STATE AID UNCOVERED

Critical Analysis of Developments in State Aid 2015

StateAidHub.eu
by lexxion

Find current analyses by Phedon Nicolaides
on Lexxion's www.StateAidHub.eu

This third volume of **State Aid Uncovered** reviews the main developments in the field of State aid in 2015. The book compiles revised and newly arranged articles originally published on a weekly basis on Lexxion's StateAidHub.eu.

The compilation is conveniently grouped into chapters covering issues such as “Non-Economic Activities”, “Selectivity,” “Infrastructure”, or “Recovery of Incompatible State Aid”. Each article presents the main points of a court ruling or Commission decision, places them in the context of similar case law or practice, assesses the underlying reasoning, and identifies any inconsistencies or contradictions.

The reader will benefit from a fairly comprehensive and easily accessible compilation of the main developments in State aid law and practice and will gain an insight in how State aid principles can be applied in practice.

Dr. Nicolaides has a PhD in Economics and a PhD in Law. He presently holds positions at the College of Europe (Bruges) and the University of Maastricht. He has published extensively on European integration, competition policy and State aid. He is also on the editorial boards of several journals. Dr. Nicolaides has organised seminars and workshops in many different Member States, and has acted as consultant to several public authorities. He is currently Academic Director at lexxion training.

EJRR

EUROPEAN
JOURNAL OF
RISK
REGULATION 

A JOURNAL AT THE INTERSECTION OF LAW, SCIENCE AND POLICY

Today the most important and widespread form of EU regulation in the internal market is concerned with the government of risk to individuals' health and safety. The European Journal of Risk Regulation (EJRR) provides an innovative forum for informed discussion on how these risks are regulated across policy domains in Europe and beyond. The central focus of the journal is the European Law and Policy regulating *inter alia* product (chemicals, food, pharma), financial, insurance and lifestyle risks (nutrition, alcohol, tobacco) as well as risks emerging from technology and third-party threats such as terrorism. The journal adopts a wide definition of regulation, including also innovative forms such as self-, co-regulation and nudges. Its methods extend to disciplines such as law, sociology, political science, risk analysis, economics as well as psychology and cognitive studies.

EJRR strikes a balance between the interests of the practitioners, notably those increasingly engaged in regulatory drafting and advice to the industry, and a more theoretical focus, combining normative articles with timely contributions on legislative and judicial developments, new literature and relevant events.
