TOWNS IN SOCIETIES

Essays in Economic History and Historical Sociology

PHILIP ABRAMS and E.A. WRIGLEY, Editors

"This collection of essays... is a rich and suggestive exploration of the economic effects of pre-industrial towns, which challenges much earlier work... Not only do contributors come from several fields, but most of the essays combine attention to demography, economic development, and social stratification with detailed treatments of particular cities. The result is a richly elaborated picture of interactions between towns, regions, and the inhabitants of both... This collection is therefore of substantive, methodological, and theoretical interest."—*Journal of Interdisciplinary History. Past and Present Publications*

A SOCIOECONOMIC HISTORY OF ARGENTINA

1776-1860

JONATHAN C. BROWN

Brown examines the ways in which the industrial revolution in Europe and the United States created a market for Argentine foreign trade and became a major factor in the country's internal development. He looks at the expansion of ranching and farming onto the virgin pampas as well as commercial development at the port of Buenos Aires, and concludes that conventional notions of dependency do not apply to Argentina's economic expansion. *Cambridge Latin American Studies 35*
