnum beccarii</i> (Adoxaceae). VINAY RANJAN & S. C. SRIVASTAVA	153

The cover illustration, drawn by Mary Mendum, is of the diminutive alpine plant *Sibbaldia procumbens*, named in honour of one of the Royal Botanic Garden Edinburgh's founders Robert Sibbald. This plant is used, in a stylised form, as the Garden's official logo.

Date of publication of *Edinburgh Journal of Botany* 72(3) (pages 343–460): 3 November 2015
