Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

Fall Memories, painting by Sharon Weiser

A native of Wisconsin (USA), Sharon Weiser received her BFA and K-12 teaching certificate from the University of Wisconsin-Eau Claire in 1977. Before moving to Phoenix (Arizona USA) in 1992, she taught two years in the Art and Design Department at the University of Wisconsin-Stout. For the past 35 years, she has conducted classes and workshops in Wisconsin, Arizona, Minnesota (USA), and New Mexico (USA).

Weiser's award-winning paintings have been in numerous shows and galleries, including *American Artist*, *The Artist's*, *Phoenix Home and Garden*, and *Cowboys & Indians* magazines. Room Art and Public Space Art are among the many commercial interior design projects that she has completed. She is represented by Rogoway Gallery in Tubac, Arizona; Turquoise Tortoise Gallery in Sedona, Arizona; and Simon Gallery of Fine Art, Tucson, Arizona; she also is a juried member of the Sonoran Arts League and Arizona Art Alliance.

In 2011, after 20 years in Phoenix, she moved to Stillwater, Minnesota and opened her Studio/Gallery where she teaches classes in drawing, painting, and color theory. Weiser believes that anyone can paint. Her passion to inspire that talent creates a supportive, positive experience in the classroom where all students can achieve the joy of painting.

Her work can be viewed at: <http://www.sharonweiser.com/>.

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
