

INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. The Editors receive more than three times as much material as can be published in the BULLETIN; many meritorious papers can, therefore, not be accepted. Authors are asked to avoid, as far as possible the use of mathematical symbols in the title. Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive;
- (ii) the manuscript should be in publishable form, without revision.

Authors should submit three clean, high quality copies to

The Editorial Office, Bulletin of the Australian Mathematical Society,
Department of Mathematics, The University of Queensland,
Queensland 4072, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited is not readily accessible (for example, a preprint) a photocopy of the title page and relevant sections of the copy that you have used should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 200 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification. Authors should include in their papers one or more classification numbers, following the 1991 Mathematics Subject Classification. Details of this scheme can be found in each Annual Index of Mathematical Reviews.

4. Abstracts of Ph.D. Theses. The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

5. Electronic Manuscripts. The Bulletin is produced using \mathcal{A}_{MS} -TEX. Authors who are able to do so are invited to prepare their manuscripts using \mathcal{A}_{MS} -TEX. Hard copy only should be submitted for assessment, but if the paper is accepted the author will be asked to send the text on a $5\frac{1}{4}$ IBM PC compatible diskette or via e-mail to ams@maths.uq.edu.au. [Typed manuscripts are, of course, still acceptable.]

Bulletin of the Australian Mathematical Society

On linear almost periodic systems with bounded solutions	
V.I. Tkachenko	177
Hardy Martingales and Jensen's inequality	
Nakhlé H. Asmar and Stephen J. Montgomery-Smith	185
Two theorems on generalised metric spaces	
Sergey Svetlichny	197
Complete endomorphisms of the lattice of pseudovarieties of finite semigroups	
Norman R. Reilly and Shuhua Zhang	207
Nonlinear filtering of a system of logistic equations	
Rehez Ahlip and Vo Anh	219
A Korovkin type theorem for weighted spaces of continuous functions	
Walter Roth	239
A formula for Eigenpairs of certain symmetric tridiagonal matrices	
Byeong Chun Shin	249
On classical Krull dimension of group-graded rings	
A.V. Kelarev	255
A 3-manifold with a non-subgroup-separable fundamental group	
Saburo Matsumoto	261
Automatic continuity of perturbations of casual operators	
K.J. Harrison L-J. Eaton and J.A. Ward	281
The algebraic closure in function fields of quadratic forms in characteristic 2	
Hamza Ahmad	293
On some mappings associated with geometric and arithmetic means	
S.S. Dragomir D. Comănescu and C.E.M. Pearce	299
Instability of the Dirichlet problem for Hamilton-Jacobi equation	
Kewei Zhang	311
The Weyl functional calculus and two-by-two selfadjoint matrices	
Werner J. Ricker	321
Homological properties of SF rings	
Ahmad Shamsuddin	327
High order divergence-form elliptic operators on Lie groups	
A.F.M. ter Elst and Derek W. Robinson	335

ABSTRACTS OF AUSTRALASIAN Ph.D. THESES

Spin-dependent operators in the multi-shell approach to molecular quantum chemistry	
Philip J. Burton	349
