CAMBRIDGE JOURNALS

JFM ARCHIVE

Journal of Fluid Mechanics
Digital Archive
1956–1996

Vital research from the definitive source

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

CAMBRIDGE JOURNALS

European Journal of Applied Mathematics

Co-Editors-in-Chief
S. D. Howison, *University of Oxford, UK*
A. A. Lacey, *DPMMS, Heriot-Watt University, UK*
M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

CAMBRIDGE JOURNALS

Journal of Mechanics

Published on behalf of The Society of Theoretical and Applied Mechanics, R.O.C.

Ediror-in-Chief
K. C. Wu, National Taiwan University, Taiwan

The objective of the *Journal of Mechanics* is to provide an international forum to foster exchange of ideas among mechanics communities in different parts of world. The Journal publishes original research in all fields of theoretical and applied mechanics.

The *Journal of Mechanics* especially welcomes papers that are related to recent technological advances, such as micro/nanomechanics, medical and biological systems, and microscale heat transfer. The contributions, which may be analytical, experimental or numerical, should be of significance to the progress of mechanics. Papers which are merely illustrations of established principles and procedures will generally not be accepted. Reports that are of technical interest are published as Short articles. Review articles are published only by invitation.

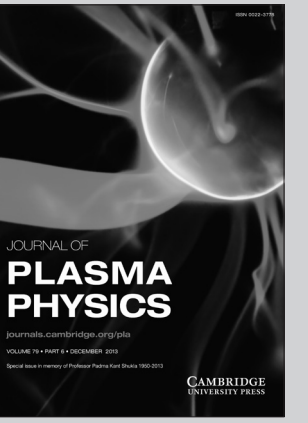
CAMBRIDGE JOURNALS

Journal of Plasma Physics

Editors
Bill Dorland, University of Maryland Honors College, USA
Alex Schekochihin, University of Oxford, UK



With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

ISSN 0022-1120

Journal of Fluid Mechanics

10 November 2016

1 Growth and breakdown of wave packets in a high-speed boundary layer
A. N. Shiplyuk

5 The stability of capillary waves on fluid sheets
M. G. Blyth & E. I. Părău

35 Hydrodynamics of micro-swimmers in films
A. J. T. M. Mathijssen, A. Doostmohammadi, J. M. Yeomans & T. N. Shendruk

71 High-resolution simulations of cylindrical gravity currents in a rotating system
A. Dai & C.-S. Wu

S 102 Reorientation of a single red blood cell during sedimentation
D. Matsunaga, Y. Imai, C. Wagner & T. Ishikawa

129 Effects of bileaflet mechanical heart valve orientation on fluid stresses and coronary flow
L. Haya & S. Tavoularis

165 Waves and vortices in the inverse cascade regime of stratified turbulence with or without rotation
C. Herbert, R. Marino, D. Rosenberg & A. Pouquet

205 Collision between chemically driven self-propelled drops
S. Yabunaka & N. Yoshinaga

234 Asymptotic analysis for the propagation and arresting process of a finite dry granular mass down a rough incline
K.-L. Lee & F.-L. Yang

254 The spin-up of a linearly stratified fluid in a sliced, circular cylinder
R. J. Munro & M. R. Foster

304 On the length scales of hypersonic shock-induced large separation bubbles near leading edges
R. Sriram, L. Srinath, M. K. K. Devaraj & G. Jagadeesh

S 356 On the interaction of Taylor length scale size droplets and isotropic turbulence
M. S. Dodd & A. Ferrante

413 Fundamental solutions to moment equations for the simulation of microscale gas flows
D. A. Lockerby & B. Collyer

437 Macroscopic and kinetic modelling of rarefied polyatomic gases
B. Rahimi & H. Struchtrup

506 Experimental and theoretical study of wind turbine wakes in yawed conditions
M. Bastankhah & F. Porté-Agel

542 Turbulent mixing and entrainment in a stratified horizontal plane shear layer: joint velocity–temperature analysis of experimental data
J. Carlier & K. Sodjavi

580 Axial creeping flow in the gap between a rigid cylinder and a concentric elastic tube
S. B. Elbaz & A. D. Gat

603 Motion of a spherical capsule in branched tube flow with finite inertia
Z. Wang, Y. Sui, A.-V. Salsac, D. Barthès-Biesel & W. Wang

627 Kazantsev model in non-helical 2.5-dimensional flows
K. Seshasayanan & A. Alexakis
