

Subscription Requests

Free Subscriptions

Individuals requesting subscriptions, or wishing to change their address, should contact MTsubscriptions at: AssociationManagement@microscopy.org

Subscription Policies

- Microscopists in the United States are eligible for gratis mail subscriptions.
- Microscopists in Canada and Mexico may subscribe to the print edition for \$25US.
- Microscopists in the rest of the world may subscribe to the print edition for \$35US.
- Microscopists outside the United States may request gratis email alerts to the digital edition.
- Microscopists anywhere in the world may view the digital edition at the *Microscopy Today* website shown at the bottom of this page.

Digital Edition

- The digital edition is an exact replica of the print edition, advertisements and all.
- Features include dynamic pages with live webpage and email links, a word-level search function, and variable page magnification to enlarge both text and figures.

Typical Content

Microscopy Today has articles about:

- Innovative instruments and methods
- Applications in various fields
- Hints and tips for novices and experts
- Protocols in microscopy and microanalysis
- Microscopy facilities descriptions
- Meetings and courses
- Success stories in microscopy education
- Historical microscopy and pioneers
- Industry news and product news
- Humorous situations
- Opinions of our readers

Subscription Customer Service

To change your address or your subscription profile, call 703-234-4115 or send an email request to associationmanagement@microscopy.org.

FOR A LIMITED TIME...

Try Protochips C-Flat™ with this special offer...

Protochips C-Flat™ Trial Pack

only at **Electron Microscopy Sciences**

Not sure if C-Flat™ is right for your application? Now you can try it out with a trial size of 10 per pack in our most popular sizes and types!

C-Flat is the premier holey carbon sample support, perfectly suited for Cryo-EM. USA-manufactured via a contaminant-free proprietary process, C-Flat is ready to use with no additional cleaning or handling steps. With a variety of hole patterns, mesh sizes, mesh material, and thick or thin film options, there is always a product optimized for your needs.

See for yourself why C-Flat is the premier holey carbon grid for cryo-transmission electron microscopy!

Coming up early 2021...

Check our website or YouTube channel for a series of webinars with Protochips.

IMPROVE YOUR IMAGE QUALITY AND RESOLUTION...

Au-Flat™

Holey Gold Film Grids for High Resolution Imaging

Au-Flat™ upgrades patented C-Flat technology with a 45nm Holey Gold Alloy Film on a 3mm gold mesh grid.

Better Datasets

Au-Flat improves image quality by greatly reducing particle motion.

Durable

Au-Flat's film is significantly stronger than other films and is more capable of surviving cryo workflows including tweezer handling, glow discharge, blotting, plunge freezing, and autogrid loading.

Biocompatible

Au-Flat features a holey Au/Pd film on a gold mesh grid, so it's chemically inert and biologically compatible.

Prevents Mistakes

Au-Flat's gold alloy film is lighter in color than the grid itself. This makes it obvious which side is the foil, preventing sample prep and loading mistakes.

Fast Delivery

Just like C-Flat, Au-Flat is readily available. You can expect fast delivery. Au-Flat is fully stocked at **Electron Microscopy Sciences**.

SAY YES TO THE BEST

Boost S/TEM throughput and data fidelity

Upgrade your laboratory's electron microscopy capabilities with the 200 kV Field Emission JEOL JEMF200. This highly-customizable multipurpose S/TEM yields analytical results that rival dedicated aberration-corrected instruments while offering an unprecedented ease of use.
