

See More. Guess Less.

NORAN System SIX for x-ray microanalysis

You no longer need to optimize your x-ray microanalysis parameters for just a few elements. That's because Thermo's NORAN System SIX x-ray microanalysis system gives you a complete data set with every run.

Built around our spectral imaging technology, NORAN System SIX:

- Eliminates guesswork by automatically optimizing data collection
- Gives you a full spectrum for every pixel of your electron microscope image
- Allows analysis and re-analysis of the full data set any time, anywhere.

Open your eyes to the world of NORAN System SIX at www.thermo.com/microanalysis or contact us for more information.

Focused Ion Beam

FIB Performance - Single Beam Value at \$350K!

FIB technology at just \$350K! When you need automated milling for specimen preparation, the new JEOL Single Beam FIB complements "cut-and-see" technology and adds value to your lab. Now you can have the high speed, high resolution, and high current of a high-end FIB in a simple, compact design that fits your budget down to the nanoscale.

When you need choices, look to JEOL for the broadest line of imaging innovations.

For more information, call us today or visit www.jeolusa.com/greatvaluefib to download a brochure about this exciting new product.

e2v scientific instruments is **expanding...**

e2v

e2v scientific instruments

...and improving worldwide customer support

Introducing a new US-based EDX detector repair and upgrade facility at our New York office

e2v scientific instruments is the only independent EDX detector company to offer true worldwide support, with repair and upgrade facilities based in both Europe and the USA. We bring with us over a decade of experience in building and repairing EDX detectors to the highest standards.

e2v scientific instruments uses its own high performance components in all detector repairs and upgrades

- Detectors from any manufacturer repaired, past and present
- Performance upgrades to state of the art specifications
- Detectors re-configured for new SEM and EDX systems
- Fast and reliable turn-around, competitively priced
- Special detectors serviced including windowless, TEM and HPGc
- Free no obligation diagnosis and investigation
- Full 1 year warranty on all upgrades

Providing a comprehensive product range, including:

- 'Sirius' high performance EDX detectors for SEM and TEM
- 'Titan' digital pulse processing technology
- Specialized XRF detectors

e2v scientific instruments...

bringing world class sensor technology to the X-ray analytical market.
