(Applications of Cognitive Linguistics
[ACL] 13)

There is an increasing awareness in linguistics that linguistic patterns can be explained with recourse to general cognitive processes. The contributions collected in this volume pursue such a usage-based cognitive linguistic approach by presenting empirical investigations of lexical and grammatical patterns and probing into their implications for the relations between language structure, use and cognition.

COGNITIVE POETIC READINGS IN ELIZABETH BISHOP

Portrait of a Mind Thinking

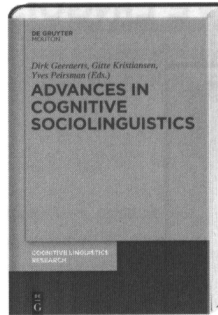

2010. viii, 317 pages.

Hardcover RRP € 99.95 / *US\$ 155.00

ISBN 978-3-11-018610-9

(Applications of Cognitive Linguistics [ACL] 15)

This study offers eight detailed analyses of Elizabeth Bishop's poems and their drafts. It is the first full-length cognitive poetic study of a single author and her composition process. The author turns to cognitive linguistics in interpreting the poet's alternate construals and demonstrates how our awareness of such universal structures of invention as categorization, image schemas, metaphor, conceptual integration, metonymy, idealized cognitive models, licensing stories can assist us in deducing the original movement of writing.

(Cognitive Linguistics Research [CLR] 45)

This volume brings together ten studies into the social and conceptual aspects of language-internal variation. It covers three main areas where Cognitive Linguistics and sociolinguistics meet: lexical and lexical-semantic variation, constructional variation, and research on lectal attitudes and acquisition. All contributions rely on a firm empirical basis in the form of advanced corpus-based techniques and/or experimental methods and survey-based research.
