263 **A guide to outcome measurement in psychiatry**
Howard Ryland, Jane Carlile & David Kingdon

272 **Co-occurring mental disorder and substance use disorder in young people: aetiology, assessment and treatment**
John Otasowie

In this issue (247–254), we include two articles on peer review:

Open versus blind peer review: is anonymity better than transparency. Authors Natalie Shoham and Alexandra Pitman describe the different forms of peer review, with a particular focus on the differences between single-blind, double-blind and open peer review and the advantages and disadvantages of each.

Peer reviewing made easier: your questions answered by Neel Halder, Peter Tyrer and Patricia Casey, addresses topics that potential or practising peer reviewers may find useful. They include what peer reviewing is, why do peer reviews, how to become a reviewer, what to write in a review and where to find more information.
