Infectious Diseases

LOYOLA
MEDICINE

Loyola University Chicago
Stritch School of Medicine

Loyola University Chicago Stritch School of Medicine (Stritch) is seeking a mid-level faculty member in the clinician/educator track to join the Department of Medicine, Division of Infectious Diseases. This position will have a primary administrative commitment as Director of Infection Control for the Edward Hines, Jr. Veterans Affairs Hospital located adjacent to Loyola University Health System's medical center campus. Hines is institutionally affiliated with Stritch, and, at 472 beds, is one of the largest facilities in the VA system. As director of infection control the successful candidate will chair the infection control committee and provide medical leadership to a well-established program. This position also includes clinical and educational responsibilities within Loyola and Hines, and provides multiple opportunities for professional collaboration and research through the proposed new Infectious Disease and Immunology Institute. Requirements include board certification in Infectious Diseases and formal training in Infection Control, with experience highly preferred.

Based in the western suburbs of Chicago, Loyola University Health System is a quaternary care system with a 61-acre main medical center campus and 15 off-site facilities in Cook, Will, and DuPage counties. On the medical center campus is Loyola University Hospital,

a 589-licensed-bed facility currently undergoing a significant expansion project; it houses a Level 1 Trauma Center, a Burn Center and the Ronald McDonald Children's Hospital of Loyola University Medical Center. Also on campus are the Cardinal Bernardin Cancer Center, Loyola Outpatient Center, Center for Heart & Vascular Medicine, and Loyola Oral Health Center as well as the Stritch School of Medicine and a fitness center. LUHS is a nationally recognized leader in providing specialty and primary health-care services as well as in conducting groundbreaking research.

Please send a letter of interest and current curriculum vitae to:

David W. Hecht, MD (dhecht@lumc.edu)
Division Chief, Infectious Diseases
Loyola University Medical Center
2160 S. First Avenue, Fahey Building, room 149
Maywood, IL 60153

Loyola is an equal opportunity and affirmative action employer/educator and is committed to a drug-free and smoke-free workplace.

Hands and germs hang out in the same places. Especially in your hospital.

Hands are the first, and last, lines of defense against the spread of pathogens. It's not a job for just any antiseptic. The CDC advises that alcohol alone is not appropriate when hands are visibly dirty or contaminated with proteinaceous materials.¹

Compare washing with Hibiclens to using other antiseptic solutions like alcohol, iodine and PCMX:

- Broad-spectrum residual action lasts up to 6 hours after washing.²
- Efficacy is **not** compromised by contact with organic matter like blood.³
- Proprietary formulation is gentler on your skin.⁴
- For 34 years, the standard by which all others are compared.
- Removes dirt and debris leaving hands clean.
- With Hibiclens as your first, and last, wash of the day, you'll have one less thing to worry about.

Kill the Hibigeebies with
HIBICLENS[®]
 Antimicrobial Antiseptic Skin Cleanser
