Editors

Nicholas Lancaster, Desert Research Institute
Lewis A. Owen, North Carolina State University

Associate Editors

Lesleigh Anderson, U.S. Geological Survey
Pat Bartlein, University of Oregon
Louisa Bradtmiller, Macalester College
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Jason Dortch, University of Kentucky
Mary Edwards, University of Southampton and University of Alaska
Tyler Faith, Natural History Museum of Utah and University of Utah
Jaime Urrutia Fucugauchi, National University of Mexico and Instituto de Investigacion y Estudios Avanzados Chicxulub
Radu Iovita, New York University
Kathleen R. Johnson, University of California, Irvine
Terri Lacourse, University of Victoria
Pete Langdon, University of Southampton
Thomas Lowell, University of Cincinnati
Curtis W. Marean, Arizona State University
Jim O'Connor, U.S. Geological Survey
Wyatt Oswald, Emerson College
Yeong Bae Seong, Korea University
James (Jamie) Shulmeister, University of Canterbury, Christchurch
Ximena Villagran, Museu de Arqueologia e Etnologia, Universidade de São Paulo
Xiaoping Yang, Zhejiang University

Editorial Board

Zhisheng An, Institute of Earth Environment, Chinese Academy of Sciences
Gail Ashley, Rutgers University
Julie Brigham-Grette, University of Massachusetts
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Yehouda Enzel, Hebrew University of Jerusalem
David Fink, Australian Nuclear Science and Technology Organisation
Sheri Fritz, University of Nebraska – Lincoln
Alan R. Gillespie, University of Washington
Lisa Graumlich, University of Washington
Vance T. Holliday, University of Arizona
Richard G. Klein, Stanford University
Melanie Leng, British Geological Survey, University of Nottingham
Danial R. Muhs, U.S. Geological Survey
Colin V. Murray-Wallace, University of Wollongong
Jay Quade, Department of Geosciences, University of Arizona
Maria Socorro Lozano-Garcia, Universidad Nacional Autónoma de México
Cathy L. Whitlock, Montana State University
Yurena Yanes, University of Cincinnati
Liping Zhou, Peking University

Aims & Scope

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its 50-year history in advancing the understanding of Earth and human history through interdisciplinary study of the last 2.6 million years.

Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Quaternary Research Center

The QRC is a community of scholars collaborating and fostering interdisciplinary environmental research at the University of Washington through strategic investments in seed grants, expeditions, seminars, workshops, and the publication of *Quaternary Research*.

VOLUME 123, JANUARY 2025

RESEARCH ARTICLES

- 1 A high-resolution record of Late Holocene drought in the eastern Sierra Nevada (California, USA) from June Lake carbonate geochemistry
Eva C. Lyon, Andrea M. Erhardt, Laura C. Streib, Susan R.H. Zimmerman and Michael M. McGlue
- 16 Effects of paleoclimatic variables on suitable open habitats for Pleistocene–Holocene megafauna in South America
Célia Cristina Clemente Machado, Vivianne Albano de Lucena, Nathália Fernandes Canassa, David Holanda de Oliveira and Helder Farias Pereira de Araujo
- 27 Dietary preferences and collagen to collagen prey-predator trophic discrimination factors ($\Delta^{13}\text{C}$, $\Delta^{15}\text{N}$) in late Pleistocene cave hyena
Magdalena Krajcarz, Chris Baumann, Hervé Bocherens, Samantha Presslee and Maciej T. Krajcarz
- 41 Taxonomic, biogeographic, and biological implications of mammoth teeth from a dynamic Pleistocene landscape in Alberta, Canada
Christina I. Barrón-Ortiz, Christopher N. Jass and Tasha S. Cammidge
- 59 A Pleistocene hyenid trackway from the Cape south coast of South Africa
Charles Helm, Hayley Cawthra, #oma Daqm, Jan De Vynck, /uce N#amce and Clive Thompson
- 70 Do ice-dam rupture events leave a distinctive signature in proglacial lake sediments?
Guido Brignone, Matias Romero, Maximillian Van Wyk de Vries, Emi Ito, Mark Shapley and Eduardo Luis Piovano
- 83 South-central Laurentide Ice Sheet dynamics and the formation of proglacial Lake Vita during MIS 3
Michelle S. Gauthier, Tyler J. Hodder, April S. Dalton, Vanessa Brewer, Olav B. Lian, Sarah A. Finkelstein, Maria Schaarschmidt and Alessandro Mereghetti

Photo Caption: View southwards from tufa towers on the shore of Mono Lake in east-central California, USA. This hypersaline alkaline lake has a productive ecosystem based on the endemic brine shrimp (*Artemia monica*) and alkali flies (*Ephydra hians*). The name “Mono” derives from “Monachi,” a Yokut term for the tribes that lived on both sides of the Sierra Nevada, and the region has an archaeological record extending back into the Early Holocene. Recent freshwater diversions severely lowered lake levels starting in AD 1941. Litigation in 1994 allowed the water to steadily rise. Levels are still far short of early 20th century heights, however, partially because of many years of drought in the American West. Mono Lake Basin has a geomorphic, volcanic, glacial and lacustrine record extending beyond the early Quaternary. It has been the focus of much research over the years, including many prominent papers published in Quaternary Research on glaciation, lacustrine sedimentology, geochemistry, palynology, archeology, and climate change that exemplify the interdisciplinary emphasis of the journal (see Bursik and Gillespie, 1993, 39, 24–35; Benson et al., 1998, 49, 1–10; Davis, 1999, 52, 243–249; Madsen et al., 2002, 57, 382–390; Zimmerman et al., 2011, 76, 264–271; Bacon et al., 2018, 90, 276–302).
