*An altogether new approach to
the problem of our foreign policy*

THE
AMERICAN PEOPLE
AND
FOREIGN POLICY

By *GABRIEL A. ALMOND*

• The position of world leadership that has been thrust upon this country within the last decade makes American foreign policy one of the decisive factors that will determine the future of the world. No less than military and economic potential, the degree of soundness in our foreign policy will influence the issues of the cold war. What is the nature and origin of the "psychological potential" from which our foreign policy springs? How has it been built up in the past and how can it be influenced in the present? How can we gauge today the state of public opinion toward Russia, and in what direction may we expect it to swing?

Upon these vital questions Dr. Almond brings to bear the resources of the social scientist. He has produced an authoritative description of the strengths and weaknesses of our first line of defense—America's psychological potential in the era of the cold war.
