

### 1. Mission Archives Series

This series of guides to the material on Africa in German mission archives is the result of a two-year pilot project directed by Adam Jones (University of Leipzig) and Gudrun Mieke (University of Bayreuth) with financial support from the Volkswagen Foundation. The aim is to make it easier for anthropologists, historians, linguists and others to find written or photographic material. The guides are in German, as is most of the material; but it is hoped to publish an English summary (excluding the lists of photographs) in the Internet.
